

## **Fanvil Release Newly H-Series Hotel Phone**

Fanvil Technology, a professional provider of IP communication solutions, today announced its new H-Series hotel telephone with an elegant appearance and friendly software suite for the hotel market.

### **Shenzhen, China, November 3, 2016**

The H-Series is Fanvil's newest series of phones designed for hotels. Its stylish, contemporary appearance, excellent voice quality and powerful functionality, along with matching integrated communications platforms can replace traditional phones and can become a new generation of intelligent terminal equipment. The H-Series hotel IP phone will look great in most hotel rooms and will support most application requirements. In addition, it has excellent call quality.

Fanvil has three H-Series models: The H2, H3 and H5. The H2 is specially designed for hotel bathrooms, business halls or other service-related locations. It is easy to operate and is wall-mountable. The H3 & H5 are designed for the hotel room. The H5 is the high-end version of the H3 and has a 3.5' color display screen, which could provide a great customized experience for the hotel user.

The H3 & H5 accomplished powerful telephony features by combining the communications platform and features such as call transfer, hotline, voice mail, call hold and more. The H3 & H5 IP phones support 6 programmable keys. They can be defined according to the hotel's needs. For example, they could be programmed with an equipment service hotline (housekeeping, ticketing, switchboard, food and beverage, etc.) or hotel special features (alarm clock, voice mail, etc.). In addition, it has a USB port to charge your mobile phone.

### **Availability**

H2/H3/H5 now is in batch production and can make a reservation via Fanvil's worldwide distribution channels.
