# Roller Blinds

At Sunlight Products, we strive to deliver blinds that are both versatile and elegant. We source the best light-filtering and blockout fabrics for our roller blinds, including all the latest styles and patterns, from here in Australia as well as overseas.

We also offer two unique operating systems: Monarch and Ventura, which are both available with a dual, linked or spring assist system, and can be coupled with several chain colours.

Alternatively, you can opt for a motorised operating system, featuring the finest quality motors from Somfy Motors, a company that has a proud 25-year track-record in Australia.

# Roman Blinds

Roman blinds have become increasingly popular, and although they have a more traditional aesthetic, when combined with a modern setting, they can lend a sophisticated softness to your room.

Romans are available in a variety of patterned and textured fabrics, and you can choose either visible timber batten on the face of the blind, or hidden aluminium batten on the rear of the blind, which also adds strength and resilience.

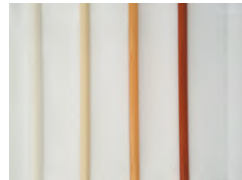

Operating systems include chain control and cord control, and both come in a range of colours.

# Vertical Blinds

Vertical blinds are a practical and popular window covering suitable for all window types, including bays and sloping windows. They offer excellent light control, and a range of styles. Choose a subtle neutral or white to match your paint colour, or a vibrant, bold tone to add a splash of colour to your window. They're also available in co-ordinating fabrics, so you can easily mix and match with different blind types in your other rooms.

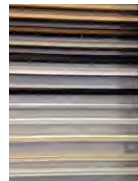

You can choose from two operating systems – cord control and wand control, both of which provide effortless control over light and privacy. The more modern wand control is particularly popular with style and safety conscious parents, as it presents no risk to children, especially when combined with cordless (hassle-free) bottom weights.

# Panel Glides

Panel blinds are a modern favourite for sliding and bi-folding doors, and they also make a stylish room divider. Available in a wide range of colours, panel widths and fabric types including natural, screen and woven. Panels are strong, functional and stylish and have become increasingly popular as an alternative to more traditional window furnishings. The unique track system used in panel glides ensures effortless day-to-day operation. They can be free-floating or connected, and can be stacked left, right or split draw. You can also easily remove the panels for maintenance or to change your look from season to season.

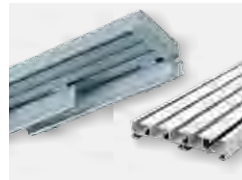

Choose from a range of panel widths - from 300mm to 1000mm, or have our manufacturing facility calculate the most economical width for the window or door you're covering.

# Venetian Blinds

---

Venetian Blinds offer the ability to create a modern look whilst offering excellent light control. Within our Venetian Blind product category are Aluminium Venetian Blinds, Timberstyle and Timberlook Blinds.

Aluminium venetian blinds are still one of our most popular window furnishing styles. They offer great flexibility and functionality, and make it easy for you to filter incoming light, or block it out completely. Timberstyle Venetians combine the natural appearance of textured timber with low-maintenance convenience. Made from polystyrene, they're water-resistant, durable and easy to clean, making them an ideal solution for kitchens and bathrooms. Timberlook Venetians create a relaxed and welcoming atmosphere. They are available in a range of classic warm colours, and all have excellent grain and colour consistency, that blends effortlessly into both contemporary and traditional homes.

# Lumen

---

Fashionable and stylish, Lumens are the ultimate solution for controlling incoming light without obstructing your view.

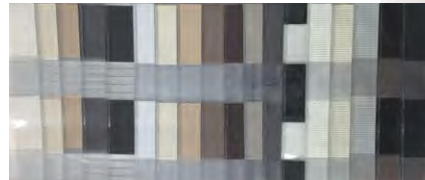

They're an innovative new window furnishing design that combines two independent layers, each with sheer and opaque horizontal strips. When the sheer strips are exposed, you have an open, light-filled, but still quite private, room. A quick adjustment of the control chain, and you can glide the opaque strips over the top of the sheer, covering them up for maximum blackout and privacy. It's their revolutionary design that makes Lumen blinds perfect for letting in the light you want without compromising on privacy.

# Cellular Blinds

Cellular blinds are unique because of their distinctive honeycomb design. Each blind is comprised of hundreds of tiny pockets of air that reduce noise and insulate your home, helping you keep you warm in winter and cool in summer. There are three ranges to choose from:

Portrait blinds are the top of our range cellular. Suitable for any window, they feature an award-winning, precise-fit design that gives you near total light control and are incredibly slimline and child-safe. Galaxy blinds are our 'value for money' range. Available in single or double cell construction, with top-down or bottom-up operation, Galaxy Blinds are a stylish and practical choice for any home. Allure honeycomb shades are our entry level cellular product, spun using water jets which increases the fabric's strength and durability. Control options include cordless, and cordless top-down bottom-up, both of which are child safe.

# Shutters

Interior shutters offer a stylish window dressing that will transform your home – everything from hinged to sliding to bi-folding. There are four ranges to choose from- Sun Select, Sun Saver, Sun Style and Sun Select, each offering its own benefits. You'll love our extensive colour palette too, which includes a wide range of wood stains and painted colours.

Our standard shutter blades are available in flat and elliptical profiles in widths of 47mm, 63mm, 89mm and 114mm. They're constructed with hand-selected quarter-sawn timbers, reinforced engineered stiles, prescription wood conditioning, mortise and tenon joinery, and multi-step hand finishing. This means they will look great and perform flawlessly for many years. Our shutters come in a variety of materials, including plantation-grown timbers, such as Chinese Oak and White Teak, as well as Medium Density Fibreboard (MDF) and ABS Plastic.

# Awnings

Turn any outdoor space into an inviting alfresco dining experience with our stylish, durable awnings that make it easy for you to enjoy your deck or garden, without having to worry about Australia's harsh sun.

Available in a range of stylish striped and plain designs, you can control them manually, or automate the entire experience with motorisation. You can even get wind, sun and rain sensors, so your awnings automatically retract when it gets too windy or starts to rain, and automatically extend ready for a sunny day outside. Popular awning types include: Folding Arm, Pivot Arm, Straight drop Cord & Reel, Verandah Straight drop, Standard Automatic, System 2000 Automatic, Multi Stop Side Channel and Wire Guide Awnings. The operating systems for our awnings come from leading Australian suppliers including Hunter Douglas and Aluxor.

# Security Doors & Windows

Our Invisi-Gard collection offers everything you need from a home security product: strength, durability and aesthetic appeal. A premium quality product, Invisi-Gard Security Doors & Windows are constructed from Marine Grade 316 stainless steel 0.8mm mesh, using a patented wedge system that ensures no metal-on-metal contact. This minimises the effects of corrosion and greatly extends the lifespan of your window and door security.

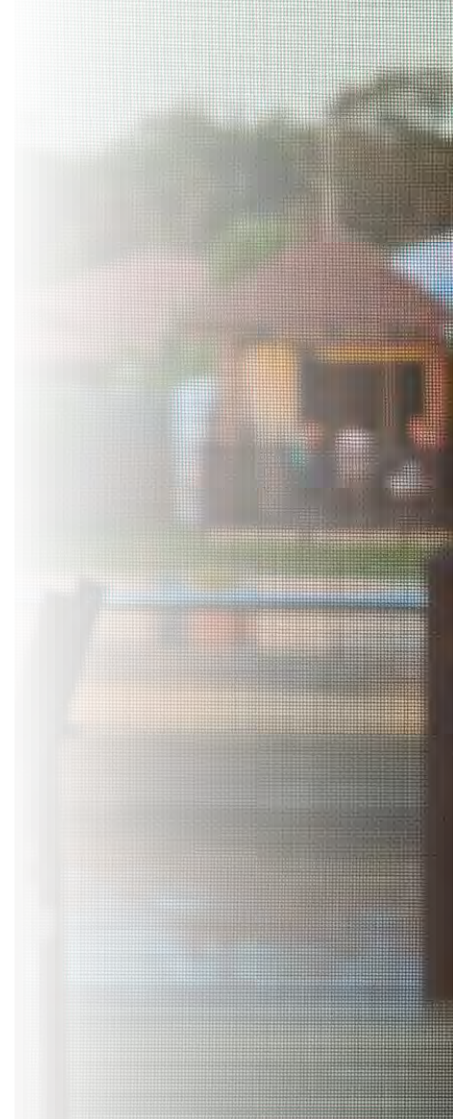

Tested and approved in accordance with Australian Standards, Invisi-Gard delivers confidence in security across a wide range of products suitable for residential and commercial applications, including hinged doors, patio enclosures, sliding doors, emergency escape systems, pool fencing, sliding screens and security windows.

SECURITY DOORS & WINDOWS

# Safety Doors

---

With our safety doors and windows, you can rest easy, knowing your home is protected, without compromising on style or affordability.

Vista doors are manufactured using 0.7mm stainless steel mesh, with a pop-rieveted fixing system, combined with a range of minimalist design choices. Diamond grille doors use special tempered aluminium framing for greater strength and increased peace of mind. You can choose a small diamond, 7mm diamond or decorative patterned design, all offering the same level of security. Plus we can powder coat them in one of a range of modern colours to match your exterior. Patterned colonial casting doors offer a more classic look, with a range of designs that are ideal for traditional homes. These barrier doors add an additional level of safety to your home, while still maintaining your view.
