

Terra-Pin™

Our latest innovation, the Terra-Pin has been designed to hold all types of erosion control and soil stabilization blanket matting securely in place.

- Quick and easy to install with a standard electric drill
- Superior performance when compared to traditional straight pins, up to 4x pull out force in tests carried out
- Eliminates time & labor associated with replacing or reworking pins that have become loose or pulled out altogether
- The patent pending innovative design of the installation chuck allows the Terra-Pin to be installed to full depth without damaging the mat
- Integrated top coil form eliminates the need for a washer, spreads the load and helps secure the matting in place
