Discover OASE

If you want to discover OASE, you will have to travel into the German countryside. More precisely into the region known as Tecklenburger Land, a water-rich landscape with peat bogs, wetland habitats and canals.
No wonder that water is the central theme at OASE.

Water is our element. It is the primary focus of our products, the objective of our research and development, the measure of our actions and the habitat that we shape. OASE started with water gardens and fountain technology. Today we offer everything to do with garden design and aquatics: inspired by nature and our customers.

Pure fascination

When travelling, we often decide on holiday destinations depending on our choice of accomodation. Which is why your accomodation must be the attraction, the ultimate destination. Change perspectives, offer pure fascination rather than mere functionality. With OASE you can create places where the thought of checking out is easily brushed aside.

From an aquarium to design objects, from small water features to monumentally big fountain installations: OASE will accompany you through the journey of designing, planning and implementing. At your side, a regional, highly qualified trade partner. Look forward to timeless and unique design, precise system solutions and experienced and reliable partners. Highlight your accomodation perfectly with individual water features!

Acting out of conviction

With over half a century of tradition, Fountain Technology is deeply rooted in OASE. Our urge for innovation is strong, we strive for aesthetic and technical perfection. Which is why we meticulously research and develop at our headquarters in Hörstel.

Fountain installations powered by OASE inspire the masses, are major attractions and spark the imagination. Our installations “Made in Germany” are also a source of great pleasure for owners. We actively provide our support and expertise via our partner network and are glad to give advice and assistance. Thanks to our extensive project experience, we can master any challenge – regardless of location, whether fresh or marine water. Maintenance and installation of the system components are extremely easy and convenient.

Projects in more than 100 countries

Strong long-term partnerships and cooperations with local partners and their customers ensure full support over the complete life cycle of each fountain – from the conceptual design to after sales service. In collaboration with our partners, we turn spectacular ideas into reality.

High quality – made in Germany

Excellently engineered and exclusively designed for easy handling and maintenance, our products are renowned for their reliability.

5

Business areas

Water is the main element of our five business areas. Fountains & Lakes are classified as commercial areas, whereas Water & Garden, Drainage & Irrigation, Indoor Aquatics and biOrb are consumer areas.

750+

OASE team

With a team of 750+ employees in 15 different countries, OASE is dedicated to combining technological excellence with superior service.

OASE partners

We have a wide network of partners around the world. All our partners are trained regularly and are categorized into three different levels – OASE Authorized partner, OASE Competence partner and OASE Premium partner.

1949

Founded in 1949 as a repair workshop for agricultural machinery, OASE developed its first fountain pumps in the 1960s. Today OASE is considered as one of the most innovative companies in their business fields.

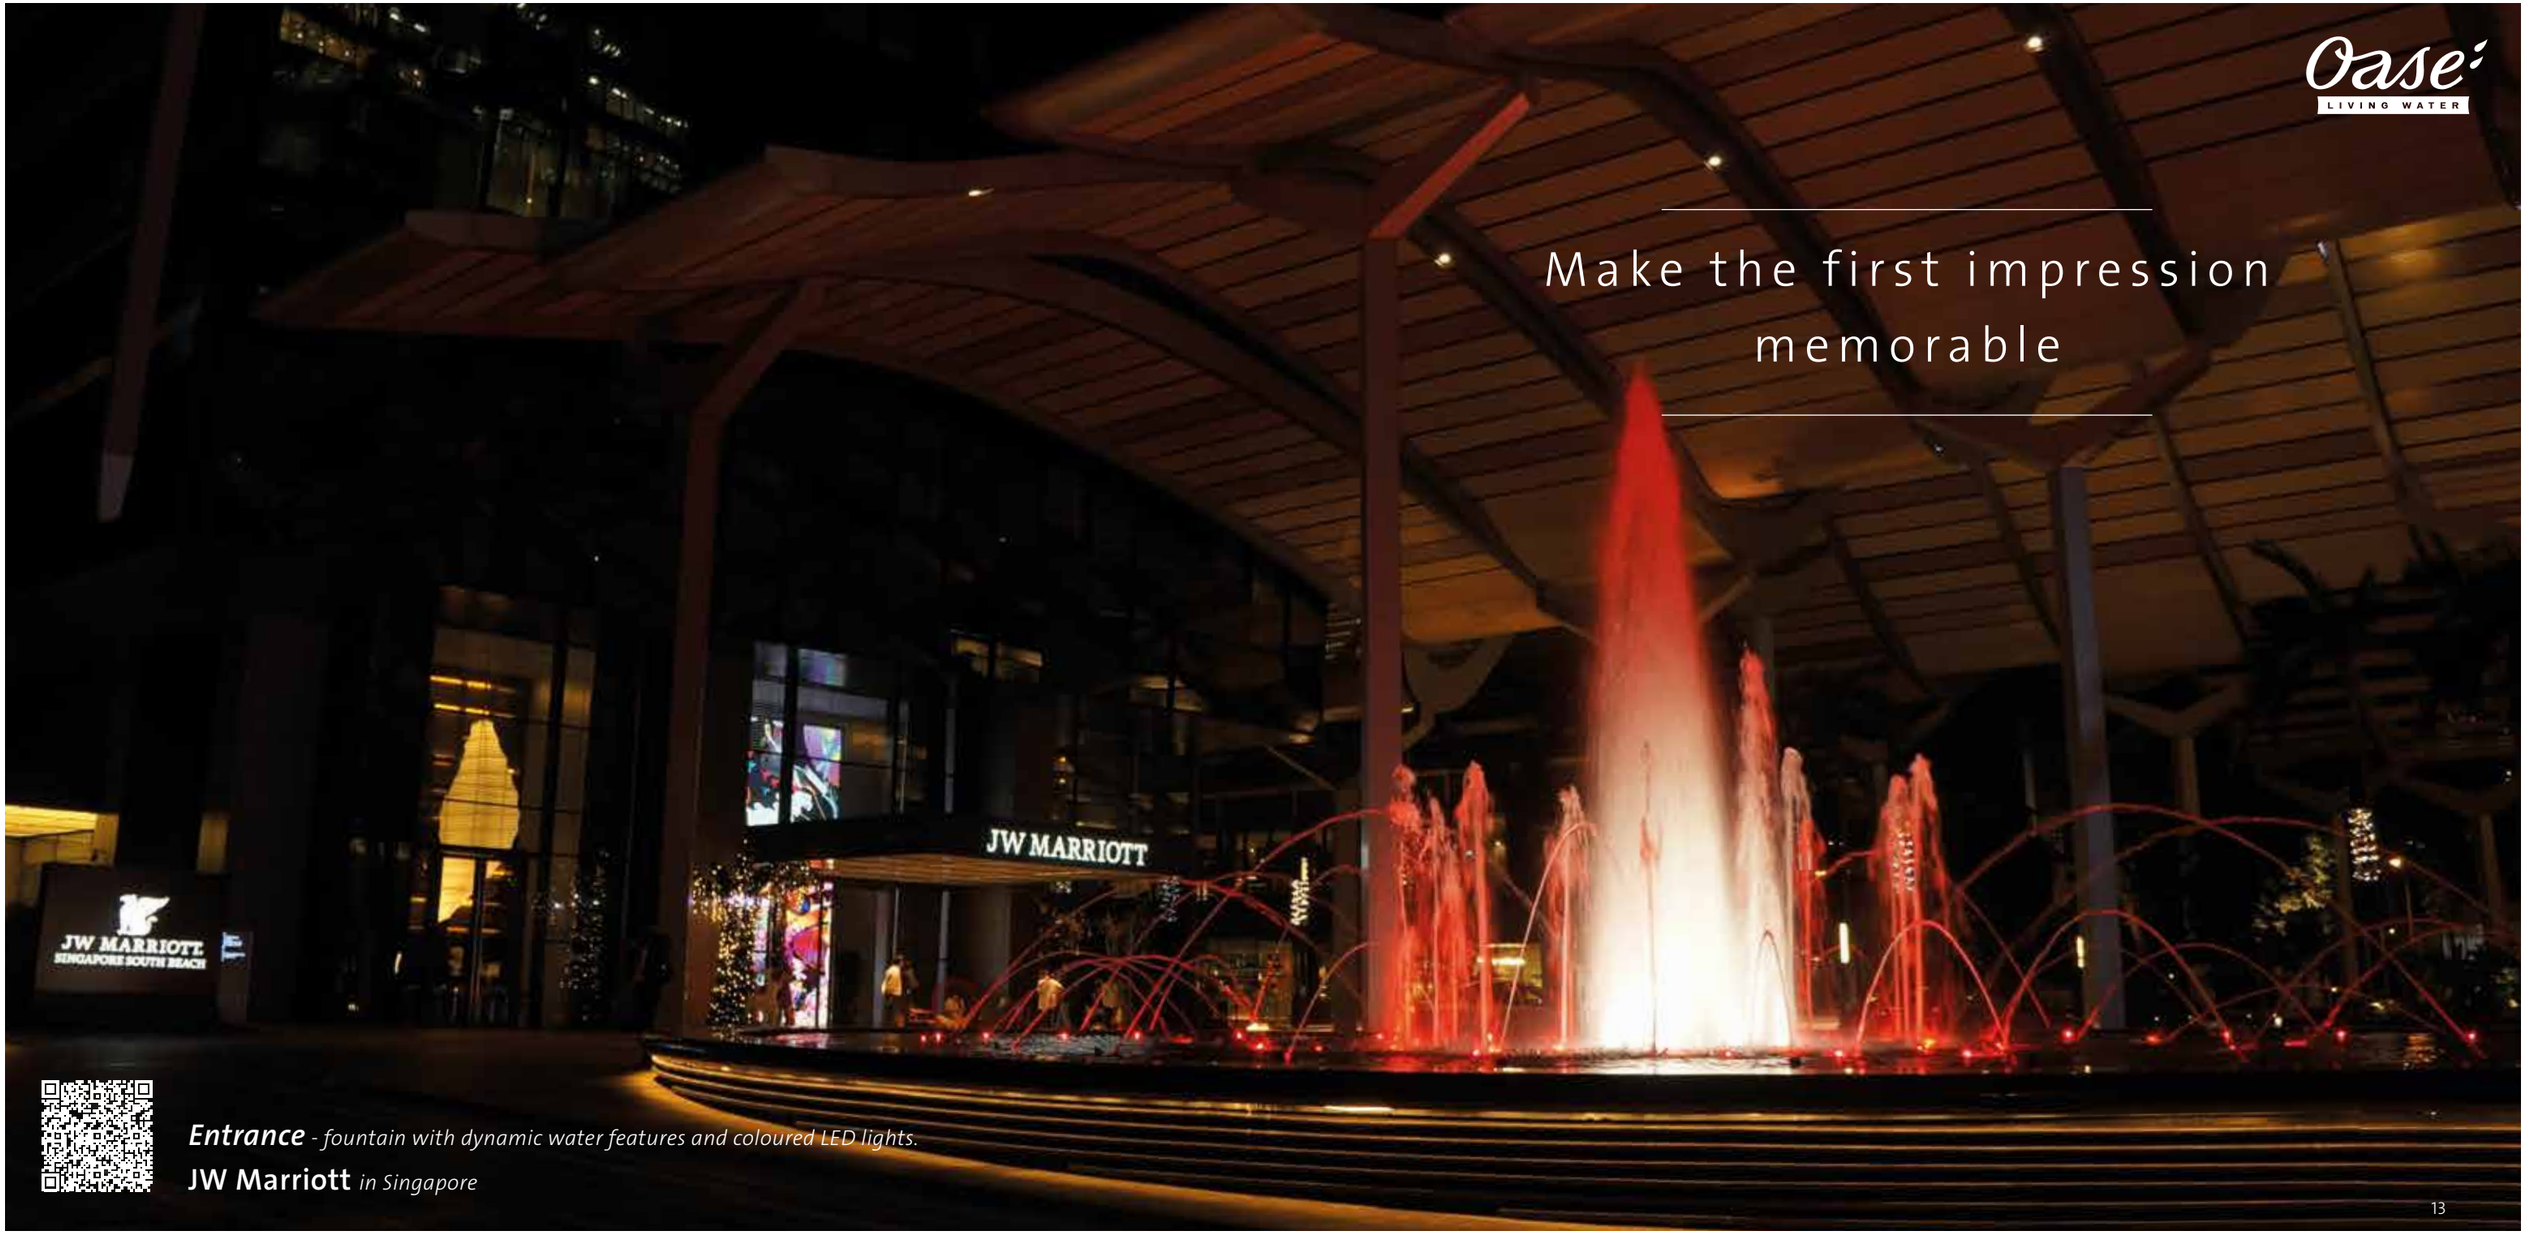

Hospitality

Welcome to the world of water entertainment!
The unique, unforgettable moments in life are the one's that stay in mind. Whether breathtaking or soothing – spectacular water features and home accessories inspired by nature are always an eye-catcher. We invite you to discover the fascinating world of OASE.

Entertainment *- marine water fountain on a floating platform.*
Smart City Lagoon *in Ricasoli/Malta*

Entertainment *- Water screens for projections.*
Multimedia Fountain Park *in Warsaw/Poland*

Fire & water

We take a holistic approach to Fountain Technology – fascinating installations not only include highlights like breathtaking water features, but also play with the senses and elements to provide an exhilarating experience. The use of light and the choice of atmospheric music are essential for the dramatic composition. OASE creates completely new effects for spectacular shows by playing with contrasting elements – the sight of flames dancing on the top of water fountains against a clear night sky creates an unforgettable moment.

Entertainment *- fire on the water. With BigFlameAqua.*
Water Garden *in Istanbul/Turkey*
