IT'S TIME TO UPGRADE YOUR CELLULAR COMMUNICATOR

CELLULAR NETWORK UPGRADE

As you may know, the sunset time for the wireless 3G/4G cellular network is right around the corner. Verizon and AT&T are replacing the 3G/4G network with a 5G network. The alarm industry's answer to this change is the new LTE (Long Term Evolution) cellular communicator.

This change will affect most of the cellular communicators that have been installed. If you have a cellular communicator, the time to upgrade is NOW.

To keep costs down, we are offering our cost on parts and a no labor installation, under a new agreement. Don't wait.

Call our office at (530) 243-2521 to see if your system is one that will need to have the communicator upgraded, and take advantage of our special offers.

PLEASE NOTE: In order to be able to do these upgrades at a reduced rate, we must purchase the parts in large quantities. This offer from our supplier is for a limited time only, so call and get your name on the list. Talk to Stuart for costs and to set up a time for the upgrade (530) 243-2521. Don't wait, time is limited and costs will increase.

WHAT TO DO IF YOU SET OFF YOUR ALARM ACCIDENTALLY

- Remain calm. If the activation was accidental, go to the keypad use your normal procedure to disarm the system. You may have to do this twice to clear the keypad.
- After the system is disarmed, and the sirens have stopped, call the central station immediately (530) 243-2521. Advise the dispatcher that it was an accidental activation. Be prepared to give your password for identification. After you have cancelled with the dispatcher, you may rearm the system as normal.

FREE ESTIMATES: Are you building a new home? Do you need a commercial security or fire alarm system? Do you know someone who needs an alarm system? All of our estimates are free, low pressure, and confidential. We also give referral credits. Call Stuart at (530) **243-2521**.
