

FLORIDA GEM POOL FINISHES

ITS BEAUTY IS SURPASSED
ONLY BY IT'S DURABILITY

Your only other important question is which color.

Florida Gem Pool Finishes have the look and feel of smooth, luxurious natural stone. They are virtually indestructible, colorfast, slip-resistant, non-abrasive and they minimize stains, etching, blemishes, dirt, rain, and the effects of harsh chemicals – just about any challenge you or nature throw their way. Additionally, these finishes can provide some solar heat retention, for added comfort.

Florida Gem uses genuine 3M color quartz granules to create a state-of-the-art aggregate pool finish of the highest quality. We offer an unparalleled support system with twenty years of experience, as well as an exceptional five-year warranty. With Florida Gem, your pool will retain its beauty, color, luster and finish for years to come.

No other aggregate pool finish is more beautiful or longer lasting.
