DRIVEN FOR PERFORMANCE

On jobsites that require a big machine with excellent maneuverability, the 63Z is your choice. The versatile five-section Z-Fold boom has 203 feet 9 inches of vertical reach on a chassis with rear steering. Standard on the 63Z, the Low Speed Steer Assist (LSSA) rear steering system increases maneuverability and driver safety while reducing maintenance and wear. LSSA includes three steering axles in the front and two in the rear, all controlled by a computer system to provide a turning radius of only 58 feet 6 inches.

With so much power at hand, Putzmeister’s innovative technology goes beyond monitoring performance to enhance operator control. Ergonic® Boom Control (EBC) with OneTouch™, enables use of a single joystick on the radio remote to move all boom sections and slewing in tandem, while keeping the end hose level and the boom within prescribed maximum and minimum heights.

A NEW STANDARD OF INNOVATION AND EXCELLENCE

ERGONIC® SYSTEM BENEFITS

ERGONIC PUMP CONTROL SYSTEM (EPS)

The computer-aided EPS constantly monitors and regulates the operation of the concrete pump and truck engine. The electronic regulation of this system means the pump always runs at peak performance. EPS results in more productivity and greater efficiency with less for the operator to worry about.

ERGONIC OUTPUT CONTROL (EOC)

Integral to EPS, EOC reduces fuel consumption, wear and noise. EOC automatically adjusts the engine speed to the minimum required for the delivery rate specified by the operator on the remote control.

ERGONIC GRAPHIC DISPLAY (EGD)

Putting the operator in control of success, the color EGD provides EPS monitoring from one convenient location. The simple-to-use EGD shows a quick and clear visual display of important system information and allows the operator to set individual pumping performance parameters.
FREE FLOW HYDRAULICS IN A CLOSED LOOP SYSTEM

The pumps at the heart of Putzmeister’s free flow pumping system are bi-directional, variable displacement piston pumps. Depending on stroke, oil flows in a closed loop from either port A or port B on the pump to the hydraulic cylinders.

Depending on the specific pump cell size, up to 20% of the oil leaves the simple closed loop system during each stroke through a flushing valve on the main pump and cycles to a cooler before it returns to the hydraulic oil tank. Removing and cooling only this minimal amount of oil is possible because, unlike an open loop system, the oil flows freely without passing through any unnecessary valves that can generate heat.

The closed loop also requires far less oil to run the system, as a larger reservoir is not necessary to cool all of the oil.

Speed and timing are also critical to superior performance. Quicker and more responsive than a hydraulic signal, the electrical system on a Putzmeister pump minimizes the time it takes to change direction at stroke end.

An electrical signal precisely synchronizes the drive cylinders with the accumulator system that controls the S-Valve in the hopper. Reserved energy stored in a nitrogen bladder is sent as a supercharged blast of oil at precisely the right moment to facilitate a smooth and fast shift of the S-Valve from one position to another.

KEY ADVANTAGES OF PUTZMEISTER’S FREE FLOW HYDRAULICS

- Changes in material pressure in the delivery line are reduced to ensure smooth pumping and a consistent concrete flow.
- The intelligent design minimizes wear-inducing pressure peaks, increases service life and makes our pumps extremely powerful.
- Rapid change-over of the stroke means higher outputs, a smoother flow of concrete and less boom bounce.
- There is greater pump output due to the efficient use of all available energy.
BOOM
- 203' 9" (62.10m) vertical reach
- Versatile 5-section Z-Fold boom
- Automatic lubrication
- Integrated work lights

BOOM OPERATION AND CONTROL
- Fully proportional HBC radio remote
- Ergonomic Boom Control (EBC) with OneTouch™ for smooth and precise boom positioning at greater distances
- Fully proportional cable remote with 164' 0" (50m) cable
- Gauge Port Central (GPC)
- Modular Boom Controls (MBC)
- 24V electrical system

DELIVERY LINE
- Equipped with 4.6" (117mm) twin-pipe delivery line on all boom sections, providing efficient concrete delivery
- 5" (125mm) twin-pipe deck pipe with turret elbow
- Easy lift-out brackets for simple delivery line replacement
- Standardized elbows and straight pipe sections
- Common component availability and easy replacement

PEDESTAL
- Rotation bearing and access openings simplify turret pipe changes
- Fully integrated pedestal design absorbs all forces
- Easy access large single-suction filter with indicator gauge
- Efficient hydraulic system
- Condensation trap in the hydraulic tank for water collection
- Two spacious decks for convenient pipe and hose storage
- Automatic lubrication
- Side-mounted aluminum toolboxes
- Integrated work lights
- Breakaway rear steps

OUTRIGGERS
- Quick setup on restrictive job sites
- Fully hydraulic outriggers with integral cylinders
- Front outriggers swing out, telescope out and extend down
- Rear outriggers swing out and extend down
- Four outrigger pads in two side compartments
- Bubble level indicators
- Auxiliary fuel tank in outrigger
- Water tank in outrigger
- One-Sided Support (OSS) system featuring a 180° working range

CONCRETE PUMP
- Ergonomic Pump System (EPS) with color Ergonomic Graphic Display (EGD)
- Free flow hydraulic system for smooth, controllable pumping
- Multi-piece piston cup design
- Automatic lubrication of the concrete pistons
- Hard-chromed material cylinders
- Redundant proximity sensor system with function indicators
- Fully adjustable volume control for very slow pumping with full concrete pressure and boom speed
- Modular pump control box

EZ CLEAN OUT RS 909 HOPPER
- Large 19.4 ft³ (550L) capacity
- Grate-mounted vibrator
- Multi-piece grate featuring bolted connections
- Hopper grate RFID safety switch
- Hinged splash guard covers hopper during transit
- Low hopper height allows easy discharge from a mixer truck
- Automatic lubrication
- Hopper work light

S-VALVE
- Ideal for high pressure applications and harsh mixes
- Hard-faced S-Valve
- Gradual 9" to 7" (230 to 180mm) reduction
- Thick-walled valve construction
- Lasting wear over years of use

CLEAN OUT
- Fast and easy clean out
- 406 psi (28 bar) hydraulically driven water pump
- Wash out kit and hose
- Integrated 206 gallon (780L) water tank in outrigger

The PRO-VANTAGE® Warranty Plan extends the coverage on all Putzmeister BSF boom pumps for a total of 36 months or 6,600 hours at no extra charge. Domestic only.
Robust and more resilient, Putzmeister’s “smart design” boom incorporates welding seams below the edge of maximum stress. The boom is engineered to offer the flexibility to adapt to different loads and features more straight pipe for a less stressful concrete flow and longer wear on parts. The Z-Fold configuration handles space restrictive areas and can pump even if the boom is not fully extended.

The Automatic Frequency Management (AFM) system on the standard HBC proportional radio remote ensures minimal interference with other frequency transmitters. A fully proportional cable remote is also standard. Unlike other remote control systems, the radio and cable remote systems are independent, offering redundancies to ensure proportional operation with either the radio or cable remote.

Putzmeister’s robust, yet lightweight EZ Clean Out RS 909 hopper is engineered for performance and durability. Offering 19.4 ft³ (550L) capacity, the hopper uses one remixer paddle motor and grate-mounted vibrator. The multi-piece grate features bolted connections that allow for easy maintenance. An innovative RFID safety switch incorporated in the hopper disables the machine when the grate is opened.

For enhanced job site versatility, Putzmeister’s unique OSS system allows the operator to reduce the outrigger extension on one side of the unit to create a smaller overall machine footprint. Utilizing a series of sensors, OSS enables the unit to maintain a defined and safe 180-degree working envelope on space-restrictive sites that demand a larger boom.

Fully removable, Putzmeister’s modular bolt-on flatpack and hydraulic system combine versatility and servicing convenience. This simple design allows for cost-effective, minimally labor intensive pump cell replacement for upgrades, repairs or as part of a maintenance program.

Switch gears and save with Putzmeister’s patented Econo-Gear™. The exclusive design allows the Mack chassis engine to run at a lower rpm, achieving less stress on wear parts, lower noise levels and reduced fuel consumption. Econo-Gear makes a significant impact on job site safety and profitability with an estimated 10-15% savings.
### 63Z-METER TRUCK-MOUNTED SPECIFICATIONS

**Length**
- 54' 0" (16.47 m)

**Width**
- 8' 2" (2.50 m)

**Height**
- 12' 10" (3.90 m)

**Wheelbase**
- 280" (7,112 mm)

**Front axle weight**
- 55,733 lbs (25,280 kg)

**Rear axle weight**
- 75,570 lbs (34,278 kg)

**Approx total weight**
- 131,303 lbs (59,559 kg)

*Based on Model MACK MRU 613 with .16H pump cell.
*Weights are approximate and include pump, boom, truck, drive and full fuel. Varies with options selected.
*Dimensions will vary with different truck makes, models and specifications.

### BOOM SPECIFICATIONS | Z-FOLD DESIGN

**Height & Reach**
- Vertical reach: 203' 9" (62.10 m)
- Horizontal reach: 190' 2" (58.09 m)
- Reach from front of truck*: 176' 7" (53.82 m)
- Reach depth: 151' 11" (46.30 m)
- Unfolding height: 75' 6" (23.01 m)

**5-Section Boom**
- 1st section articulation: 90°
- 2nd section articulation: 180°
- 3rd section articulation: 180°
- 4th section articulation: 264°
- 5th section articulation: 210°

**1st section length**
- 35' 5" (10.80 m)

**2nd section length**
- 31' 6" (9.60 m)

**3rd section length**
- 30' 8" (9.35 m)

**4th section length**
- 44' 3" (13.49 m)

**5th section length**
- 48' 9" (14.86 m)

### General Specs
- Pipeline Size (ID) metric ends: 4.6" (117 mm)
- Rotation: 365°
- End hose length: 10' 0" (3.00 m)
- End hose diameter: 4.5" (115 mm)
- Outrigger spread L - R — front: 39' 8" (12.10 m)
- Outrigger spread L - R — rear: 42' 1" (12.80 m)

### PUMP SPECIFICATIONS 63Z.16H

- **Output**
  - Rod side: 210 yd³/hr (160 m³/hr)
  - Piston side: 146 yd³/hr (112 m³/hr)
- **Pressure**
  - Rod side: 1,233 psi (85 bar)
  - Piston side: 1,885 psi (130 bar)
- **Material cylinder diameter**
  - 9" (230 mm)
- **Volume control**
  - 0-Full
- **Vibrator**
  - Standard
- **Hard-chromed material cylinders**
  - Standard
- **Hydraulic system**
  - Free Flow
- **Hydraulic system pressure**
  - 5,075 psi (350 bar)
- **Differential cylinder diameter**
  - 5.5" (140 mm)
- **Rod diameter**
  - 3.1" (80 mm)
- **Maximum size aggregate**
  - 2.5" (63 mm)
- **Water tank — outrigger**
  - 206 gal (780 L)

*Maximum theoretical values listed.
* Applies to units mounted on PMA stock truck — MACK MRU 613
* Standard delivery line system rated at max line pressure of 1,233 psi (85 bar)
