EXTERNAL TRANSVERSE WHEEL CYLINDERS

The transverse wheel cylinder shown in illustration L is interchangeable as a left or right-hand cylinder. For Service purposes, only the left hand cylinder is supplied (64673693 (BSF) or 64673695 (UNF)) and it is converted into a right-hand cylinder by exchanging the bleed screw and the plug. It is essential that the bleed screw is uppermost on the cylinder to ensure that all the air is expelled from the system during bleeding.

HIGH PRESSURE HOSES

The last two figures of the part number of rubber hoses indicate the length in half inches between hexagon faces or banjo centre. The measurement shown alongside 8 digit part numbers indicates either the length between hexagon faces or banjo centres on rubber hoses, and between the crimped ends of nylon hoses.
