

*What Our Clients Are
Saying About
Clay Packing Therapy*

"I fell on my knee and the pain was constant. When I came in for my clay packing, I was in excruciating pain. The next day, there was no pain at all. I played tennis!"

"I developed many chronic injuries, and it got to the point where I could no longer snowboard without pain. Clay packing got rid of my turf toe, it helped with my quad and tricep injuries, and a host of other problems that have improved significantly. Now I'm enjoying snowboarding as much as ever."

"I heard about clay packing, and was skeptical until I tried it. I was very surprised at how well it works! I had blurriness in my eyes, so I had clay packing for that, and my eyes got clearer, my vision got stronger... It's a very good thing."

"When I got my first clay packing, I got instant relief. My shoulders just stopped hurting, and I was thrilled beyond belief. I also use it for digestion, and I feel so much better."

"What has worked the best for me, out of all the treatments I've tried, was the clay pack. I felt like a veil had lifted from my head. I had this burst of energy... I didn't even realize how bad it had been until the clay pack, and then I felt so good! I wanted to take it home with me."

Your clay packing experience at The Khader Center will be easy, relaxing, and best of all, it will make a huge difference in the way you feel, the way you think, and the way you live. Whether you need to address a specific issue or are just looking for improved wellness, you will be amazed at how effective clay packing really is. Don't miss out on one more day of feeling your best!

The Incredible Healing Power of Volcanic Clay

*Therapeutic Clay Packing
for Whole Body Detox*

at
The Khader Center

Clay therapy is a time-honored tradition that crosses eras and cultures. In Egypt, pharaohs used clay for its anti-inflammatory properties. Ancient Greek and Roman athletes used clay packing to restore damaged tissue from injuries and traumas. The Japanese have traditionally used clay as a detoxifying agent. Native Americans used clay poultices to treat infections and injuries. The reason for the widespread use of clay for healing is quite simple: It's *very* effective!

The benefits of clay packing include (but are by no means limited to):

- Improved Blood Circulation
- Release of Muscle Tension
- Balance of the Immune System
- Cell Rejuvenation, Anti-Aging, and Healthy Aging
- Whole Body Cleansing and Detox

Why is clay packing so effective?

Clay packing rapidly clears out toxic heavy metals, pesticides, chemicals, bacteria, and viruses that burden the entire body. These toxins cause fatigue, headaches, weight gain, malaise, insomnia, pain, auto-immune diseases, osteoporosis, heart disease, cancer, diabetes, and more. Once these toxins are removed, the body is finally able to heal itself properly.

Why do I need clay packing?

While the advancements of technology and modern living offer convenience and abundance, it all comes at a price. We are surrounded by toxins, pollutants, and synthetic chemicals. We carry electronic devices that emit constant electromagnetic radiation. Our food contains fewer nutrients, our water is treated, and the air we breathe is filled with toxins. Is it any wonder our bodies become overburdened and unable to fully detoxify?

The problem is further complicated by the natural traumas and injuries that occur over the course of our lives. Almost everyone has an injury from the past that leaves a permanent reminder: a scar that never fully heals, a lingering throb, or an ache that comes and goes with the weather. The truth is that all traumas and injuries leave lasting internal scars created by toxins in scar tissue; some are just more noticeable than others.

Our bodies are finely-tuned machines, and these toxic blockages impede the way energy flows through the body, creating rippling effects that can spread to nearby tissues and organs. As we get older, these problems pile up and lead to aging and disease. That is, unless we clear the toxins and, in the process, relieve the blockages causing health issues.

Examples of Toxic Blockages Relieved via Clay Packing

The following diagrams depict the original traumatic blockages and the resulting radiating symptoms in actual clients. All found relief through a regimen of clay packing.

C-Section scar (from surgery 55 years previous) is blocking 8 different energy meridians, reflexing downwards to cause stiff, swollen legs, intractable to conventional therapy.

Weak area from fall on hip (15 years previous) is reflexing to abdominal area creating excess abdominal weight.

Weak neck area from car accident (5 years previous) is reflexing to liver area, triggering allergic reactions.

Multiple previous procaine injection sites in navel area reflexing to stomach and head areas, causing poor digestion and chronic headaches.
