

bathrooms to love

THE COMPLETE COLLECTION

Fall in love with our contemporary and classic collections and create the bathroom you always wanted

brought to you exclusively by our Bathroom Specialists

Browse over 280 pages of stunning bathroom inspiration and allow yourself to be seduced by style, tempted by choice and inspired by innovation.

From classic sophistication to cool contemporary design, our range has been curated by our bathroom specialists with over 40 years' experience of sourcing the best products from around the world.

Bathrooms

to fall in love with...

Innovation

We have many products that are 'on-trend' and fashionable as well as being fully functional and durable. From soft closing shower doors to the latest rimless design toilets which offer a number of advantages – not least that there is nowhere for germs to hide and that the flushing system clears away residue and so with no rim they are easier to clean.

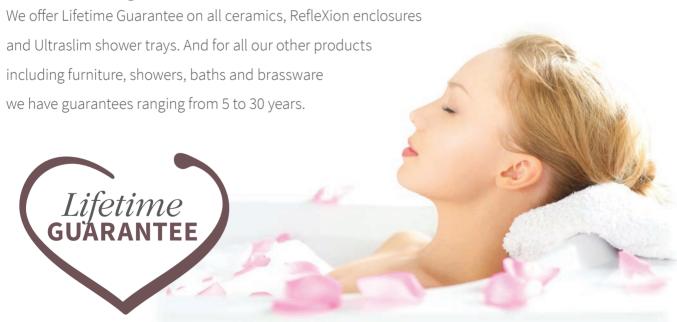

New Introductions

With the pace of change being so rapid we have a continuous supply of new products, we've added over 100 new products... browse through our brochure and see where we have highlighted our NEW products for you.

Your perfect suite is here, but which one will you fall for?

We've divided the collection into Contemporary and Classic designs, but browse a while before you decide, and think about how different bath and shower, furniture and tap options can transform the look. Above all, choose with complete confidence. Every suite is covered by our Lifetime Guarantee.

Close Coupled WC

A close coupled WC has the cistern resting directly on top of the pan towards the rear. Closed coupled toilets are traditionally the most popular WC in the UK.

Soft Close Seat

Ouiet and controlled closure of the seat and lid. Many of our suites come with a soft close seat as standard, look at following pages for options.

Wall Mounted WC

The back of the pan sits flush to either the wall or furniture and is used with a concealed cistern which is out of sight either behind a stud wall or furniture. This WC is a popular choice when wanting to achieve a minimalist look as all pipework is concealed.

Unlike close coupled or back to wall WCs. a

wall mounted WC does not sit on the floor;

it is suspended from the wall and must be

used in conjunction with a wall mounting

frame system. Not only does this WC help create a minimalist look, it also has the practical benefit of being very easy to clean.

Space Saving

Look out for the space saving logo, it indicates that the product is perfect for rooms with little space available.

Full Pedestal

A full pedestal supports the weight of the basin and goes down to the floor. It is ideal for concealing pipework and is the most popular pedestal used in our homes.

Semi Pedestal

A semi pedestal sits under the basin and creates a minimalist look by opening up the floor space.

Rimless WC

Dual Flush WC

It can be hard to clean under the rim of a standard toilet, rimless designs ensure the interior of the bowl is flushed to help create an enhanced, hygenic bathroom.

All of our cisterns come with dual flush fittings offering a 6 or 4 litre flush at the

use even less water, providing a 4 or 2.6

litre flush helping reduce water usage to

protect the environment.

push of a button, whilst some of our toilets

Semi Recessed Basin

Designed to be partially cut into a work surface or furniture. The front of the basin protrudes out of the furniture, only the back half of the basin is recessed.

Countertop/Vessel Wash Bowl

Designed to sit on top of a work surface or furniture.

Comfort Pans

Taller 450 / 460mm high pans for added comfort.

WRAS Approved Product

All of our cistern fittings are WRAS approved ensuring they comply with the latest water standards.

Rosewood

The fashionable square bathroom design looks stunning in any bathroom. Rosewood opens up new possibilities for your own personal bathroom design.

£470

Price is based on close coupled WC and basin with full pedestal.

Get the look

Rosewood basin with full pedestal, close coupled WC with soft close seat, Finissimo basin mixer, Sloane freestanding bath and Ricco floorstanding bath shower mixer.

Rosewood

With elegant simplicity and a modern square look with supreme quality, this suite offers a practical mix of design and function.

Citronella Rimless

Rimless the height of cleanliness

It can be hard to clean under the rim of a standard toilet, our rimless design ensures the interior of the bowl is flushed to help create an enhanced, hygienic bathroom.

Our Citronella rimless toilets are not only attractive in a timeless design, they are also taller for added comfort, great for taller or less abled users, perfect for the elderly or those looking for a much more comfortable seating position. And with a dual flush water-saving of only 3 and 4½ litres they are both money saving and help make a difference to the environment too!

Sandalwood

The elegance of Sandalwood is designed for individuality. It's beautifully crafted with thin profiles, for a real style statement.

£440

Price is based on close coupled WC and basin with full pedestal.

Get the look

Sandalwood basin with full pedestal, close coupled WC with soft close seat, Venetian freestanding bath, Porta basin mixer, Primo floor standing bath shower mixer and Nova LED mirrored cabinet.

Sandalwood

The stunning thin edge basin of Sandalwood has the presence to become the centre piece of any bathroom.

MOOds. THE CERAMIC COLLECTION

Freestanding or fitted? Our furniture can bring a whole new dimension to your bathroom, tucking pipes away neatly and providing essential storage.

Choose the warmth of wood, the traditional appeal of tongue and groove panelling, subtle vinyl finishes or sleek high gloss units with stylish or integrated handles. Everything is craftsman built and made to survive for years in the hardest working bathroom. We know things can get steamy in there!

Freestanding / Modular Furniture

Freestanding / modular furniture is a range of single units that can be floor standing or wall mounted depending on the range. A fusion of the latest design trends across Europe, our range of wall mounted and floor standing furniture with co-ordinating storage units have been designed to enhance the overall look of your bathroom.

Carino - modular J profile cabinet

Simplistic gloss modular furniture, 18mm durable cabinets supplied fully assembled and available in 3 colours.

Bello - modular

Modular designer furniture, 18mm durable cabinets available in 14 door choices on 4 cabinet options.

Fitted Furniture

Fitted together to create a streamline look, a great way to hide unsightly pipes creating a spacious and tidy feel. This range is fully flexible in sizing with options of wall mounted, floorstanding on designer legs or co-ordinating plinths

Fresco - fitted

Fitted furniture, 18mm durable cabinets available in 14 door choices on 3 cabinet options.

Fresco Space Saving - fitted

A fitted furniture range which includes space saving solutions for reducing the depth of the units, ideal for smaller spaces.

Available in 14 door choices on 3 cabinet options.

Best of Both Worlds - Vista Furniture

A range of units that are freestanding and can also be joined together to give the fitted look. Keeping your bathroom clutter free couldn't be easier with these modern storage solutions.

Modern furniture, 15mm cabinets, fully assembled units available in 3 colour options.

Carino

This designer modular furniture available in 3 colours, allows you to create your own unique look, by choosing different units and placing them in a 'step style' you can have a bathroom as individual as you are.

Our Carino range features 18mm durable J profile cabinets, including back panel, and soft close drawers and hinges. Full gloss ensures a stunning smooth finish, while a fully glued and doweled construction ensures strength and reliability.

Carino features

To achieve a true handless look the sleek aluminium 'J' shaped rail is routed to the cabinatry creating an ultra modern look

Complete units available in:

Fresco Space saving - slim

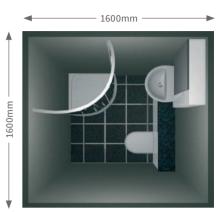

SPACE SAVER SLIM UNITS (BASE - 218mm DEEP, WALL 168mm DEEP) INCLUDES NOMINAL 18MM DOOR

The Fresco fitted furniture range includes space saving solutions, ideal for smaller spaces without compromising on storage and style. This space saving furniture can transform a cluttered room into a spacious and stylish bathroom with vital extra storage that every household needs.

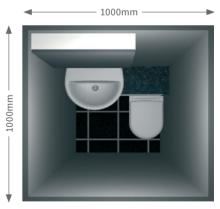

Available in fourteen colours, we have shown rooms in gloss white to make the area look and feel larger. Rooms will look bigger if well lit either by natural light or artificial light.

En-suite 1600 x 1600mm

Cloakroom 1000 x 1000mm

Fresco space saving slim units includes nominal 18mm door

Our Fresco range features 18mm rigid durable cabinets with German engineered soft close doors and drawer boxes. Choose from fourteen door options and three cabinet colours.

Our love for baths runs deep. The bath collection has a wide choice of baths, available all in one place making the right choice of bath for your bathroom simple and uncomplicated.

Freestanding Baths

When you want to make a bold style statement then look no further than our range of Freestanding Baths. Our carefully selected range of hand crafted baths will add a unique design dimension to your bathroom.

Shower Baths

Get the best of both worlds with a bath that gives you both a bathing area and a shower area in little more than the space of a standard bath.

.....

Single End Baths

Single end baths are traditionally the most popular bath in the UK which can be accommodated in most bathrooms.

Double End Baths

Twin ended baths have the taps on the side so you can bathe at either end. They are also usually larger than regular baths.

Corner Baths

Fits snugly into the corner of your bathroom, giving you more space to utilise.

Whirlpool Baths

For the ultimate bathing experience, look no further than our Wellness systems. With six choices of systems, you can help create that spa feeling bath time will never be the same again.

All of our Wellness systems are hand fitted by a team of highly skilled professionals and are fully tested to the highest standards to ensure that your spa experience will last for years to come

Supercast Baths

Our Supercast® baths have characteristics of strength and rigidity normally found in baths made of cast iron or heavy gauge steel. As they are acrylic, they are warm to the touch and can be moulded to beautiful designs, the added 'flow coat jacket' provides insulating properties that keeps your bath water hotter for longer.

Space Saving

Look out for the space saving logo, it indicates that the product is perfect for rooms with little space available.

Freestanding baths

The Moods collection of Freestanding Baths offers a wealth of styles and sizes to choose from. Whether your taste is traditional or more modern, we have the Freestanding Bath to create something a little more special enabling you to create the bathroom of your dreams.

Escape, indulge and relax with wellness

Why Wellness?

Why not? Wellness Bathing Systems turn your boring bathroom into a sensual spa. An ideal way to relax after a busy day, before a party or just to escape when the kids are in bed - Wellness Bathing Systems allow you to indulge in a luxury experience without even leaving the house. And they're packed with health benefits too, so you can splash out on the system of your choice without feeling guilty. Which is perfect. With a dedicated aftercare service this ensures to give you total peace of mind.

And... It's good for you!

Wellness Systems make you feel good from the inside out. In fact, taking some time to kick back in a bath fitted with a Wellness system could help reduce the effects of stress, counteract tension, improve circulation and reduce the heart rate. It also helps remove toxins, cleanses and tones the skin, and relieves tired, aching muscles. Take it from us, once you've tried Wellness, you'll never go back!

Scan the OR code with your smart phone to find out more

Wellness systems

WELLNESS 6 JET WHIRLPOOL SYSTEM

Look out for this symbol against the baths on the following pages. It denotes that the Airspa system with lights is available.

> Air bubbles are released into the water producing a gentle, calming, massaging fizz.

WELLNESS CHROMATHERAPY SYSTEM

ADD

£1,550

The chromatherapy system we offer comes with 7 colours: white, blue, red, light blue, yellow, green and purple. They can be set at a constant colour to match your mood or set to run through a carefully pre-selected sequence for emotional balance.

The Chromatherapy whirlpool system includes 21 chrome fixed and directional jets:

- 8 base jets
- 5 whirlpool side jets
- 6 back jets
- 2 reflexology foot jets
- Includes pre-fitted waste and overflow

A directional flow valve allows you to isolate various jets to help relaxation and focus in on certain problematic areas of the body.

1.5hp pump with a flow rate 305 litres per minute.

This system cannot be used on baths with wood panels.

Look out for this symbol against the baths on the following pages. It denotes that the Whirlpool Chromatherapy System is available.

WELLNESS SOUND SYSTEM - BLUE WAVE

£460

Enjoy your favourite music with this ingenious, simple to use sound system. Self fit on its own or together with one of our wellness systems, this will work with any other device that supports bluetooth A2DP. Can be fitted to any new or any bath in situ.

Look out for this symbol against the baths on the following pages. It denotes that the Whirlpool Sound System is available.

WELLNESS CARE

DIBA0024

Used monthly, this will ensure that your system remains free from soap, shampoo, bath oil, hair, fats and limescale. It will help prevent the growth of bacteria and unpleasent odours from your bath.

What is Supercast®? Strength and beauty combined

Supercast® is a substantial reinforcement process for an acrylic bath. This reinforcement process results in each bath being incredibly strong and hard-wearing. This gives you the reminiscent assurance of an old cast iron bath with the natural warmth and quality acrylic has.

Acrylic's unique properties make it ideal for manufacturing baths. Acrylic allows itself to be moulded into many shapes giving many possibilities for varied designs, an attribute that enables baths to be manufactured with design and function working in harmony. The natural gloss is cast all the way through the acrylic resulting in a product that is smooth and ever so easy to clean.

jacket to the entire underside of the bath adds strength and insulating properties. This keeps your bath water hotter for longer!

Features:

- Intensive reinforced finish to underside of acrylic bath
- Results in a strong, hard-wearing bath, with increased insulation
- Supercast® baths have associated strength of an old cast iron bath but with the benefits of modern material

700mm end panel	DIBP0138	£66
750mm end panel	DIBP0140	£72

Super Strength panels are the ultimate upgrade to any bath to enhance their rigidity and strength. They have been designed to complement our Supercast baths, see page 145. See pages 256 for more panels.

Shower enclosures are fast becoming the must have fixture in any modern bathroom and have evolved over recent years to offer a large array of installation options. Our designers have searched the world to bring you a range of enclosures that will surely meet your aspirations, from the luxury of designer chic to the clean and simple, all meeting the demands of modern life.

Pivot Door

A pivot door swings outwards from the frame. As the door opens into the room, be aware of the surrounding area which will need to be clear of obstructions.

Bifold/Inslide Door

Offering the perfect solution when space is limited these doors cleverly open inwards creating more usable space outside the enclosure for the rest of your bathroom suite.

Sliding Door

A popular choice for larger bathrooms, with sizes typically starting from 1200mm wide, although smaller sizes are available within our range.

A fully contained enclosure with everything included, creates less chance of leaks and eliminates the need for tiling and channeling of walls for pipes. An all in one, easy fit solution.

Wetroom Solutions

The majority of enclosures are wetroom compatible, simply fit your enclosure to a pre-prepared floor without the need for a tray. Showerwall / wetroom glass panels are the ultimate in wetroom styling.

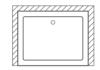

Bath Screens

Struggling to fit a shower enclosure into a small bathroom? Our great space saving solutions mean you can still have both, without compromising on style. Simply choose any of our stunning bath screens to create a shower and a bath in one.

Quadrant Enclosure

The Quadrant Enclosure is the best selling style in the UK. Providing plenty of showering area without being too imposing, the quadrant sits neatly in the corner of the room, with the option of sliding or pivot doors.

Recess Solution

The door is installed between 3 existing walls (alcove). When choosing your door, ensure that it is suitable and wide enough to fit in the recess.

Corner Solution

The preferred method in the majority of UK bathrooms. There are two solutions for this type of installation; with the addition of a side panel, the vast majority of doors can be made suitable for a corner solution whilst a Quadrant Enclosure is purposely designed to fit neatly into the corner of the room.

Key features

Other key features to look out for when choosing your ideal shower enclosure are listed below, look out for these symbols in the coming pages:

Enclosure height

Measured excluding the tray.

Toughened safety glass

Shows the thickness of glass in the enclosure door.
(See toughened safety glass features.)

Profile finish

PIVOT

Pivot door opening

Opens outwards, wider access.

Fold door opening

Opens inwards, space saving.

Slide door opening

Sliding door, space saving.

Hinge door opening

Opens outwards, wider access.

Cushioned magnetic seals

Soft close and strong seal.

Totally hidden fixings

Concealed fixings

With cover caps.

Quick release rollers

For ease of cleaning and fitting.

Power shower compatible

Tried and tested.

Wetroom compatible

Install directly onto pre-prepared floor or on a tray.

Adjustment for out of true walls

Makes installation easier.

Easy Clean Glass Treatment

Makes cleaning easy.

Mershield glass treatment

Makes cleaning easy.

Suitable for corner application

Add a side panel if required.

Suitable for recess application

Door only, fitted between walls.

Quadrant Radius

CE Approved

Tested to the latest European standard, EN14428.

Toughened safety glass features:

Toughened safety glass is glass that has been modified by thermal treatment to give:

- Strength and flexibility in accordance with BS EN 12150
- Safety up to BS EN 12600 Class 1
- Improved resistance to heat
- High strength to weight ratio
- Light transmission equal to ordinary glass
- Safer to handle

If toughened glass breaks, it shatters into relatively harmless small granules. The combination of performance characteristics listed above makes toughened safety the ideal material for bath screens and shower enclosures.

All thicknesses of toughened safety glass meet these criteria, which leaves the main variation between the different glass thicknesses being the weight, rather than the safety or performance of the glass.

How it works

Showerwall

As you can see from the diagrams above there are many combinations that can be made.

Showerwall with Swivel

If you wanted to make up a walk-in wetroom for an area to fit on to a 1200 x 800mm tray or floor. You pick a 700mm and a 800mm panel, which also includes the recommended 500mm minimum opening for the walk-in. So in order to build up your own ideal wetroom area just choose the panel sizes from the table below.

Size	Price	Adjustment min + max	Code
700mm	£305	675 - 690	DIEW7002
800mm	£305	775 - 790	DIEW8006
900mm	£305	875 - 890	DIEW9006
1000mm	£330	975 - 990	DIEW1008
1100mm	£355	1075 - 1090	DIEW1104
1200mm	£355	1175 - 1190	DIEW1208
1400mm	£415	1375 - 1390	DIEW1404
300mm Swivel Panel	£175	n/a	DIEW3004
300mm Cube Panel	£155	n/a	DIEW3006
*Vertical Pole	£155	n/a	DIEX0016

Features

Cube

Suitable for both wetroom floors and on shower trays

Comes with 1 metre stabilising bar which can be cut to fit your space

WETROOMS MERLYN SHOWERING

Showerwall.

Cube with fixed return panel.

Walk-in with Swivel Panel.

Showerwall with Swivel Panel.

Walk-in.

Showerwall with Vertical Pole.

Enclosures

A premium shower enclosure range offering style, sophistication and durability with 10mm toughened safety glass at 2000mm high.

Mershield Protective Coatings

Mershield is a hydrophobic coating for glass and glass like surfaces. The Mershield coating repels water, preventing the build up of limescale and soap deposits and so makes the shower glass 'Easy to Clean'. Available on Vivid Glisten, Sublime and Boost enclosure, wetrooms and bath screens as specified.

- Designed for use on straight baths
- Handle doubles up as a practical towel rail

Shower tray style is a key element to the overall look of your shower enclosure and increasingly becoming a fashionable feature within the bathroom. However, sometimes the floor type will dictate the type of shower tray that is required (you will need to check this with your installer) and that's why we offer a range of shower tray's suitable for all installations.

Another consideration when choosing your shower tray is to ensure that it is the right size and shape for your shower enclosure. With our vast array of shower tray footprints, we are confident we have all bases covered at a price that is right for you. Below is a quick reference guide to help you choose the right one.

Ultraslim

With a height of just 25mm, the ultraslim tray is designed to be fitted flush at floor tile level for an ultra-stylish, minimal wetroom look. Virtual flat surface technology gives the impression of a flat surface, but one that drains at over 30 litres a minute, thanks to a hidden vortex waste unit.

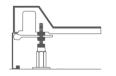

Slimline

Elegantly shallow 45mm high creates a wet room styling with the benefit of retaining the water in the showering area. The discreet profile also makes this an easy access option because there is no real need to step up into the shower enclosure.

Standard

A simple elegant design at 80mm high, extremely durable to create a quality foundation to house the most stylish shower enclosures.

Raised

Adjustable legs are fitted to the underside of the tray to raise it off the floor so the waste does not need to be plumbed under floor level. A perfect solution if you have a concrete floor or you cannot gain access under the floor and provides quick and easy access to the waste during and after installation.

- Flush fitting with floor tile for level threshold entry
- Advanced design features incorporating hidden water capture and virtual flat surface technology
- · Dedicated high flow, self-cleaning vortex waste unit
- Unique 135 x 135mm stainless steel flush fitting waste grid
- · Simple and standard shower tray fitment
- Lifetime guarantee against manufacturing defects
- Suitable for wheelchair access

DIETP1422

Ultraslim trays

The 25mm high 100% natural stone gel coat finish tray offers an ultra stylish minimal wetroom look.

There's nothing quite like the feeling you get from having a shower.

Our range of Mixer, Electric and Power Showers offers you an outstanding choice of beautifully designed and superbly engineered styles to bring you all you need for a complete showering solution.

Integrated Shower Towers

A bath screen with integrated mixer shower all in one. This clever design is suitable for use with straight, P shape and L shape baths, they eliminate the need to fit a separate shower onto the wall providing an easy fit solution.

Mixer Showers

These connect to the hot and cold water supplies and then mix the water inside the shower to your selected temperature. Mixer showers normally deliver a higher flow rate than electric showers and are often thermostatic. Ideal for homes with readily available hot water. You can also add a pump if required to boost the flow from a gravity fed system.

Electric Showers

These connect to the cold water mains supply. A heating element inside the unit heats up the water as it passes through. It doesn't rely on stored water and provides instant hot water on demand.

Power Showers

These work in the same way as a mixer shower, they connect to the hot and cold water supplies and then mix the water inside the shower. They also have the added benefit of an integral pump to boost the flow rate giving a powerful flow.

TMV Thermostatic valves

TMV thermostatic mixing valves protect against scalding. The thermally sensitive mechanism within the valve mixes hot and cold water to a preset temperature. The mechanism automatically compensates for any variations in pressure or temperature to maintain a safe temperature.

Minimum Water Pressure

Minimum water pressures stated are to deliver 6 litres per minute as per British standards.

Electric showers

ASPIRANTE

Five stunning finishes, natural, yet original

From the polished style of Black Gloss and White Gloss to the natural beauty of Brushed Steel, Aspirante has a finish that complements any bathroom. And with such innovative finish effects never having been seen on an electric shower before – ever – you can be sure you're giving your room a truly original look and feel.

Use it once. Know how it works

No need to memorise obscure settings and indicators. Aspirante works as beautifully as it looks. One central control does everything you need – from switching on the shower to a perfectly delayed shutdown sequence. If only everything in life was so easy.

Everything you need

Every Aspirante shower comes complete with a full shower kit: riser rail, adjustable showerhead holder, soap dish, shower hose, and a rub clean showerhead with 5 spray patterns. All you need is within the box.

Site with ease

Thanks to its discreet design, including more compact overall dimensions, Aspirante sits comfortably within any bathroom. That means you're free to design your interior with confidence.

A dream to clean

Each Aspirante shower comes with a rubclean chrome-plated showerhead with 5 spray patterns. Along with an easy-to-clean face, keeping your shower in tip-top condition only takes a couple of wipes.

8.5kW and 9.5kW models available

A breeze to install

A swivel water inlet connection means that Aspirante is compatible with both left or right pipe entry positions. This means that you, or your installer, will find fitting a breeze.

Power showers

Triton Power Showers mean no-one need be without the forceful and invigorating experience of a high flow rate shower. Designed for plumbing systems with low pressure these stylish showers combine a mixer and an integral pump in one easily installed unit.

FEATURES:

- Adjustable Maximum Temperature Stop – reduces the risk of accidentally turning the temperature too high
- Maximum flow rate of up to 14 litres per minute
- Push button start stop
- Thermostatic temperature control
- Automatic shutdown should either the hot or cold water supplies fail
- · Rub clean showerhead
- 5 spray patterns

Low pressure?

With Triton's range of booster pumps you can get the power performance you demand from your shower, turn any mixer into a power shower or simply boost your low pressure flow rate.

T450i Pump

DICA0010

If you are experiencing low pressure cold mains problems with your electric shower, this pump is the solution, boosting the supply from your cold water tank and in turn your flow rate.

T550i Pump

DICA0012

£365

The T550i is the unit to opt for if you want to convert a mixer shower into a high flow rate shower.

WARNING! Under no cirumstances must the T450i pump be connected directly to the T150Z, AS2000XT, Safeguard Pumped Care and Safeguard+

DICE0006 - 8.5kw

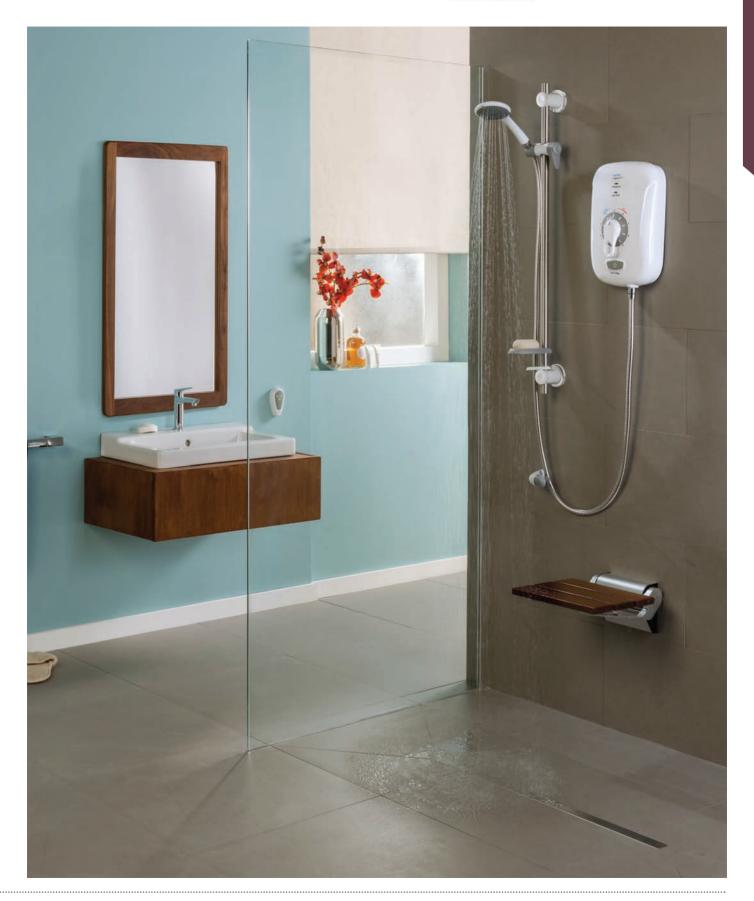

Add the sparkle to your bathroom

Our Moods range offers you the perfect finishing touch whatever your style from classic elegance to the latest design trend from Europe.

Solid Brass

Using solid brass bodies and top quality chrome plating our products are built to last which is why we offer an impressive 10 year guarantee on all our taps against manufacturing faults.

Ceramic Disc Cartridges

Inside our ceramic disc cartridges on all single lever models offer a wonderful smooth operation and long lasting performance.

Quarter turn is standard on the majority of our dual handle models unless stated otherwise.

Minimum Water Pressure

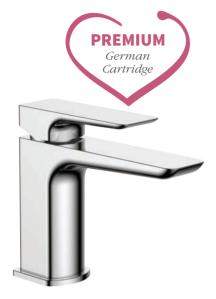

To help you choose whats right for you, we've tested all our taps against the national standard BS1040-2 and BSEN200 and quoted the minimum water pressure throughout the range to achieve the flow below.

Basin mixers and taps - 7.5 litres per minute.

Bath mixers/fillers and taps - 14 litres per minute.

^{*}For use with a basin with an overflow. † For use with a basin without an overflow.

Enjoy dry warm towels and heat up your room too with our stylish radiators. Whatever the size, whatever the style, we have a solution for you.

- Designed for use with central heating systems or via electricity with the option of an element kit, they make an impact in your bathroom.
- Tested to EN442 standard guarantees the finest quality.
- Look out for the below symbols on the following pages; they will help you choose the best radiator to suit you.

Central Heating

The benefit of this type of installation is that it is economical to run when the central heating is on. Suitable for use with indirect central heating systems (your plumber/installer will be able to advise the type of system you have). The radiator is fitted to your central heating system and works alongside your existing radiators.

Electric

The benefit of this type of installation is that the radiator can be installed almost anywhere and does not require any pipework. It has the added versatility of being able to be turned on and off whenever required, regardless whether the rest of your central heating is on. An electrical element kit (see page 252) with a fused spur is required and wired to your electricity supply. The electrical element is screwed directly into the radiator and heats the water.

Dual Fuel

The best of both worlds! This type of installation is plumbed with indirect central heating systems and or your electrical supply. This guarantees the low cost of a central heating system during the winter whilst ensuring the versatility of being switched on and off independently during the summer months. Central heating, electric or both - the choice is yours!

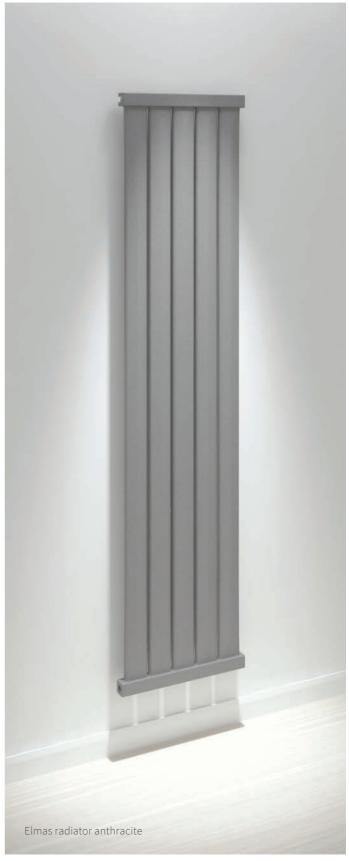

Underfloor Heating

For a more minimalist look, keep warm and discover the luxury of stepping onto a cosy warm floor with undertile heating, which has fast become affordable and easy to install. And now with the 4iE Smart Wi Fi thermostat you can use smartphone control to ensure your home is always at the temperature you want just as you arrive, and using more efficient temperatures when you're away.

Undertile *Heating*

If you're looking for the ultimate luxury in bathroom heating, then you need look no further than our range of Warmup floor heating systems. The process is simple, there is no need to dig up your old floor. Select your heating system, decide how much you need, and choose your thermostat. Three simple steps to affordable luxury. Warmup floor heating is specifically designed for use under tiles and natural stone.

Warmup Loose Wire System

The Warmup Loose Wire System uses an ultra-thin, dual-core heating wire that is flexible, easy to install and will not raise floor levels. This system is guick to install and has a single connection lead for fewer steps. It offers flexibility and is ideal for precise installation in irregular shaped areas.

Dual wire undertile heater 300 watt - 1.5 to 2.4m ² DIUH0002	£185
Dual wire undertile heater 400 watt - 2.5 to 3.4m ² DIUH0004	£215
Dual wire undertile heater 600 watt - 3.5 to 4.4m ² DIUH0006	£310
Dual wire undertile heater 800 watt - 4 5 to 5 9m ² DIUH0008	£399

The Warmup StickyMat consists of a thin loose wire evenly spaced and taped to sturdy glassfibre mesh with pressure sensitive adhesive. It allows for the fastest and most secure installation of electric underfloor heating. Simply roll out a length, cut, flip and stick down the mesh until the floor area is covered. It is perfect for evenly heating large or regular-shaped rooms.

150 watt undertile sticky heating mat 1m ²	DIAC0022	£145
150 watt undertile sticky heating mat 2m ²	DIAC0024	£210
150 watt undertile sticky heating mat 3m ²	DIAC0026	£290

3iE Energy-Monitor Thermostat (for electric and hydronic underfloor heating up to 16A)

- Classic Cream DIUH0010
- Piano Black DIUH0012

£215

The world's first fully interactive, touch technology, energy-monitor thermostat features an easy-to-use interface, eliminating complicated instruction manuals. The display shows recorded energy consumption usage, so that users know the exact underfloor heating costs. Up to 10 programmable periods can be set each day to maximise energy efficiency.

4iE Smart Wi-Fi Thermostat

- Bright Porcelain DIAC0036
- Onyx Black DIAC0034

The 4iE learns how homeowners use their heating and the unique way their house reacts. It then automatically suggests ways to save energy, suggesting what temperature should be set when you are not at home and when you can turn the heating off early. The 4iE offers important advantages to the homeowner and trade professional, use your smartphone, tablet

or computer to control your heating.

Tempo Digital Programmable Thermostat

(for electric and hydronic underfloor heating up to 16A)

- Porcelain White DIAC0030
- Piano Black DIAC0032

£150

£150

Enables end users to choose the time as easily as they would with a watch or clock and quickly set their programs – heat on when they want it and off when they don't need it. It helps avoid wasting energy and achieves savings on utility bills.

Mirrors

Designer Illuminating Mirrors

Our range of designer illuminating mirrors will add a touch of elegance to any bathroom. Combining style with practicality, each mirror contains the latest technology to ensure your bathroom is at the cutting edge of design.

Most of our mirrors incorporate an infrared 'no touch' sensor switch for safety and ease of use. Simply move your hand in front of the sensor to activate the lights. Made from 5mm PVC backed safety glass and are IP44* water resistant rated for your safety and peace of mind. The internal demister pad ensures that the mirrors do not steam up.

All mirrors are easy to install.

• IP44* rated

*IP44 water resistant rated - mirrors have been tested for compliance with electrical equipment (safety) regulations but cannot be used in direct contact with running water. See technical specifications for further information.

- Compatible with most universal WC's
- With built in battery powered LED light that is activated on sound

Wall Mounted Frame Systems

Whether you are updating your existing bathroom or designing the dream bathroom from scratch, wall hung frames bring a modern element allowing you to include the latest styles of wall hung WC's or basins.

Frames allow you to safely and securely fix wall hung products. They can provide support for wall hung WC's up to 400kg which includes a concealed cistern and basins up to 150kg. Frames can be used inside a partition wall, behind tiles and in furniture creating the illusion of space by freeing up the floor area, helping to create a minimalistic design that is easy to clean and stunning to look at. There is the added benefit of a choice of flush plates that are installed flat to the wall for a seamless and stylish finish.

For wall mounted WC's see pages 10, 26 and 38.

Shower water systems

There are a few different types of water systems in homes in the UK, we can usually make some assumptions about the sort of water pressure each will give.

Gravity Fed System

This is usually a tank in the loft space or inside an airing cupboard. A basic guide to establish how much pressure it will deliver is how high the tank is above the tap or shower. If the tank is 2 metres above the level of the tap or shower, the water pressure will be 0.2 bar. If it is 5 metres, the water pressure will be 0.5 bar. Generally this type of system is low pressure however you can increase the pressure by installing a pump. It is recommended to seek advice from a qualified engineer or manufacturer before choosing your pump as these vary in performance.

Combination Boilers

These are high pressure systems and are usually set to operate between 0.8 to 1.5 bar, minimum and maximum pressure can be checked with the manufacturer however most boilers have a gauge to show what pressure it is operating at. Combination boilers have an integrated pump so if the water pressure is too low for your required application, adding another pump can damage the boiler.

Sealed/Unvented Systems

These are modern systems, if you have a hot water tank but you don't have a cold water tank (cistern) in your loft or garage, this is an unvented high pressure system. They are quite uncommon as they are more expensive however they can usually deliver around 3.0 bar of water pressure.

Designer illuminating mirrors

Moods backlit and LED mirrors have been independently tested for compliance with electrical equipment (safety) regulations.

These mirrors are IP44 water resistant rated and are suitable for use in zone 2 and outside zones in the bathroom. These mirrors must be mounted so that the sensor switch is a minimum of 150mm from an adjacent wall or obstruction to ensure function of the sensor switch.

If a mirror is mounted portrait, the sensor is located on the bottom right hand edge of the mirror. If mounted landscape, the sensor switch is located on the bottom left hand corner.

The sensor can be repositioned if necessary to avoid obstructions. Please refer to the product installation instructions for full details on how to do this.

Electrical fittings in this zone require a seperated extra low voltage and a minimum rating of IP44 (splash-proof).

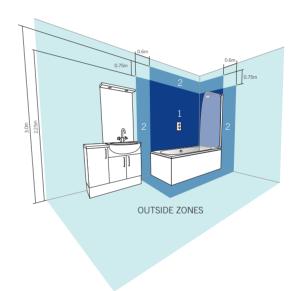

Zone 2

Electrical fittings in this zone require a minimum rating of IP44 (splash-proof).

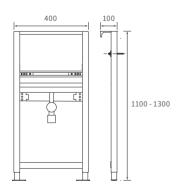

Outside Zones

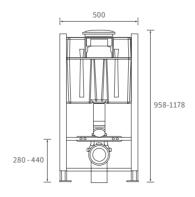

Electrical fittings in this zone require no IP rating (unless cleaned by water jets).

Terms and conditions

Your new bathroom products have been designed and manufactured to high standards and all come with a re-assuring manufacturers guarantee. Guarantees apply to manufacturing defects and do not apply to accidental damage, wear and tear or any item or component rendered defective by unsatisfactory planning, faulty installation, improper or negligent use or damage resulting from failure to maintain the product in accordance with the customer care instructions. Guarantees do not cover any product that has been modified or altered in any way. Guarantees do not cover any product that is installed with a fault that would have been clearly evident before installation.

In the interest of continuing design development and product improvement, we reserve the right to amend or adjust specifications at any time. Where an identical product is no longer available we will supply the nearest equivalent from our current range. Guarantees are for the original purchaser of the product, it may not be transferred to a subsequent purchaser of the premises in which the product is initially installed.

THESE GUARANTEES DO NOT AFFECT YOUR STATUTORY RIGHTS.
