### Netter Pneumatic External Vibrators Series NVR, NVG, NVT and NQT

- Circular vibration
- Nominal frequency from 8,500  $\text{min}^{-1}$  to 17,000  $\text{m}^{-1}$
- Centrifugal force from 7,130 N to 62,260 N
- Frequency infinitely variable by air pressure
- No bearings
- Easily and quickly removable
- Noise reduced design NQT

NVG 61

NVR 61

NVT with bracket NVH 4

Compacting of moulding sand

Tunnel moulds

Dimensions of NVH 1 and NVH 4			
		Type	
		NVH 1	NVH 4
		A	180 240
		B	105 100
		C	60 70
		D	100 130

Dimensions of NVH 1 and NVH 4

#### Application

The pneumatic external vibrators series NQT, NVG, NVR und NVT are especially suitable for compacting, conveying and loosening bulk material.

They are used to compact concrete, empty bins and as drives for conveyors, sieves and vibrating tables.

A special feature is the ruggedness against strong varying loads. There is no danger of overload.

#### Design and functioning principle

The vibration (circular) is produced by eccentric rotating rotors. The frequency and the centrifugal force are continuously adjustable by the operating pressure. For operation a control valve is required (not included in scope of delivery).

#### Permissible operating conditions

##### Drive medium:

Compressed air or nitrogen (Filter ≤ 5 µm), preferably with oil mist.

##### Operating pressure:

100 kPa to 700 kPa

##### Ambient temperature:

– 10°C to +60°C

Units for other temperatures are available.

VSS offers the accessories required for the mounting, installation and control of vibrators and interval impactors.

**VSS provides solutions.**  
**Consult our experienced application technicians.**
