Xtreme Solutions, Inc. (XSI) specializes in providing Information Technology, Cybersecurity, and Telecommunications Services & Solutions as a Government and Commercial contractor. We are *passionate* about helping our clients become more *innovative, efficient, and secure* through the application of the latest information technologies and cybersecurity practices.

Small Business Status

- ✓ 8(a) SBA Certified Small Business
- ✓ Service Disabled Veteran Owned Small Business
- ✓ Woman Owned Small Business

Cage Code: 56R78

DUNS Number: 827980942

Contract Vehicles

- ✓ GSA IT Schedule 70
Contract# GS-35F-0112Y
 - SIN 132-51 IT Services
 - SIN 132-45 (A-D) HACS Services
 - SIN 132-56 Health IT Services
- ✓ GSA 8(a) STARS II

**EY Entrepreneur
Of The Year®**

2017 National Category Winner

Executive Team

Founded in 2002, headquartered in Atlanta, GA.

Meet our Executive Team:

- ❖ Phyllis W. Newhouse – Co-Founder/Chief Executive Officer
- ❖ Hervia M. Ingram, Jr. – Co-Founder/President
- ❖ Vaughn K. Newhouse – Chief Operating Officer
- ❖ Eric Orubele – Chief Financial Officer
- ❖ Mary Donne Peters – Chief Legal Council

XSI's 5 Star Mission

Xtreme Solutions, Inc.
Solving the World's Problems with Xtreme Solutions!

Services & Solutions

What We Do

Xtreme Solutions provides information technology, cybersecurity, & telecommunications services & solutions. Additionally, XSI also provides IT software, hardware and commodities. Our team consists of certified and highly experienced professionals, and as a company we have extensive past performance in providing these services to a broad range of customers.

Primary NAICS Code:

541519 – Computer Related Services

Services & Solutions Offerings

Information Technology

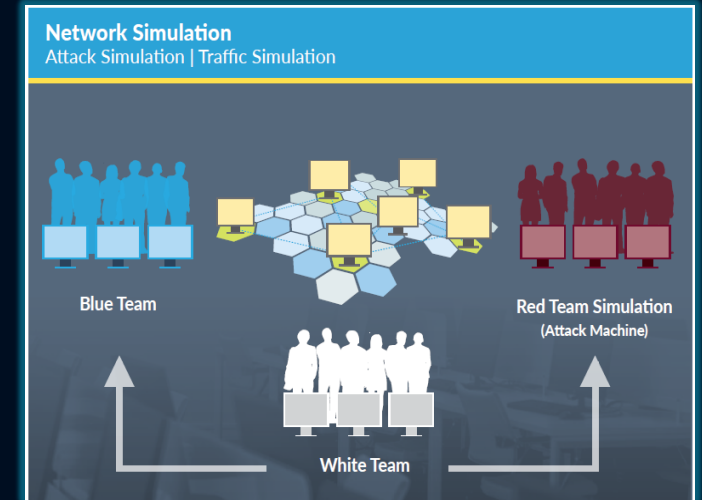

- Information Technology Consulting Services
- Hardware, Software, & Peripherals
- Network & Systems Development
- Systems Configuration/Administration
- Data Center, Help Desk Support
- SharePoint Architecture Solutions
- A/V & VTC Upgrades & Installations
- Structured Cabling, VoIP & Voice Solutions

Cybersecurity

- Cybersecurity Strategy & Defense Solutions
- Security Assessments & Audits
- Information Assurance & Malware Detection
- Computer Network Defense
- Penetration Testing
- Forensics & Security Investigations
- Memory Forensics & Reverse Engineering
- Cyber Range, Defense Training & Simulation

XSI Cyber Range (I.C.E.)

- Cyber Simulated Training
- Work Role/Skills Validation
- Customizable Environment
- Practiced SOC Management
- Complex Attack Simulation
- Software/Hardware Validation
- Collaboration/Team Play
- External Environment Integration

Cybersecurity Services & Solutions

Information Security Monitoring

- Cloud-Based Security Info Event Mgmt (SIEM)
- Advanced Correlation Rule Sets
- 24/7 Security Operations Center (SOC)
- Ransomware Detection
- Raw Data Retention
- Complete Managed Security Monitoring
- Firewall & Web Traffic Monitoring
- Directory Services & User Account Monitoring

External Cyber Threat Intelligence

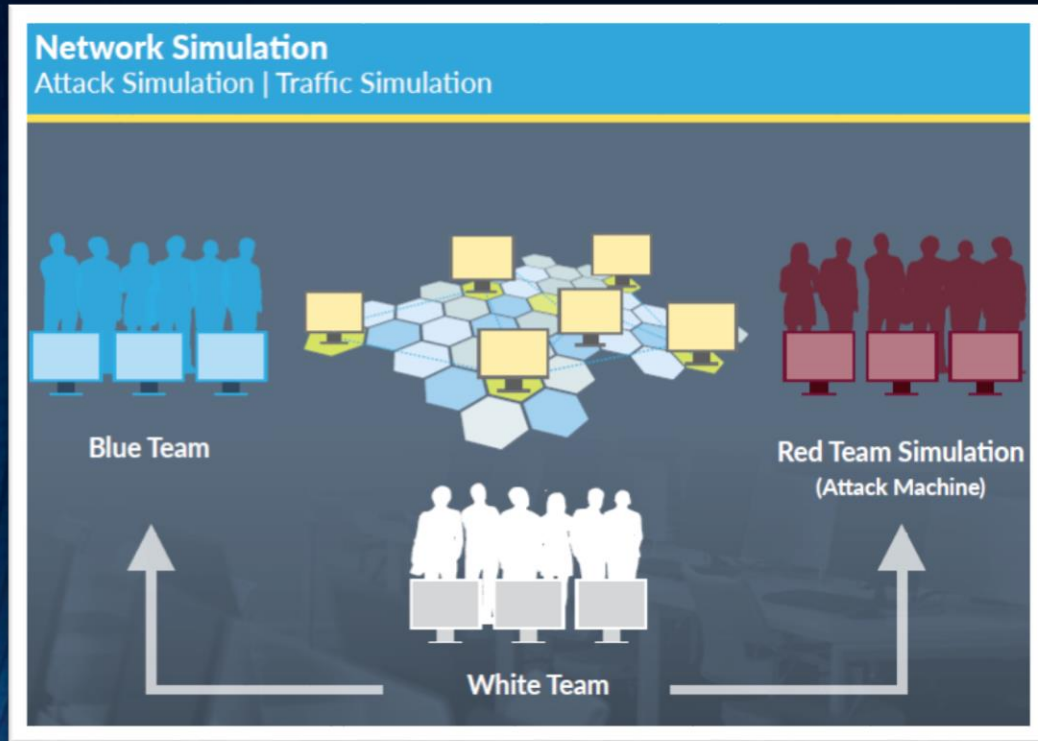

- Evaluated Threat Intelligence
- Threat Data Collection
- In-Depth Analysis
- Cyber Risk Profiling
- Alerting & Reporting
- Dark Web Monitoring
- Continuous Risk Monitoring
- 24/7 Threat Expert Access

Endpoint Threat Protection

- Next-Gen Antivirus
- Endpoint Detection & Response (EDR)
- Managed Hunting
- Internal Environment Analysis
- Industry Based Threat Intelligence
- Behavior Based Prevention
- Real-Time Protection
- Machine Learning Protection & Prevention

XSI Cyber Range – I.C.E. (Integrated Cyber Environment)

Support for Training (Cyber Simulated Training)

- Cyber Certification Training
- Work role/ Skills Validation
- Customized Course Development

Customizable Environment (Practiced SOC Management)

- New Environments
- Replicated Environments
- Special Environment (SCADA)

Complex Attack Simulation (Skills Validation & Practice)

- Research & Development
- Test & Evaluation
- Software/ Hardware Validation

Collaboration (Gamification Through Exercises)

- Team Play
- External Environment Integration

Key Features

- High-fidelity virtual defense training and simulation environment
- Simulation of multiple automatic and repeatable cyber attack scenarios
- Simulation from small to large-scale enterprise/government networks
- Virtualization and emulation of any network device and protocol
- Advanced network traffic generator engine
- Built in attack scenarios for both IT and OT (SCADA) networks
- Real-time training on multiple security systems and tools
- Fully scalable and modular design
- Skill assessment analysis and debriefing in AAR stations
- Ability to integrate any third party or customer application and hardware
