

NEW RELEASE

SAP S/4HANA Private Cloud Edition

Represents the future of ERP, providing previously unachievable visibility, TCO, and agility.

SAP S/4HANA Public Cloud for Customers who desire

- A complete, modern, native SaaS ERP solution with the full benefits of the public cloud
- The fastest path to innovation and the lowest TCO
- A clean Cloud ERP solution without converting old / legacy ERP processes and configurations
- To reimagine business processes and take advantage of standardised best practices

AVAILABLE NOW

SAP S/4HANA Private Cloud for Customers who desire

- A rapid conversion of their existing ERP / ECC environments to a Cloud-based architecture
- The flexibility of a traditional on-premises application as well as subscription based, cloud economics
- Gradual transformation to a pure SaaS landscape at their own pace
- Full, extensive, ERP functionality including partner add-ons with the ability to extend and enhance.

SAP S/4HANA On-Premises for Customers who require

- Complete control and ownership of their application and data landscape
- The ability to manage unique, customer-specific needs which cannot be addressed by public or private cloud offerings.
- The utilisation of the existing IT departments, infrastructure, budget, and IaaS vendor agreements
- Specific compliance with industry and county specific regulatory requirements

Jump-start your implementation and drive ROI by collaborating with Edenhouse and our Kinship Partners for your game-changing shift to

SAP S/4HANA Private Cloud Edition.

Lower TCO

Attractive subscription pricing and generous cloud extension policy resulting in 20% lower TCO compared to on premise deployment.

High Flexibility

All-in user-based pricing and hyperscaler infrastructure allow quick scaling while eliminating sticky CAPEX and in-house deployment costs (typically account for 30%-50% of TCO).

Faster to Go-Live

Cloud-based deployment allows for much faster implementation and realisation of business benefits typically within 6 to 12 months (depending on the complexity).

Innovate

Focus on growing your business - not just keeping the lights on - by running SAP solutions in a managed cloud environment.

Adapt and Scale.

Adapt and scale your operating model with ease. Modernize and advance capabilities and service levels within a more rationalized, intelligent enterprise architecture.

Save Money

Use a coordinated managed-service model, equipped with prebuilt tools, and designed to shorten implementation cycles and deliver results faster.
