3DLEAN

GUIDE TEAM COLLABORATION AND IMPROVE PERFORMANCE WITH LEAN

DELMIA® 3DLean puts Lean principles into action to address operational waste, variability and efficiency by engaging the next generation workforce regardless of where or how they work.

DELMIA 3DLean leverages a modern interactive environment accessible to everyone on the cloud. It empowers teams to find new ways to innovate by bringing people together in a structure that guides discovery, analysis and collaboration. Leveraging virtual models of product, process and resources, teams can understand the art of the possible and plan for improvement.

Built on the **3D**EXPERIENCE platform, DELMIA 3DLean is a widget-based web app that builds better team relationships and performance despite physical or organizational barriers. Using touchscreens on the shop floor or collaborating virtually with remote workers, it drives constructive team behaviors by leveraging rich content and Lean principles to help teams make better decisions and manage actions. Regardless of role, DELMIA 3DLean supports different team challenges and goals to continuously improve operational efficiency.

BUSINESS CHALLENGES

- How to collaborate effectively within/between teams
- How to drive adoption of Lean principles across manufacturing and operations
- How to reinforce problem-solving behaviors and manage corrective actions
- How to engage workers and make them more productive
- How to make rapid decisions using information that often changes and isn't easy to visualize

HIGHLIGHTS

- Simple and easy to use environment accessible to everyone (on the cloud or in person)
- Integrates Lean methodologies into team processes
- Incorporates operational data and graphical information to guide collaboration and analysis
- Captures actions and assignments to ensure follow up and issue resolution
- Customizable to different team challenges and goals

BENEFITS

- Make the most of every team meeting
- Rapidly increase team performance and efficiency
- Easily deploy and adopt Lean principles
- Empower teams to solve problems autonomously
- Increase worker engagement and understanding of their roles and contributions
