

## Open Kodi

- Select TV

- Select Enter add-on browser

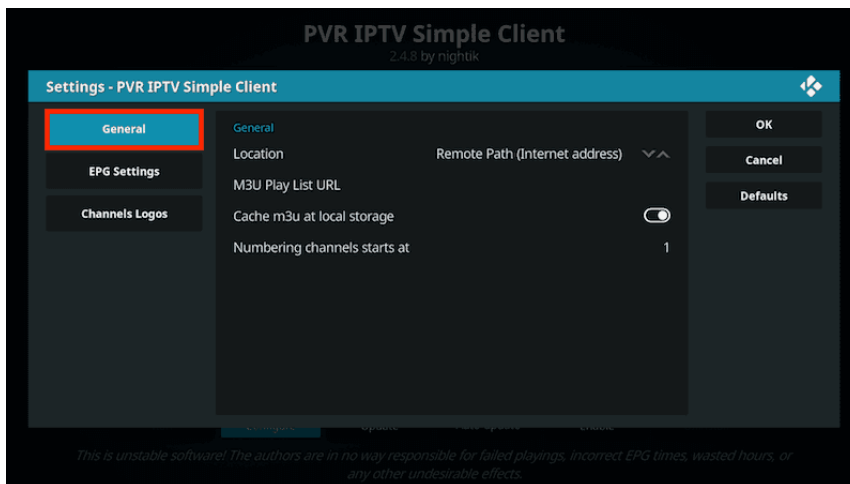

- Select PVR IPTV Simple Client

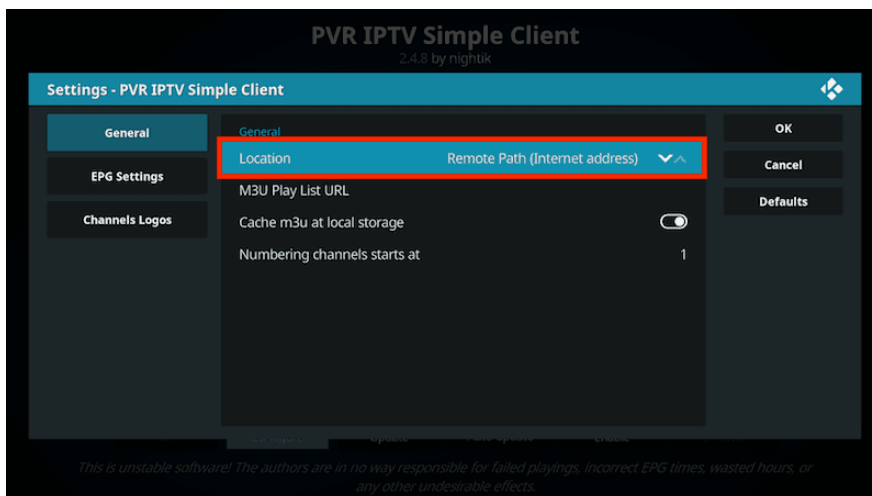

- Select Configure

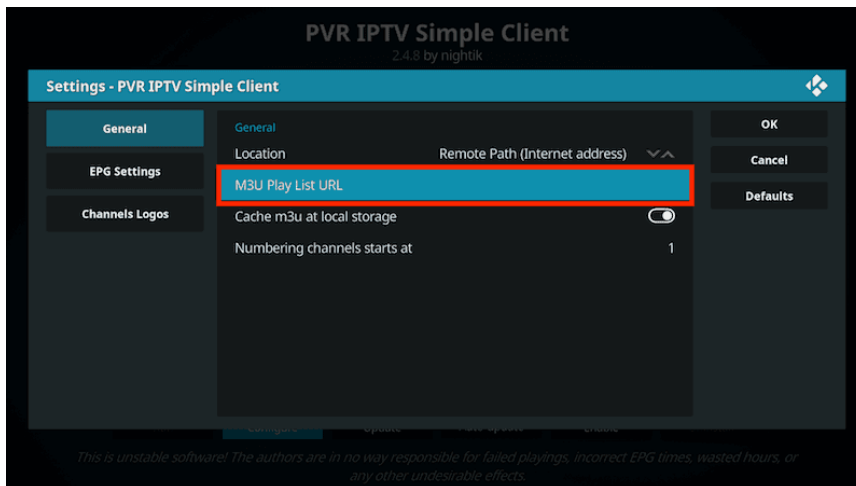

- Select General

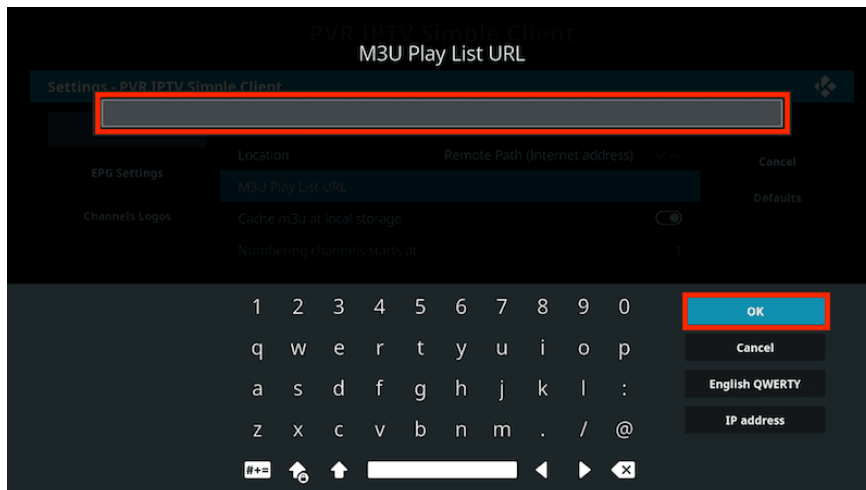

- If you have a **URL for your m3u** list set Location to **Remote Path (Internet Address)**

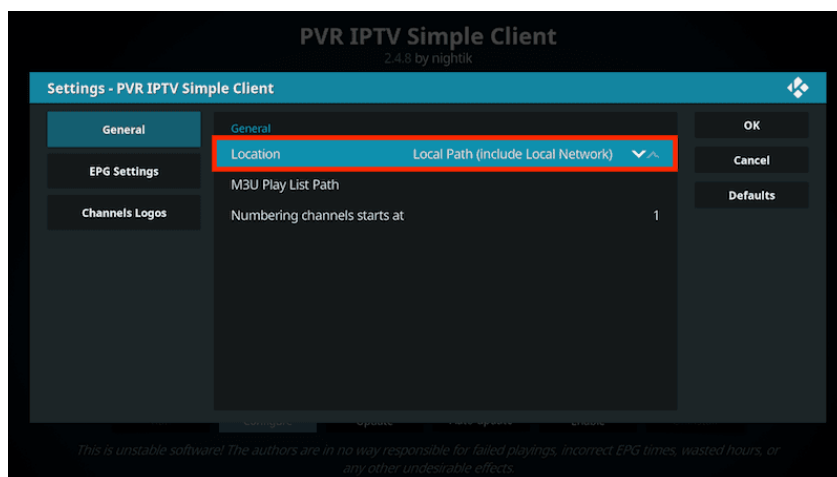

- Then **Select M3U Play List URL**

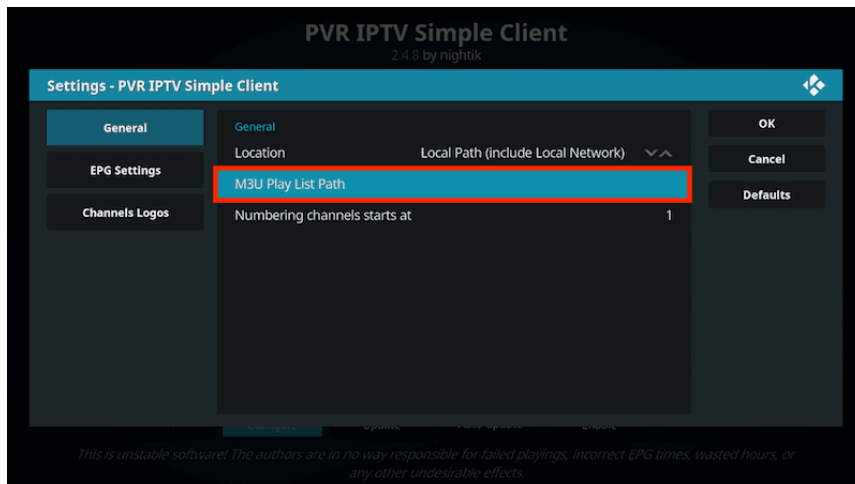

- Enter the **URL of your M3U Play List** and select **OK**

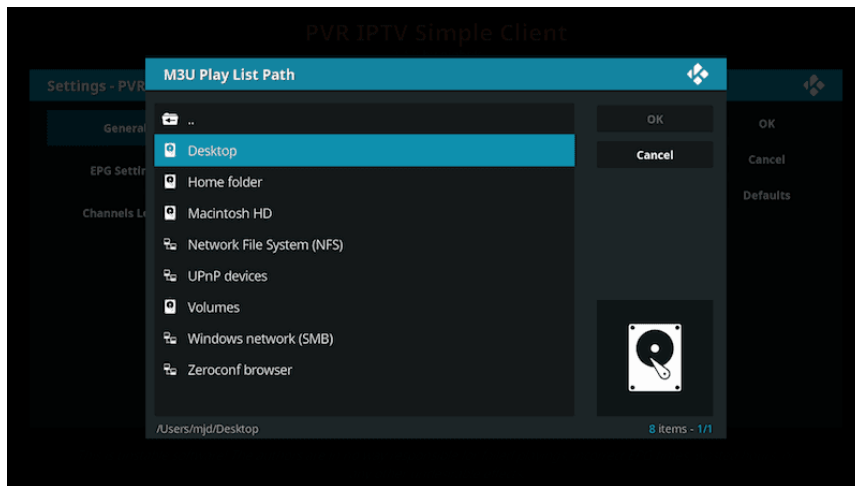

- If you have an **M3U text file** stored locally on your **network/computer/box** then set the **Location** to **Local Path (include Local Network)**

- Then **Select M3U Play List URL**

- **Navigate to where the file is stored and select it**

- Select **OK**

- Select **Enable**

- Wait for notification of channels loaded

- Now when you go back to the Home Screen and select TV it should look like this
