

New product based on the latest technology!

Simple, elegant, durable,
economical, and made in USA.

Dexerdry is the new patented above floor joist flange gutter placed between deck boards which prevents water and the elements from penetrating the surface of the deck. In other words, Dexerdry is the easiest way to create a DRY ZONE!

"Simple" - "Easy" - "Innovative"

CLUBHOUSE
DECKING

DEXERDRY®
IS ON A ROLL!

With Dexerdry for Clubhouse Decking,
it has never been easier to create the
DRY ZONE under your deck using our
NEXT GENERATION FLEXIBLE DEXERDRY,
our proprietary thermoplastic weather-
diverting system.

Our decks are dry....are yours?

www.dexerdry.com

FLEXIBLE Dexerdry our propriety thermal plastic weather-diverting system is now available at retail home improvement stores near you!

- **Easy to install.**
- **Easy to maintain.**
- **Cost effective.**
- **Made in the USA with recycled materials.**

Easy to install:

It has never been easier to create the **DRY ZONE!**

Installation is as simple as placing a deck board down and then inserting Dexerdry into the groove between the deck boards and attaching the boards with a face screw system such as Cortex.

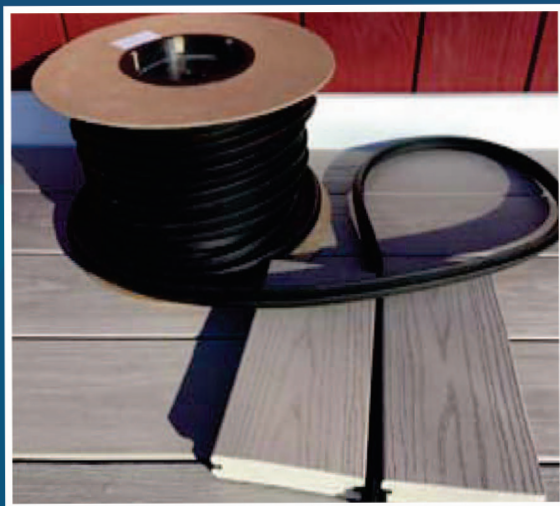

Flexible Dexerdry is now available in a coil of 240* and 50 linear feet which can be cut to length of 12-foot, 16-foot and 20-foot and is designed and engineered to match the horizontal slot groove in most deck boards.

* With an extra 2 feet
