

# REAL PROPERTY TOKEN

## Facilitating Peer to Peer Transactions

### MAKING IT REAL

You get a Property Based Platform that allows Peer to Peer Projects and Property Transactions with a maximum return given back to Token Holders participating in qualified high return projects.  
We will build brand awareness around the promotion of these returns utilising roadshows education and workshops.

#### P2P

Property Platform allowing for people to come together to support one another and capitalise on property investment. Using RPT's platform and Tokens will allow you to participate in any of the projects on the platform. We have our own developments starting in the New Year and these will be on the platform for all to be involved.

#### Transactions

By working with the greater community we will pioneer systems to bring property into the blockchain. Thereby reducing unnecessary costs and expenditure when purchasing and dealing with property. By developing systems we can eliminate the excessive fees returning more back to the people who have the vested interest.

#### Education

Roadshows and Workshops to educate the public on the greater benefits of Crypto that are not being told. How we can all be working in a much fairer system and all benefit from working together. We will use these opportunities to showcase our APPS and Property Platform to further enhance our brand and awareness.
