

2018 - 2019 EDITION

INSPIRED DESIGN. CREATED FOR LIVING.

WELCOME.

The ability to control fire was a dramatic change in the development of humanity. Among many things it provided warmth, light and security. We believe this base connection still exists and is the reason why we still desire to use the fireplace as the central focal point of our living space.

The Vision Trimline range has been designed with the specific purpose of recreating that instinctive connectivity with nature

Our innovative fires are skilfully engineered to allow a true trimless aspects with no distracting frames or visible workings, just fire. These highly efficient beautifully designed appliances are available in a variety of different sizes and can be positioned in virtually any part of your home.

RANGE OVERVIEW.

TRIMLESS.

Our Trimless fires are designed to be positioned beautifully into integrated walls or retrofitted into existing chimneys. These highly efficient innovative gas fires are skilfully engineered allowing a truly trimless aspect. This means no distracting frames or visible mechanical workings, just fire.

With a choice of either landscape or portrait versions there is an option to suit all interiors. Meticulous attention has been paid to the fuel bed and flame patterns to ensure a perfect recreation of a natural, living fire, with large glass panes to allow unrestricted views.

TUNNEL.

Tunnel gas fires are two sided appliances allowing you to enjoy the beautiful flames and warmth from two rooms at once! Perfect for a modern open plan homes or they can be used to make a beautiful room divider. Choose from three different size options in both natural gas and LPG.

TL100T TUNNEL. TL100T TUNNEL GAS FIRE - ULTRA REAL CERAMIC LOGS

ENERGY B

ROOM DIVIDER & CORNER.

If you are looking to make a real statement, a corner fire or room divider fire may be the perfect choice. The highly efficient corner fires allow you to view the beautiful flames from different angles and are available in either left-sided or right-sided options, while the stylish TL73 Room Divider is a unique three sided fire, ideal for partitioning space and allowing the flames to be enjoyed from different aspects, or even different rooms.

PANORAMIC.

These stunning fires make an amazing centrepiece in any home. The three side fires allow a totally unrestricted view of the fire from all sides of the room at the touch of a button. Choose from four different size options, available in both natural gas and LPG.

FILLING THE VOID.

With an innovative, versatile design the compact TL70sl is easy to install and simple to service. The TL70sl can be wall mounted and installed directly to any outside facing wall, perfect for homes without a chimney, or alternatively it can be retrofitted into older properties. One of the biggest advantages is that there is minimal building work required due to its innovative, slim design that allows fitting into the cavity of a standard outside wall.

PERFECTLY FRAMED.

Vision Trimline fires offer a sense of true minimalist beauty. However, if your home style dictates, there can sometimes be a requirement for a little more flare – even extravagance!

To address this, we have created a range of frames and fireplaces that have a certain synergy with our fires. Sharing the same design ethos and manufactured to the same high standards, we have crafted a range that includes a variety of materials with a wonderful, natural beauty.

THE PENMAN COLLECTION

We are delighted to have partnered with the Penman Collection, the UK's leading fires and fireplace brand, providing exclusive mantels in a variety of stunning natural materials. You may now combine our Vision Trimline appliances with a wide range of fireplace mantels giving you more choice and quality that you will not find anywhere else.

A fireplace has the ability to transform any room, conveying a personal statement and becoming a natural focal point. It becomes a symbol of security, contentment and warmth. The Penman Collection presents a clearly distinctive range of fireplaces, stoves and accessories that combines a heavy investment in design with quality materials and expert craftsmanship.

More information on the Penman Collection can be found by heading to www.penmancollection.com

CONVENTIONAL THINKING.

If your home does feature a conventional brick chimney and you wish to utilise this, then we have that covered with our TL60cf appliance. Like our balanced flued appliances, the TL60cf can be fitted trimless, with the classically styled Woodbury fireplace suite, or with a variety of mantels to create a truly unique focal point to your living space.

EVERYTHING YOU NEED IN ONE PACKAGE

- Ecomax remote control this sleek designed handset features thermostatic control countdown timer to automatically turnoff the fire, and an Ecomax button, allowing adjustment of the flames to regulate room temperature resulting in 40% energy saving.
- Adjustable legs allowing you to easily install the fire at your desired height without the need for further, unnecessary building work.
- Control access door a neat, gloss finish, access system to allow access to the manual fire controls.
- Convection vents two of these are supplied with each fire to allow convected hot air from the chimney into your room.

DOUBLE BURNER (DB) FEATURE

With the exception of the TL38, TL46, TL60CF AND TL63C/P models, all other Vision Trimline fires are equipped with an innovative double burner system. This clever feature staggers the flame pattern in two rows and gives an extra sense of depth and realism whilst offering a more economical way to use your fire. At the touch of a button the front burner row remains active whilst the rear burner row diminishes, giving unparalleled visual effect with a reduction of 40% of the heat output. Used in combination with the Ecomax remote control can result in the benefit of reduced running costs of up to 60%.

GO Wi-Fi FOR MAXIMUM CONTROL

Introducing the latest optional upgrade option for Vision Trimline fires, the Myfire app uses wireless technology that connects the fire to your home Wi-Fi network. You can now take control using your smartphone or tablet with features such as:

- Temperature adjustment and thermostatic control
- Flame pattern adjustment and animated wave profiles
- Individual user profiles
- Countdown timer
- Weekly programming

ANTI-REFLECTIVE GLASS

Anti-reflective glass (ARG) which is available on many Vision Trimline models is a premium feature that allows you to maximise your experience of the beautiful flames giving the appearance of an open fire whilst having the convenience of a gas appliance. This clever feature gives the illusion that there is no glass between the fire and you, creating an even more authentic experience.

BURNING LOGS TECHNOLOGY

All TL83 models incorporate the latest burning logs technology to recreate the most authentic, realistic looking flame ever. Combined with high definition, ultra realistic ceramic logs, this innovate feature creates a fire so realistic it cannot be distinguished from a natural, living fire. And for the ultimate in warm ambiance, the optional LED glowing fuel bed creates a subtle, relaxing impression of gently burning embers.

INTERIOR STYLING & FUELBED OPTIONS

For that extra WOW factor, why not choose to upgrade to a black mirrored glass lining for your fire chamber and add a reflection to the fuel bed and flames to give a remarkable effect of added depth and detail. If burning logs is not the look you are going for, then perhaps you would be more interested in an alternative fuel bed for your fire. The collection features a range of stunning options to choose from.

^{*}EEI best performance.

FLUE SYSTEMS.

All Vision Trimline fires (excluding the TL60cf) use a specialised double wall concentric flue system. The THC-CC system is an obligatory and integral part of the complete combustion system and must be used when installing the fire. THC-CC is made of high quality 0.5mm thick stainless steel AISI 316 inner and AISI 304 outer-liner.

A wide range of flue/chimney components allows for easy installation when terminating through the wall or the roof in an existing chimney or a dedicated fabrication. Please consult your nearest dealer for more details. The THC-CC system is approved according to CE in combination with all Vision Trimline balanced flue gas fires.

PRODUCT DIMENSIONS.

All dimensions are in millimetres. Red highlighted areas indicate parts of the fireplace that sit within the chimney/wall.

For dimensions of Penman Collection fireplaces please visit www.penmancollection.com for details.
