- To refuse it and return it to the Supplier, at the latter's own expense and risk .r.

The non-conforming Supply refused by the Buyer shall be deemed undelivered and shall give rise to the application of the penalties provided in article 6 "Deadlines" above not-with-standing the Buyer's right to seek damages due to the non-compliance, and/or to cancel the Order.

7.7 Notwithstanding any other provision, in addition to the foregoing, Supplier shall be liable for Buyer's actual costs, expenses and damages related to or arising from nonconforming Supply, including, without limitation, labor and other costs related to transportation of Supply, expediting, removal, disassembly,

APPENDIX 1

The purpose of this Appendix is to set forth the conditions under which the Buyer and the Supplier will carry out electronic data interchange (EDI) by means of networks, within the framework of the performance of the Orders.

A) Definitions

Electronic data interchange (EDI): electronic transfer via a network, from one computer to another, of data in the form of an EDI message.

EDI Message: series of structured segments presented in a form that can be unequivocally read by a computer.

Acknowledgement of receipt: message issued by the recipient of an EDI message acknowledging receipt of the message and its legibility.

B) Nature of the information exchanged

The information which may be exchanged by EDI is defined in the Orders.

Any other information must be exchanged only through paper medium unless otherwise agreed in writing between the Parties to include it within the field of this Appendix.

C) Validity and taking into account the EDI content

The exchange of information via EDI is carried out at the time and place that the EDI message is placed at the disposal of the recipient's information system in a complete and legible way.

On receipt of information transmitted by EDI by the recipient's computer, the latter issues an acknowledgement of receipt to the issuer. The recipient is then deemed to have correctly received the information given unless the recipient informs the other Party of a problem in reading or interpreting the data transmitted. Notification of this may be sent by any means.

On no account is the recipient authorized to modify the message received. Any modification must be made by the issuing Party with specific reference to the modification made. Only messages issued by an authorized issuer with the agreed electronic signature are taken into account by the recipient.

D) Registration and conservation of EDI Messages

The Parties must keep all the EDI messages exchanged, taking all the necessary security measures at their disposal to guarantee their inalterability. In this respect, the Parties undertake to respect a certain number of control procedures such as the conservation of the information sent by EDI in its original form and in chronological order of sending.

The Parties must ensure that the information exchanged by EDI is kept by electronic or computer journals listing all exchanges sent and received and that it is easily accessible. In addition, the Parties must ensure that this information can be reproduced in legible form by man and be printed if necessary in order to constitute, as far as possible, a true and lasting copy of the original

APPENDIX 1 (continued)**E) Admissibility and probative value of the EDI Messages**

Each Party agrees that the EDI messages exchanged on the basis of this Appendix and in conformity with the provisions hereunder have a probative value equivalent to that of a document through paper medium.

As such, the Parties waive the right to contest the authenticity of the information exchanged or oppose the information on the sole basis that the information was exchanged by EDI.

The Parties undertake to accept that, in the event of a dispute, the recordings made of information exchanged by EDI that have been stored may be produced before the arbitration Courts as proof of the facts that they contain, unless otherwise proved.

F) Security of EDI Messages

The Parties undertake to set up and maintain security measures and procedures to ensure the protection of the EDI messages against risks of unauthorized access, modification, delays, destruction or loss.

The security procedures and measure include verification of the origin and verification of the integrity. All information exchanged by EDI must identify the sender and the recipient. As such, each of the Parties undertakes to submit to the other party a list of the persons authorized by it to send information by EDI, updating this list each time it is necessary and indicating the applicable electronic signatures.

If the security procedures and measure lead to the rejection of an EDI message or the detection of an error in the message, the recipient must inform the sender of this as soon as possible.

The recipient of an EDI message which has been refused or which contains an error cannot act on the message without authorization from the sender. When a refused or erroneous message is retransmitted by the sender, the message must clearly indicate that it is a corrected message.

In addition, the Parties undertake to set up and maintain the operational environment necessary for EDI operations. As such, the Parties must supply and ensure maintenance for the hardware, software and the services necessary to transmit, receive, translate and conserve EDI messages.

G) Confidentiality

The Parties must ensure that the information contained in the EDI messages remains confidential and is not disclosed or retransmitted to any other parties who are not authorized to receive it. They must also ensure that it is not used for any purpose other than the performance of the Orders.
