Normal weathering may cause any surface to oxidize, chalk or accumulate surface dirt or stains due to varying exposures to sunlight, weather and atmospheric conditions. The geographic location, the quality of the atmosphere and other local factors in the area, over which the Manufacturer has no control, contribute to the severity of these conditions.

Caulking may be necessary on some installations to seal the frames or trim package against water and/or air infiltration. Caulking is considered a maintenance issue and is the responsibility of the homeowner. It is not considered part of the product and is not covered under this warranty.

Condensation on windows may occur as the natural result of humidity within the house or building area and changes in interior / exterior temperatures, and does not indicate a defect in the window. This Warranty does not cover condensation nor frost or freezing from condensation on the windows.

This Warranty is limited to the Manufacturer's furnishing repaired or replacement parts or components of the window, free of charge, within the time period specified, or as applicable, upon payment in advance of any pro rata amount then due from the Original Purchaser—Present Property Owner, according to the provisions of this Warranty, on the Manufacturer receiving from the Property Owner any such claimed defective parts or components of the window, and with return transportation charges for any repaired or replacement window part or component being at Property Owner's responsibility, as provided.
