GISC’s Mastering Executive Leadership program provides an opportunity for seasoned executives who are up to the challenge of creating a thriving future for themselves and their organizations. Based on real-time feedback and the results of a comprehensive 360 assessment, you will build a foundational deep understanding of your current leadership. With this newfound awareness, you will establish a personal development agenda and will be challenged and supported to hone your leadership capability.

With a cohort of like-minded senior leaders, you will engage in powerful learning experiences that will enable you to experiment with new concepts, tools and behaviors, and grow personally while expanding your capacity to lead effectively in an increasingly complex world. Extensive feedback from faculty, peers and others throughout the program will accelerate your development.

One-on-one executive coaching between sessions is an integral part of the program. Between-session coaching provides continued opportunity to reflect and make progress on your development agenda. Your coach will support and challenge you to apply learnings in your current leadership role.

Mastering Executive Leadership provides a rare opportunity to make rapid progress into breakthrough insights, new behavior, and greater levels of effectiveness.

Benefits
As a participant in this program you will:
• Deepen awareness of your strengths and development needs as a leader through real-time feedback and the results of a comprehensive 360 assessment
• Gain clarity of leadership purpose and the courage to authentically create the outcomes you want and your organization needs
• Identify the vital few developmental opportunities that will advance your leadership and create a plan to make it happen
• Learn and practice new skills and behaviors to accelerate your ability to lead effectively in an increasingly complex world
• Learn and practice skills that will enable your team to perform at its best
• Develop a cadre of trusted peers to serve as a support system and resource throughout your career
