This Product is a laminated safety glass to **Australian Standards 2208**

The **face panel** can come in **Annealed** glass for cladding, bar mirrors, lifts, feature walls, if used in wet areas the edges have to be sealed from the moisture.

Also **Toughened** face glass available for thermal preposes e.g. Splashbacks

The colour options are created by the reflective rear panel so various types

of **Figured rolled glass** can be used for Decorative applications or **Acid etched glass** for non reflective requirements. This gives a satin finish to the face.
