Xpedit 3-D Metallic

This awesome floor coating is only available from Xpedit Coatings. It incorporates metallic pigments to create an unusual and extremely elegant three-dimensional pattern with highlights and shadows. It is a fast-curing polyaspartic system –four times more abrasion resistant than standard epoxy– that offers an unmatched look that only our experienced personnel can create. An *Xpedit 3-D Metallic* floor is a work of art available in almost any color to match your taste and decor. The images below show different details of the same floor to highlight the uniqueness of this coating system.
