

Managed *IT* Services

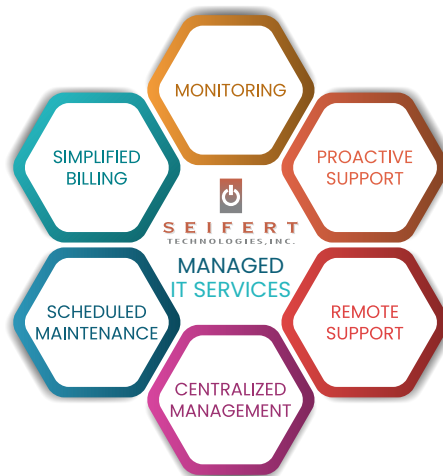

Seifert Technologies' Managed Service is the day-to-day remote monitoring and proactive management of our client's Information Technology Systems.

With Seifert Managed Services you can rest assured that we're on it. Our advanced self-healing network management software will proactively monitor and make corrections to your complete network, keeping systems up-to-date and preventing issues before they arise.

Seifert Managed Services provides your company with unlimited remote support. Our IT professionals can troubleshoot, diagnose, and fix many common computer and server issues in just minutes.

Each month a Network Engineer will be scheduled pro-actively to address issues and ensure the industries best practices are working for you.

Take the stress out of your IT systems with Seifert Technologies Managed IT Services.
