Handley INDUSTRIES

# Gloss Urethane
# TIMBER & CORK FINISH

## Description

For protecting and beautifying interior timber and cork floors. Handley Urethane is a one can polyurethane which cures by absorbing moisture out of the atmosphere to form a tough resilient coating which has excellent abrasion and chemical resistance.

## Urethane Features

- One can – no mixing required
- Flexible coating
- Resilient, lasts for years
- Non slip surface
- Hard wearing, scratch resistant
- Excellent coverage
- Heat and chemical resistant
- Low maintenance
- Apply with a brush or roller or applicator
- Available in gloss, satin or lo-sheen

## Coverage

6 – 8 sq mtrs/ltr approximately.

## Application

Please refer to directions on the can label. Handley Industries recommend a minimum of three coats applied liberally with a brush, roller or applicator. Clean equipment immediately after use with Handley Brush Cleaner.

## Colour Washing, Tinting & Staining

A recent innovation has been the development of colour washed and blockout coloured floors. Such coatings are a fashionable yet economic alternative to other floor coverings. To avoid colour distortion after exposure to UV, light colours should be coated with one of the Handley aliphatic or non yellowing products. The blockout and darker colours however can be used in conjunction with Handley Urethane Gloss, Satin or Lo-sheen finishes. Handley Urethane can be applied over a range of approved spirit stains.
