

HONDA

YEARS IN AUSTRALIA

HONDA

HONDA RANGE **2020**

GREATNESS IN YOUR GARDEN

Assembled in Australia.

Honda goes to extraordinary lengths to ensure best-in-market quality. We begin with the highest quality components, with each part individually inspected before entering the production line. We then build each mower, part by part, exceeding Australian industry standards at every stage. This exacting process involves multiple quality checks during and after production, including test-firing, to check ease of starting and the quietness of Honda's legendary 4-stroke engines.

HRU216 BUFFALO PRO

SELF PROPELLED

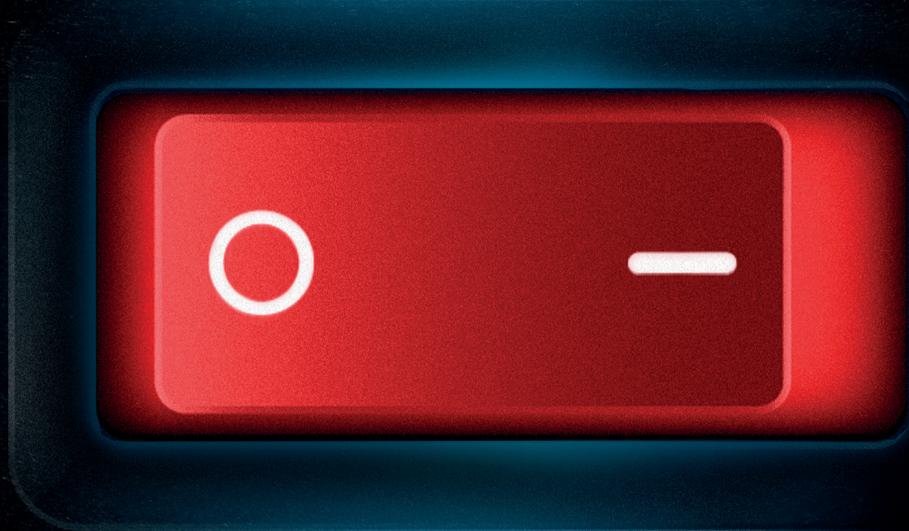

You're looking at the latest in a long line of mowers great enough to wear the Buffalo badge.

The all new Honda Buffalo is the most advanced lawnmower Honda has ever built. It's the product of thousands of hours of development by leading engineers from Australia, America & Japan.

It has an all new designed alloy deck which features the best cutting and mulching performance ever seen on a Honda HRU lawnmower.

Like all other Honda HRU mowers, the new HRU continues to be assembled in Australia, helping support the local manufacturing industry. All of this innovation comes with the quality and reliability that Honda is famous for. So if it's true greatness you're after, there's only one question you need to answer. Which all-new Honda Buffalo is right for you?

We're starting something new.

HONDA
CORD **ESS+**

In 2020, an entirely new form of Honda power will arrive. Honda Cordless will sit proudly alongside our world-leading four stroke range. It will deliver all of the performance, durability and reliability that Honda enthusiasts demand. So in a sense, nothing changes. Except everything.

MOWER FEATURES

NEXITE® DECK

Extremely tough polymer material that will never rust, resists corrosion and abrasion and is super strong. HRX models only.

4-IN-1 VERSAMOW SYSTEM™ WITH CLIP DIRECTOR®

Honda's revolutionary Versamow System™ allows you to mulch, bag, discharge and shred leaves – or even a combination of mulching and bagging! Just slide the convenient Clip Director® knob to choose how much grass is bagged or mulched. No tools or costly attachments needed. HRX models only.

STEEL DECK

Rugged, durable steel deck is designed for long life. HRS, HRN and HRC models only.

3-IN-1 SYSTEM WITH CLIP DIRECTOR®

Slide the Clip Director® to switch from mulching to bagging or discharge with just one touch. No need for a mulch plug or other attachments. HRN models only.

ELECTRIC START

Effortless self-charging key start, to reduce the need for "plug in" charging. HRX217HZU only.

MICROCUT® TWIN BLADE SYSTEM

Honda's exclusive MicroCut® Twin Blade System uses four cutting surfaces that result in ultra fine clippings for superior mulching and up to 30% more clippings per bag. HRN, HRX and HRC models only.

MOW-SAFE – ENGINE BRAKE

A safety feature that stops the blades and engine within 3 seconds upon release of the handle.

SMART DRIVE

Easily adjust the mower's speed to your pace by rotating the control. Five position adjustable control for comfort. Variable speed from 0-6.5km/h. HRN216VKU and HRN216VYU models only.

MOW-SAFE – BLADE BRAKE

A safety feature that stops the blades within 3 seconds upon release of the handle, while the engine continues to run.

HYDROSTATIC CRUISE CONTROL

Honda's Hydrostatic Cruise Control allows precise speed control that's fully adjustable from 0-6.5km/h. HRX models only.

SIDE CHUTE

Unique to the HRS model, the side chute system means no wasted time emptying a grass catcher. HRS216PKU only.

EASY FOLD HANDLE

Easily adjust the handle to different comfortable mowing positions, or fold over for storage. HRS, HRN and HRX models only.

SUPER QUIET GENERATORS

3-STEP PROCESS TO ENSURE YOU GET THE RIGHT GENERATOR

1. WHAT DO YOU WANT TO POWER?

Whether you have a small caravan or something a little more substantial, knowing your appliance ratings is going to help you in the long run. Write a list of all the appliances you want to have running at one time. Then find out the ratings of each appliance. You need to take into account start-up power.

2. FACTOR IN START-UP POWER

Start-up power is simply the power an appliance needs to begin operating. Appliances that run an electric motor (air conditioners and water pumps) can require 3 times the operating load but this is usually only needed for a very short period. Check the compliance plate on the unit for specifications.

3. PICK THE GENERATOR THAT SUITS YOUR NEEDS

If you look at your list, there's a high chance you're not going to need everything running at once. A kettle draws a lot of power but only runs for a minute or so, it won't hurt to turn off some appliances while the kettle boils. Just make sure you have the essentials covered. Let's say your total running power requirement is 1500W, with a start-up power requirement of 1900W, then the Honda EU22i Generator will be the right fit.

If you are unsure, consult your Authorised Honda Dealer.

Contractor Quality

EP2200CX

\$1099
RRP 4-STROKE

- Stable power source via Honda's Automatic Voltage Regulator (AVR System)
- Extended operating time with large capacity 14.5 litre fuel tank featuring a fuel gauge
- Easy-to-use control panel featuring 15 amp sockets, 8.3 amp battery charger and circuit breaker

EP2200CXUH4

Digital Auto Voltage Regulator

4 Year Warranty*

9000W Max Output

6.5 Operating Hours

Contractor Quality

EM10000

\$6099
RRP 4-STROKE

- Engine protected by low oil alert system
- Self diagnosis with 'i-Monitor' feature that protects your investment
- Strengthened electric performance with D-AVR (digital auto voltage regulator)
- Enhanced product competitiveness with V-Twin engine that offers more fuel economy and less noise
- 3 x 15 amp 240 volt outlets, 1 x 32 amp 240 volt outlet

EM10000K1UH4

OPERATING NOISE LEVEL CALCULATION

^{**}LwA refers to sound power level and is measured at rated load, which is standardised by EU noise regulation. It is measured from 6 directions by a microphone placed 4 metres from the product in a closed anechoic room. This room is not affected by environmental conditions.

^{††}dB refers to sound pressure level and is measured from 4 directions (front, back, right and left) by a microphone that is placed 7 metres from the product and 1.5 metres from the lawn ground.

It is not measured in a closed room. Therefore, the data is affected by environmental conditions such as temperature.

4 Year Domestic Warranty*	Yes	Yes	Yes

*4 Year warranty applies to domestic use and does not apply to engines sold as separate units.

[†]With Eco-Throttle switched on when rated at 1/4 output. Usage applications are recommendations only. [†]D-AVR: Digital Auto Voltage Regulator.

HONDA INNOVATION

THE WORLD'S LARGEST AND MOST TRUSTED ENGINE MAKER

“We have one future and it will be made of our dreams, if we have the courage to challenge convention.” — Soichiro Honda

With over 60 manufacturing facilities across the globe, Honda produces more automotive, power equipment and marine engines than any other brand. More people put their trust in Honda to power their products, whether land, sea or air.

We have lived by this philosophy since 1948, when the Honda Motor Corporation was formed. Big dreams produced a massive future. Today, Honda produces innovative and reliable products for almost every application – from lawnmowers to corporate jets. Every product is designed to make life more joyful for you and less impactful to the planet.

Honda Motor Co., Ltd. was established September 24 1948 in Hamamatsu, Shizuoka Prefecture, Japan. With 1 million yen in capital and 34 associates.

In 1953 Honda began manufacturing power products with the desire to apply engine technologies in ways useful for people's daily lives and work situations. With the first general-purpose engine developed for agricultural equipment, the Type H. Honda has since produced a multitude of power products

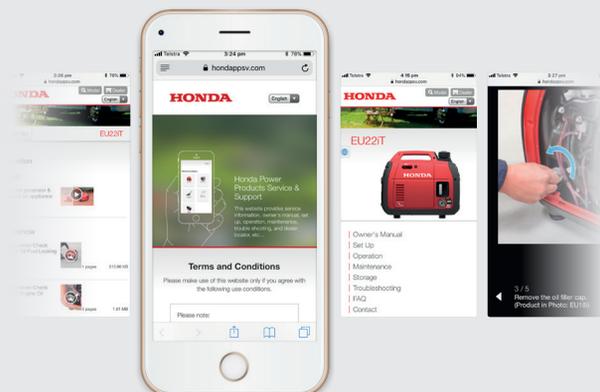

including tillers, generators, outboard engines and lawnmowers.

Honda has been producing lawnmowers globally since 1978 when the HR21 was released. On February 17 1988 the first lawnmower in Australia was produced, the Honda HRU194PU.

Today, Honda continues to develop and produce innovative products which deliver new value, such as the Miimo robotic lawnmower, and the LiB-AID E500 new era portable power source.

Honda will continue to provide customers around the world with power products that are familiar and useful, spreading the “joy of usefulness” by maximising and pursuing the possibilities of its engines and technologies.

Honda Power Products Service and Support

Get service information for your power products, setup, operation, maintenance and more. Best of all, it's absolutely free.

4-STROKE TECHNOLOGY

Honda has always been dedicated to developing human and environmentally friendly engines of the highest quality. It's why the company has been focused on 4-stroke technology for over five decades.

BUYER BEWARE!

Honda has always been a market leader in producing quality, innovative and environmentally friendly products. Unfortunately, there are unscrupulous Australian retailers and individuals who want to take advantage of the Honda brand. Some of these retailers and individuals are knowingly importing Honda-branded products that aren't designed for Australian consumers or Australian conditions.

These products are often sold without after sales support and warranties that only a genuine Honda product can offer.

ASK YOUR AUTHORISED HONDA DEALER WHAT TO LOOK OUT FOR.

ABSOLUTE POWER

The flagship for performance and fuel economy, the high horsepower range incorporates Honda's revolutionary Boosted Low Speed Torque (BLAST™) technology and Lean Burn Control (ECOMo) to deliver powerful acceleration together with outstanding fuel economy during cruising. The same Variable Valve Timing and Lift Electronic Control (VTEC) technology used in Honda F1 cars is also found inside the BF150, BF225 and BF250.

LEGENDARY F1 AND MOTOR-RACING PEDIGREE

Innovations such as the VTEC™ system (optimising power and efficiency at all engine speeds) were borne out of Honda F1 technology. A challenging spirit and never-ending passion for racing fuels the development of technologies found in every Honda product.

INSPIRED BY ASIMO, HONDAJET AND THE NSX

Soichiro Honda's willingness to challenge convention and dream big can be found today in each of our gardening products. The same innovation used for advanced applications like robotics, corporate jets and supercars, also goes into manufacturing Honda Power Equipment products.

POWERED BY WORLD CLASS RESEARCH & DEVELOPMENT

Global state-of-the-art R&D facilities are dedicated to researching, designing and developing cutting-edge products. Honda continues to challenge the way the world thinks by looking to the future through technology and innovation.

ONLY GENUINE PARTS AND ACCESSORIES

Every engine has been manufactured to uphold Honda's strict quality standards. So the purchase of a Honda is an investment in a product that's made to last. This ensures that when it comes to repairs or replacement, genuine parts will keep it functioning at the optimum performance level that's expected.

A DEDICATED NATION-WIDE DEALER NETWORK

All of our dealers share the same level of commitment to the Honda brand as they do their relationship with customers. When it comes to sales, service and parts, you can always rely on a Honda Power Equipment specialist for knowledge and advice.

Honda Australia celebrates its 50th birthday this year, marking half a century since the company was established locally on February 4, 1969.

Although Honda products had been imported and distributed around Australia by a variety of private companies since the 1950s, the brand's official local presence began when Honda Motor Company in Japan sent Mr. Hidehiko Shiomi to Melbourne to setup a unified, national representation for Honda in Australia.
