Available exclusively at City Plumbing Supplies and Travis Perkins Branches across the country.
Quick Guides

Preparing and Fixing

1. Adhesive - Used for bonding a tile to a surface. Available with fast and slow setting times, suitable for walls/floors: speak to an advisor to find the right one for your job.

2. Grout - For filling tile joints. It is available in a wide variety of colours to complement, enhance or match tiles being used.

3. Primers - Used to prepare a surface ready for bonding tiles to it.

4. Sealing - Applying a penetrant ‘sealant’ will prevent the absorption of liquids or other debris into the tile. Used to treat porous materials including quarry tile, grout, natural stone and glazed porcelain. Sealer is not usually necessary for glazed ceramic tiles, other than crackle glazed tiles.

5. Silicone - Used to create a flexible movement joint whilst sealing the gap between tiles and another surface, eg, bath, worktop and sink.

6. Tile Trims - Used to finish off tile edges, for example around a window sill.

7. Underfloor Heating - A low cost and maintenance-free way of heating your home without having to arrange your room around wall-mounted radiators. Costs as little as £6/metre per year to run.

Tiles

1. Ceramic tiles - Tiles that are made from fired clay which are fired to give strength and available in many colours.

2. Floor tiles - Suitable for wall and floor use.

3. Glass - Glass tiles do not absorb moisture or become stained. They are easy to clean and are available in a wide variety of styles, sizes and colours.

4. Mosaic - Ceramic, porcelain, glass, metal or stone tile mounted on mesh for ease of installation. May come in squares, octagons, hexagons or random shapes.

5. Natural stone - Examples are: marble, limestone, slate and quartz. Each tile has a unique pattern and colouring which is part of their beauty.

6. Porcelain tiles - The materials used and the process of making the tile make it highly durable, strong and resistant to temperature extremes.

7. Rectified tile - Tiles that have cut sides to ensure that all the tiles are uniform in size and are perfectly square.

8. Wall tiles - Suitable only for walls.

   Making sure you have everything ready before you start.
Materials

Porcelain

The higher firing temperature of porcelain tiles ensures that they are fully vitrified, producing tiles with enhanced properties which are harder wearing, with increased load ratings and the manufacturing process of unglazed or through body porcelain means that if the tile suffers an impact chip or scratch, the original colour remains. Unglazed porcelain tiles require sealing with a suitable sealer before grouting. As with ceramic tiles, the manufacturing and firing process may produce a variance in tone or size between batches. Therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing.

Mosaics

All of our mosaics are fixed onto a netted mesh to make cutting and designing borders or features easier. The majority of mosaics come in a 30x30cm size and can be made up of a range of materials, such as glass, metal and natural stone. We recommend using ultra-fine adhesive and grout to help prevent scratching and damage.

Natural Stone

Our travertine, marble, slate and granite ranges are natural products quarried from around the world. These tiles are produced from naturally occurring stone and therefore the colour and patterning may vary quite considerably between tiles - this is a feature of this kind of product. All natural stones require specific treatment while fixing, including initial cleaning, impregnator sealing and on-going maintenance.

It is important all relevant instructions are followed – printed guides are available so please ask in branch for advice. A white powder adhesive should be used for all light coloured natural stones as a grey adhesive may show through and darken the tiles after being fixed.

Using our brochure

To help make browsing our brochure easier we have created an easy and simple way of identifying what tile is suitable for wall, floor or both, and of what material it is made of.

Each tile has a unique SKU code which can be used both in store and on our website.

Ceramic

With a glazed finish on the front and a clay “biscuit” backing, ceramic tiles are available in many colours and sizes, in gloss and matt finishes. The higher porosity biscuit of many wall tiles allows the use of ready-mixed adhesives. The use of inkjet printing technology in some ranges adds a natural appearance. Some ceramic tiles can be used on the floor. Due to the manufacturing and firing process, ceramic tiles may vary in tone or size between batches and therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing.

Quartz

Our ‘Mirror’ range is made of agglomerate quartz which is graded quartz and mirror glass compressed and blended together with a resin to produce an amazing finish. Special fixing adhesive is required for this material.

  - Use for expansion joints and as a general sealant in kitchens, bathrooms, showers & swimming pools.
  - 370ml.
NoMorePly®

The first tile backing system with a lifetime guarantee

For advice on installation

call: 0800 0094 354
or visit: NoMorePly.net

Why professionals choose NoMorePly

NoMorePly is a tile backing system used to create a perfect foundation on which to tile floors and walls; ideal for bathrooms, kitchens, wet rooms and comes highly recommended by professional tilers.

The System

1. Prime solid walls with SBR (1 part SBR to 3 parts water) before boarding.
2. Use 6mm or 12mm NoMorePly boards on solid walls - prime the boards on both sides then 'dot and dab' with tile or board adhesive.
3. Use 12mm NoMorePly fixed with MEGA Strength and screws for boarding wood or metal stud walls.
4. Use 6mm NoMorePly fixed with MEGA Strength and screws when over boarding timber floors. Use 6mm fixed with flexible rapid-set tile adhesive onto old concrete floors.
5. Always use a good quality single part flexible adhesive for fixing tiles.
6. Always use MEGA Strength on all joints for extra strength and complete waterproofing.

Helpful Facts

50 screws are enough for 6 boards
200 screws are enough for 25 boards

NoMorePly will hold the heaviest tiles 65kg per m² when fitted correctly.

6mm boards (1200 x 600mm) = 0.72m²
12mm boards (1200mm x 800mm) = 0.96m²
1 tube of Mega Strength for every 5 boards
1 litre of NoMorePly Tiler’s Primer diluted 3:1 with water = 40m²

UNDERFLOOR HEATING SOLUTIONS

SOLFEX energy systems offer a variety of electric underfloor heating options suitable for use in bathrooms. These systems are supplied in rolls so are quick and easy to install, and are also compatible with the Neo smart thermostats, allowing total system control via a smartphone, tablet or computer.

**Undertile Heating Mat**

The SOLFEX electric undertile heating mat is specifically designed for use with undertiled floors. The electrical heating cable is attached to a tough fibreglass mesh in a series of loops to fit rooms from 1.0m².

**Features and benefits:**

- Ultra-thin wire (3mm) which will not raise floor levels
- Quick installation - simply roll out the mat with pre-spaced wire and cut & turn the fibreglass mesh to fit the room
- Sturdy fibreglass mesh for extra durability and double-sided tape for secure installation

**The SOLFEX Foil Heater is a streamlined electric radiant floor heating system designed for use with laminate, engineered wood and other floating floors. It can be conveniently installed under the floor finish in both dry and wet areas without the need for additional earth grids.**

- Installed directly underfloor finish; no self-levelling required
- Fully earthed flat aluminium foil won’t raise floor levels
- Wire based system can be adapted to fit around objects
- Great for heating under floating floors such as laminate and hardwood

**SOLFEX Neo Heating Controls**

- Stunning design with soft touch keys
- Self learning optimum start
- Intuitive menu navigation and programming options
- App controllable when paired with a Neo Hub. Compatible with iOS, Android and Windows phone devices.

* Phone not included.
ALL YOU NEED TO COMPLETE THE JOB PERFECTLY.
PLEASE ASK OUR HELPFUL STAFF IF YOU ARE UNSURE, OR REQUIRE THE BEST ADVICE
Simply use the planning grid to measure up the size of your bathroom, hand it over to your installer or local Showroom Sales Manager and we will supply you with a professionally drawn plan using our 3D software of your dream bathroom.
