

To all Smart IPTV app users
THIS APP IS NOT FREE IT HAS A 7 DAYS TRIAL!
(THIS APP IS NOT FROM US)
AFTER THE 7 DAYS IT COSTS 5,50€ (ONE TIME)
IF YOU WANT TO USE A FREE APP USE PERFECT PLAYER
Make sure that first you download the Smart Tv App for your TV

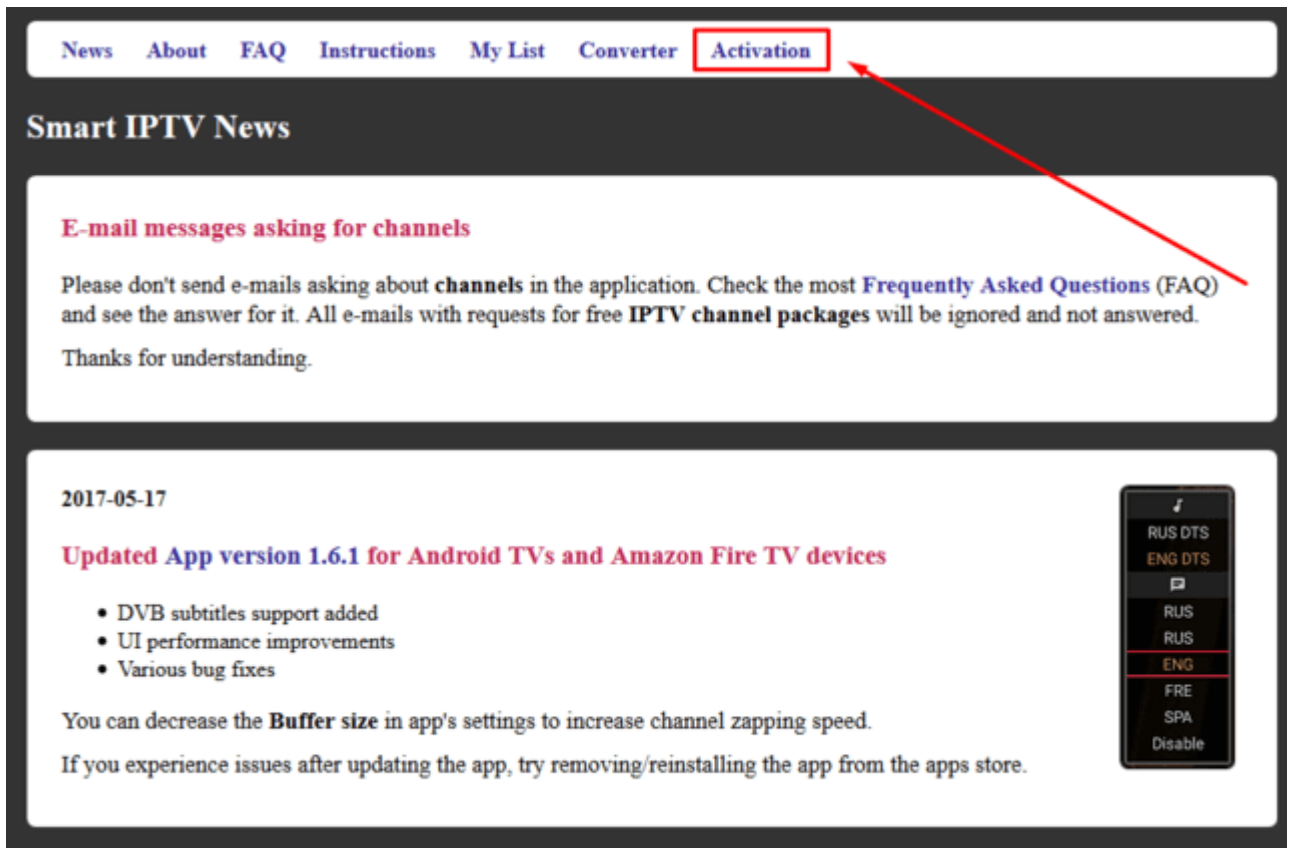

You need the Mac address of the device as show on the screen when you open the app

!!! Warning !!!

your device has two mac addresses one for the wifi conection and one for the kabel conection

If you never used IPTV go to www.siptv.eu

click activation

The screenshot shows the Smart IPTV app interface. At the top, there is a navigation bar with several menu items: News, About, FAQ, Instructions, My List, Converter, and Activation. The 'Activation' item is highlighted with a red rectangular box, and a red arrow points from this box towards the right side of the screen. Below the navigation bar, the main content area is titled 'Smart IPTV News'. The first news item is titled 'E-mail messages asking for channels' and contains text advising users not to send emails asking for channels, to check the FAQ instead, and that requests for free IPTV channel packages will be ignored. The second news item is dated '2017-05-17' and is titled 'Updated App version 1.6.1 for Android TVs and Amazon Fire TV devices'. It lists three bullet points: 'DVB subtitles support added', 'UI performance improvements', and 'Various bug fixes'. Below the list, it says 'You can decrease the Buffer size in app's settings to increase channel zapping speed.' and 'If you experience issues after updating the app, try removing/reinstalling the app from the apps store.' On the right side of the news item, there is a vertical menu with options: RUS DTS, ENG DTS, RUS, RUS, ENG (highlighted with a red line), FRE, SPA, and Disable.

and activate your TV

Smart IPTV on STB MAG (Aura HD)

STB MAG Emulators are prohibited! You will be banned on the server!

You have 7 days to try out the portal with your stream sources.
New devices can be activated after donation. [Press here](#) for detailed info.

Foreword: The portal itself **does not include any channels**, It's only a tool to watch your IPTV or OTT streams.
To check your Internet connection quality, 5 test channels are provided by default.

Supported devices: please check [Infomir Wiki](#) for supported MAG devices.

Attention! The portal only works on widescreen TVs (16:9). Portal's resolution is 1280x720 ([check screenshots here](#)).

Running the Smart IPTV portal

STB MAG (Aura HD) portal address: <http://mag.siptv.eu> ([check screenshots here](#)).

Make sure you have **NTP Server set up** in MAG's settings. Check the full [list of NTP servers](#).

Loading your own playlist

By default, there is already a test playlist for you to check how the App works. After that, you can load your own IPTV playlist by following [these instructions](#).

General Remote Control commands

enter your [Mac Tv address](#) and upload the playlist

Add external playlist links (URLs), with auto-update

MAC: Link: ExUSSR Keep online

→

Reset playlist

MAC:

If you have some problems you can try to rest the playlist, just fill in the mac adres and press reset.
Or you can try to click on the keep online part.

With the green plus you can add a second list on youre app
