Strategic Safety, Inc. also provides loss prevention and risk control services to the insurance industry. Please visit our website at [www.strategicsafety.net](http://www.strategicsafety.net) for more information.

### HERE IS WHAT OUR CUSTOMERS ARE SAYING:

**“SSI has been working with the County since 1998 consulting on all matters of safety including: Training, Compliance and Audits. We’ve been extremely happy with SSI and the quality of their work.”**

Judy Kramer, Risk Manager  
 Washtenaw County

**“The Loss Control services we have received over the past 12 years have been of tremendous value to our overall approach to Risk Management; and I plan on using Strategic Safety to handle my Loss Control for the next 12 years and beyond.”**

David Otto, President  
 Administrative Employer Services (AES)

### SAFETY AND RISK CONTROL RELATED SERVICES

To better serve our customers' safety, health and risk control needs, we've partnered with other experts in the industry to bring a wide array of S.H.E. services including:

#### SAFETY VIDEO PRODUCTION

Many companies successfully use video as part of training and orientation efforts. We believe using company and facility specific safety video dramatically improves interest and retention. Employees see their facility and operation, making the experience more personal and increasing training effectiveness.

#### SAFETY HANDBOOKS

We've blended the safety and creative skill sets to bring our customers technically correct and visually attractive handbooks. Using customer specific photographs and information we can create something new or improve on an existing handbook.

#### SURVEILLANCE SYSTEMS

Would you like to see your facility on your cell phone or remote computer? We can install state of the art surveillance systems so you can monitor operations/facilities from anywhere in the world. Benefits include helping with training and accident investigation, as well as helping defend fraudulent workers' compensation and liability claims.

#### DATA BACK UP AND DISASTER RECOVERY SOLUTIONS

More than just copying data files, a properly structured "back up and disaster recovery program" can keep your organization running following a storm, electrical surge, fire or other emergency, saving substantial amounts of money, time and anxiety. Failing to properly and fully back up critical data can be costly, sometimes fatal to an organization. Our professionals can review your existing backup and recovery processes or help create a new process if necessary.
