

TEC-TOUR

OUTLAST TEXTILE JACKET AND JEAN - SAND

Without a doubt the Tec-Tour jacket and jean is the highest specification textile combination we have ever made. Wolf debuted Outlast™ technology in 2009 and have been using it ever since.

WOLF

This however is the first time we have incorporated the Outlast™ lining onto a quilted backing, this helps greatly on those really cold days. To negate the possibility of over-heating on hot days the Tec-Tour has large waterproof zipped air-vents and the ability to remove the XTR™ waterproof membrane. This really does make the Tec-Tour the ultimate touring jacket and jean combination. When combined with D3O® Level 2 CE approved armour and D3O® Level 2 CE approved back protector as standard we've spec'd the Tec-Tour with so many features a trip to your nearest Wolf dealer is a must to really appreciate how fully-loaded this combo is!

SIZES:

Jacket Sizes UK 40-52 Jean Sizes UK 30-42

FREESTYLE II

TEXTILE JACKET AND JEAN

A favorite rebooted; the Freestyle II has taken the DNA of the original Freestyle sports jacket and brought it bang up to date!

WOLF

The cut of the Freestyle II is squarely aimed at the sports rider and the level of specification of this striking jacket is second to none. Its sports credentials are further enhanced with the inclusion of the Wolf Energy Deflection System external protectors to the shoulder. To cope with the plethora of riding conditions riders face the Freestyle II is fitted with an XTR™ ultra high performance waterproof and breathable membrane along with a removable quilted thermal lining. In common with the rest of the Wolf collection the Freestyle II comes equipped with a suite of D3O® Level 2 CE approved armour including a D3O® Level 2 CE approved back protector as standard. The Freestyle II jacket and jean zip together with a full length 360° heavy duty Max zip enabling you to connect different sized jackets and jeans together. In fact we use the same zip on the Nimbus jean so it's just as easy to zip the Freestyle II jacket to a leather pant for those cooler days when you still want to get out and do some serious riding.

SIZES:

GT-S

OUTLAST TEXTILE JACKET

Designed with the modern sports-touring rider in mind, the GT-S has a mid-length cut giving a flexible fit, long enough to beat the elements but short enough to be comfortable...

WOLF

... on a bike with a more aggressive riding position. Like its predecessors the GT-S has an Outlast™ lining, now upgraded to a removable quilted lining. The GT-S is constructed from Teflon™ coated Cordura™ and has a highly breathable XTR™ waterproof membrane. We have used the same Wolf Energy Deflection System shoulder protectors as found on our leather garments and combined these with a full complement of D3O® Level 2 CE approved armour including a D3O® Level 2 CE approved back protector as standard. Depending on the style of riding you do, the GT-S can be paired with either the touring fit Tec-Tour jean or the sportier cut Freestyle jean.
