

## UNI-LOCK

### THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- G 10kg (Gas Nail / Screw)
- S 35kg (Screw Only)

The system consists of wire and zip-clip with a right angle bracket termination.

### THE APPLICATIONS

Suitable for:

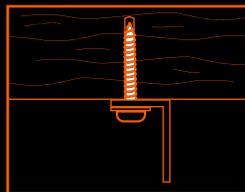

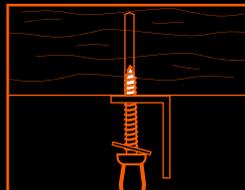

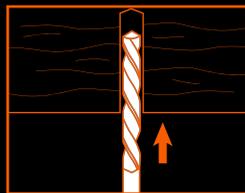

- Concrete Slab
- Metal decking and other steel structures
- Wooden structures

### THE TECHNICAL INFORMATION

- Key free release system
- Suitable for both plug and screw and shot fire applications
- Tear drop shape allows for wire to rotate through 180° in the bracket for angled applications
- Wire rotation reduces pressure on the nail when service is not directly below anchor point
- Trivalent zinc and clear galvanised
- High tensile galvanised wire 1960 N/mm<sup>2</sup> grade 7 x 7 construction
- BSEN 12385 Standard

### THE INSTALLATION

- For timber applications, pre-drill timber and use a screw to fix through the bracket
- For steel and concrete applications use self tapping fixing or a gas nailer with a suitable nail
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip allowing 15cm of wire protruding

## THE RANGE

The system consists of wire and zip-clip with a right angle bracket termination.
