Efficient Money Management for Your Business
Outstanding Features of the ER-A420 and ER-A410

**Clear Display for User-Friendly Operation**
A brightly lit 2-line LCD display makes it easy to operate the machine, even in low-light environments. It can display up to 16 alphanumeric characters, allowing clerks to view the names of purchased items and other information in an easy-to-understand fashion.

**Quick and Quiet Thermal Printing**
Featuring thermal printing technology, the ER-A420 and ER-A410 silently print out sales receipts at a speedy rate of about 13.3 lines a second. Printing of graphics, such as a business logo, is also possible. Transactions are recorded onto two separate tape rolls—receipt and journal—for easy sales management.

**High-Capacity Cash Drawer**
The spacious cash drawer in these models have five bill compartments and eight coin compartments—more than any competing electronic cash register in this class. When not in use, the drawer can be locked shut, keeping your money safe.

**Convenient Connectivity**
Both models come standard with two RS-232 ports for connecting peripherals such as PC or a slip printer. No longer do you have to disconnect one device to use the other.

Described for the needs of small shops, cafés and restaurants, the ER-A420 and ER-A410 take the work out of money management with special features that help you manage your sales transactions more quickly and accurately. A generous number of PLUs (price look-ups) and Department keys make it easy to enter and track sales. A unique Price Level Shift function lets you record separate prices for each PLU (price look-up). And dual serial ports let you connect to PCs and other devices simultaneously. All these convenient features add up to greater efficiency for your business.

**Quick and Accurate Price Entry**
Standard equipped with 500 PLUs (price look-ups) and expandable up to 1800, these cash registers make entering pricing information a snap. By simply typing in a three-digit code for sale specials, set menus and other popular items, you can total up your sales with increased accuracy and speed. Department keys are also available, allowing you to easily track and analyse sales by product type.

**Price Level Shift for Special Pricing**
The Price Level Shift function lets you record two different prices for each PLU, making it easy to manage items that vary in price depending on the customer or the time of day—great for lunch specials, senior citizen’s discounts, or items that frequently go on sale. Two operation modes are available: Automatic Return mode for special customer pricing and Lock mode for prices affecting all customers.

**Other features**
- Auto key function (max. 5)
- Multi language
- Currency conversion
- Training mode
- Optional drawer
- 500 standard PLUs, expandable up to 1,800
- Spill-proof flat keyboard (ER-A420 only)
- Set PLU, Link PLU functions
- PBLU (Previous Balance Look-up) system
