

The Hardwood Collection

Six distinctive variegated grains that mix or match to give your clubhouse a truly unique feel that's all your own.

CLUBHOUSE®
DECKING

The EarthTone Collection

Four style-driven solid shades that bring the look of painted luxury without the need for painted maintenance. A bright way to set the mood with a backdrop of color. CCRR-0175 Code Approved.

THE NEXT GENERATION OF DECKING

Clubhouse's proprietary formulation sandwiches a stronger and denser cell structure with the finest protective capstock in the industry for incredible results. Superior strength. A lifetime limited warranty with fade and stain coverage for 25 years.* And the kind of stunning natural wood grains and finishes that will keep them talking at the Club for years to come.

1 Color Technology

Clubhouse Decking is made with advanced technology, tested and proven in the field for more than 30 years.

Designed to stand up to the harsh effects of UV, rain and humidity, Clubhouse capping helps keep colors looking deep and rich for longer.

As an added benefit to blocking the sun, Clubhouse decking uses a heat blocking technology that keeps the decking more than 30 degrees cooler than competing low maintenance decking.

Test results: Xenon 1000 Hours

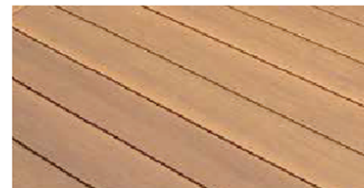

Ipe Walnut Ironwood Mahogany

3 Realistic Woodgrain Finish

Material scientists and tooling engineers developed an authentic woodgrain look that helps with a low-gloss, slip-resistant finish.

Clubhouse Decking's deep grain embossing patterns recreate the warmth and beauty of natural wood. With our proprietary embossing technology, the woodgrain pattern is unique on nearly every board for your deck, making your project look more authentic than other low maintenance decking options.

5 Warranty

Clubhouse Decking is backed by a limited, transferable lifetime warranty with 25-year limited fade and stain warranty.*

- Warranted to not fade by more than 5 Delta E (Hunter) Units for a period of 25 years pro-rated from date of installation.

- Provides high-level of stain resistance to permanent stains resulting from spills of common food and beverages.

2 Korelite™

Clubhouse Decking is made with Korelite™ technology, our exclusive, proprietary technology that provides a dense cell structure for superior strength underfoot.

Korelite leverages world-class in-house materials, tooling and manufacturing capabilities. It's engineered for strength, with a higher density top and bottom – just like an I-beam. The high-performance capstock and foam interior act like a stress skin panel.

6 Dual-Sided Boards (Legacy Series only)

In our single-extrusion process, our PVC core and proprietary blend capstock become one. Both cap and core are made of like material, creating a stronger chemical bond during extrusion.

Additional benefits of the patented dual-sided boards include design flexibility (borders, framing, stair treads in different colors), lower inventory, and more opportunity to use spare boards.
