We are proud to announce the ProBuilder™ Series of gas fireplaces by Lopi. The ProBuilder™ series represents Lopi’s entry level linear gas fireplace models. Available in 3 models of 42”, 54” or 72” wide.

The ProBuilder™ range does not compromise on Lopi’s renowned quality. The range is built with a heavy gauge 16-18 steel construction, and featuring a large viewing area through crystal clear tempered glass capturing a sleek linear style and beautiful flame presentation.

Each model is equipped as standard with a wall switch or an optional thermostat remote. The range also includes quiet variable twin blowers that can be independently operated from the flame and even be switched off completely.

See back page for firebox dimensions. Refer to installation manual for full details - www.lopi.com.au

*Heating capacity varies according to the size of closed off area, ceiling height, floor plan, insulation and outside air temperature.
Features

- GreenSmart® Basic 2 (GSB2)
- Tempered glass viewing area
- Glass barrier screen is flush to wall
- Easy access gas controls
- Sleek linear style with beautiful flame presentation
- Heavy gauge 16-18 steel construction
- Can operate in a power outage
- Standard Wall Switch
- Quiet Dual 90 CFM Fans

Options

Wall mounted GreenSmart® Basic Remote *(upgrade from wall switch)*

Choice of Rock Embers & 4 Glass Colours for burner base *(One Option Required)*

- Rock Embers
- Black Reflective Glass
- Platinum Reflective Glass
- Bronze Reflective Glass
- Cobalt Reflective Glass

Optional Traditional Log or Tumbled Stone Media

- Traditional Log
- Close-up - Traditional Log
- Tumbled Stone
- Close-up - Tumbled Stone

CoolSmart™ Wall

The cool wall system is designed to redirect the convective heat of the ProBuilder fireplaces from the front of the unit, just above the glass, to a location higher on the wall. The use of this kit allows for reduced clearance to combustibles and accommodates TV installations closer to the fireplace or in recessed cavities above the fireplace. If using this kit, disregard the framing dimensions in the appliance manual and follow the framing instructions included in this kit. All other installation requirements for the fireplace must be followed as detailed in the appliance installation manual.

The optional CoolSmart™ Wall Kit is available on all ProBuilder™ Linear Fireplaces, which moves the heat outlet high on the wall to create a relatively cool zone to allow for safe television installs.
Firebox Dimensions

**ProBuilder™ 42**

- Floor to flue center: 248mm
- Front to flue center: 248mm
- Floor to flue top: 788mm
- 404mm*
- 1197mm*

* Includes the required 25mm clearance

**ProBuilder™ 54**

- Floor to flue center: 248mm
- Front to flue center: 248mm
- Floor to flue top: 788mm
- 404mm*
- 1502mm*

* Includes the required 25mm clearance

**ProBuilder™ 72**

- Front to flue center: 248mm
- Floor to flue top: 788mm
- 1092mm
- 521mm
- 124mm
- 1959mm*

* Includes the required 25mm clearance

See inside page for framing dimensions.
