Horizon Series

Polycarbonate Daylighting Systems

Reduce Labor and Material Costs While Enhancing Performance

Horizon Series products are dry glazed systems that are environmentally friendly, sustainable, and energy efficient. The Horizon polycarbonate panels are easy to install and utilizes the industry's most advanced, high-performance, lightweight multiwall polycarbonate panels that maintain high clarity and provide an outstanding balance of impact strength and stiffness, excellent thermal insulation, UV protection, flame and condensation control, and long-term high light transmission.

C-Series

Standing Seam Polycarbonate Canopy System

- Custom canopy designs for shelters, entrances, covered and enclosed walkways
- Lightweight, high impact resistant multiwall polycarbonate
- No exposed fasteners, gaskets, sealants or horizontal joints
- Available in various panel colors and configurations

M-Series

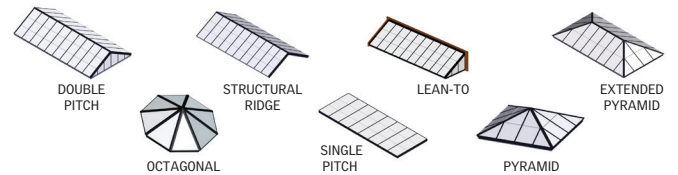

Monolithic Polycarbonate Canopy System

- Monolithic polycarbonate panel thickness of 3/8"
- Up to 250 times impact strength of glass
- Custom engineered for limitless design options
- Custom panel shapes available
- Standard colors clear and white, other colors available.
- Architectural paint and anodized finishes available

Translucent Polycarbonate Skylight Structures

- Single or double glazed systems
- Aesthetically pleasing narrow profiles with no exposed fasteners
- Reduces labor and material costs in new construction, retrofit, or renovation projects - fewer parts, faster on-site assembly
- High impact resistance, excellent UV protection
- Extensive glazing color and customized performance options

Unlimited design possibilities with a wide range of configurations.

Translucent Polycarbonate Wall System

- Lightweight interlocking wall panel system with unlimited height and width
- Dry glaze system – no sealants required on panels
- Thermally broken aluminum frame
- Maintain its shape, color, and strength
- Requires no annual maintenance
