## 1) Ordering information and different available sizes

The tiles and pottery of exotic Artistries have been sourced from renowned suppliers in the Holy Land whose unique and breathtaking products have been exhibited all over the world in various museums and institutions.

The most common sizes are 10 X 10 cm and 15 X 15 cm. Rectangular type tiles are called “corner tiles” and are needed depending on the design of the full tiles combination.

Tile Murals can be made from each type of tile in 4, 9, or 16 pieces from the offered range of different colors and patterns as per coded items below.

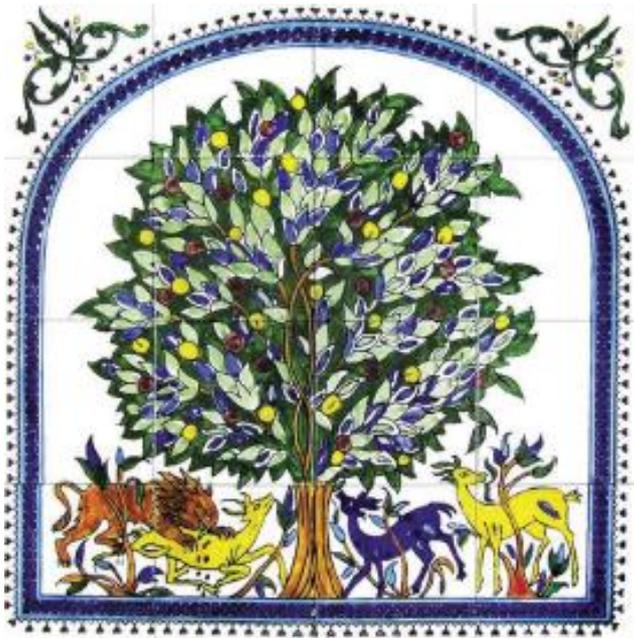

Available tile sizes are as per the following table:

Tile Length (cm)	Tile Width (cm)
7.5	7.5
10	10
15	15
20	20
15	7.5
20	10

Hand painted ceramic tiles are sold by the piece because the production process of each tile is involved and time consuming as the tile pattern is first outlined with the black colour and then the rest of the colours are hand painted on the tile. Once all the colours are applied, the tile is glazed with a transparent lead free glaze and placed in a ceramic kiln. The kiln is fired up to a temperature of 1000 degrees centigrade, whereby the ceramic colours are sealed with the melting of the transparent glaze on the surface of the tile. The firing usually takes a cycle of about twenty four hours from start to finish.
