2018 Achievements

**Strategic Planning & Coalition Building**

- Hosted four meetings in four separate regions of King County with an average attendance of thirty-eight participants.
- Enhanced membership by recruiting five new members and seven new alternates to the Coalition.
- Distributed a monthly Coalition newsletter to over 350 contacts.
- Hosted six meetings each for our two Committees: (1) Access to Healthcare and (2) Access to Work and School, with an average attendance of 17 and 9 members, respectively.
- With support from the Access to Healthcare Committee, we successfully received a national grant to initiate an inclusive planning process to evaluate how older adults, people with disabilities, and caregivers find and secure transportation. The grant resulted in over 400 survey responses, two Mobility for All Summits, with over 130 attendees, and three listening sessions. Action items will begin implementation in 2019.
- With the support from the KCMC Communications Task Force, we will launch our new Coalition website, www.kcmobility.org.
- Continued to support the newly formed Snoqualmie Valley Transportation Coalition, which launched a new Duvall-Monroe Pilot Shuttle, initiated a communications campaign, and will be undertaking a five-year transit plan for the Valley.
- Supported the Regional Alliance for Resilient and Equitable Transportation (RARET) Workgroup and its workshops/trainings to support transportation for vulnerable populations in an emergency.
- Hosted two information and brainstorming sessions for the WSDOT Consolidated Grant program, with over 20 people in attendance.
- Staci Haber, Sr. Manager, served on the Seattle/King County Age-Friendly Coalition, Northwest Universal Design Council, Transportation Demand Management Steering Committee, and Imagine Downtown Advisory Group on behalf of the KCMC.

**Coordinating Services**

- Issued a Request for Information to transportation software companies to explore the available community transportation scheduling and program management software on the market. 13 companies responded; a full consumer report will be issued in early 2019.
- In partnership with Coalition members, applied for a $750,000 federal grant to develop a coordinated web-based system to improve the user experience in finding and securing special needs transportation services, including point-to-point multimodal trip planning and direct ride requests, allowing riders and
their assistors to optimize choices and interface directly with transportation providers for services. The improved site would serve as a single point of contact for clients to find and request transportation assistance.

- Continued the partnership with the Seattle Stand Down, King County Metro, and Sound Transit to offer “free fare days” during the two days of the Stand Down, a community resource event for hundreds of Veterans experiencing homelessness.

**Community Outreach**

- Staci Haber, Mobility Manager, presented on behalf of the KCMC at the King County Sustainable Cities Roundtable and the CTANW Community & Specialized Transportation Summit.
- Under the Education and Outreach Committee, organized monthly Community Transportation Field Trips for stakeholders to learn about local services. There were over 70 unique attendees served. Developed summary sheets for twelve transportation providers.
- Distributed the King County Accessible Travel Map in English and Spanish.

**Local, Regional & Statewide Planning**

- Participated in the regional Special Needs Transportation Committee WSDOT Human Services Transportation Plan Advisory Committee.
- Provided feedback on the Puget Sound Regional Council’s Coordinated Public Transit Human Services Plan.
- Disseminated information on transportation service modifications, including King County Metro’s Northeast Mobility project and the SR 99 Viaduct closure.
- Successfully applied to host a UW Evans School Capstone Team, to undertake the Coalition’s Needs Assessment in 2019.
- As part of the Access to Work and School Committee, finalized the King County Fare Structure Needs Assessment.
