The story of MAGNETIX is my own personal story: As I discovered a simply designed bracelet with magnets 20 years ago, I was immediately excited by the power of the magnets. I immediately put the idea together to produce exclusive designer jewellery with magnets, to be able to do something good for people through magnetism and unique designer jewellery. This is how my first jewellery collection came about – a market niche that has been wowing customers and independent consultants since 1999.

MAGNETS

a fascinating power from mother nature!
Magnetism is a general-acting force. Its effect extends to everything - particularly humans, all animals and plants.

Jewellery with effect

On Earth we are exposed to many forces - one of them is magnetism. Magnetic fields are an integral part of our human organism. The force of the Earth’s magnetic field can not be grasped by our five senses, yet it affects all living things. Like the Earth, the jewellery and accessories of MAGNETIX Wellness contain powerful magnets. Experience the beneficial effect!

Neodymium: a superpower from Mother Nature

Magnets are one of nature’s many fascinating wonders. For our products, we mainly use neodymium magnets with at least 1,200 gauss - they are among the strongest and longest lasting in the world.

Magnetism in science

1954 Linus Carl Pauling discovered the magnetic properties of our blood.

1960 Researchers found out that migratory birds and marine animals utilize the earth’s magnetic field for orientation.

Today Magnetism is used in modern medical examination methods and is a growing complementary medicine.

Indulge your feet to a wellness treat!

Because now you can take off your shoes and get into well-being!

The MAGNETIX Wellness foot reflex zone mat mimics the health-promoting principle of running on gravel: large stones provide a firm, powerful massage – this promotes circulation in the feet and strengthens the tendons in your toes. The massage from the small stones has a pleasant effect on the entire body as well as benefitting the motor skills, which increases wellbeing and activates the foot, leg and posture muscles. The mat provides balance for body and spirit.

Non-slip underside, dimensions: 48.5 cm x 48.5 cm. Weight: 2.5 kg.

Application

Even brief walking sessions – twice a day for 10 minutes – are enough to strengthen your foot muscles and, at the same time, gently relax them. The foot mat promotes wellbeing. Particularly good for cold feet and heavy legs.

Foot reflex zones

Countless nerve tracts run from the soles of the feet to the various internal organs. If these organs are stimulated via a pressure point massage on the soles of the feet – for example, using pebbles, this should have a positive effect on the whole body. This is why walking barefoot on a gravel beach or on barefoot walking paths is very popular.

The pair of spheres made of silicone, in which one of the spheres contains a powerful neodymium magnet (900 Gauss), embodies the principle of Yin and Yang—the Chinese philosophy of balance and harmony.

Using the wellness sphere increases quality of life, as it:

- Improves fine motor skills and coordination of movement
- Relaxes, calms and enhances general wellbeing
- Can vastly improve flexibility of fingers
- Increases hand sensitivity and boosts skill

Lie the spheres on the palm of your hand, stretching and bending the fingers. Move the spheres clockwise first, in turn try to move them anti-clockwise - this requires even higher concentration. The spheres should not touch if possible during the exercises. Do this exercise whenever you have time, even sitting down.

As powerful and individual as your charisma!

Extra strong magnets and an innovative design concept – this makes our silicone jewellery a colourful eye-catcher. The cheerful pieces of jewellery made of skin-friendly, water-resistant and robust silicone, are the ideal companions whether it be at your daily exciting stressful everyday work, relaxed at leisure or for sports.
