How to make a rain stick

1. Find a cardboard tube. This could be from kitchen roll, foil, wrapping paper or a Pringles can. If it has open ends, seal one end with paper, card or tape.

2. Measure out a piece of foil twice as long as your tube and scrunch it into a curly wurly shape.

3. Choose your 'rain' and put it into the tube. You could use rice, seeds, dry beans or dry peas.

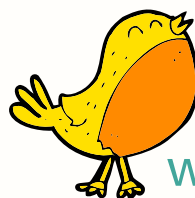

4. Test the sound your rain stick makes. When you're happy, seal off the second end of your tube with paper, card or tape.

5. Decorate your tube. You could use paint, stickers, wool, or washi tape, or draw a design on A4 paper and stick it around the outside.

Ta dah! You are ready to make it rain. For more help, watch the video tutorial at Raise Your Voice Family Choirs on Facebook.
