Avigilon Appearance Search™ video analytics technology is a sophisticated deep learning AI search engine for video. It sorts through hours of video with ease, to quickly locate a specific person or vehicle of interest. Appearance Search can improve incident response time and enhance forensic investigations by helping operators compile robust video evidence, create a powerful narrative of events, and reveal a vehicle or individual’s route or last-known location.

**Integrated Solution**
Integrated with Avigilon Control Center (ACC) 7 and ACC™ 6 Enterprise edition software, Avigilon cameras with self-learning video analytics and select Avigilon Network Video Recorders (NVRs).

**Initiate Searches Based on Physical Descriptions**
Allows operators to search for a person by selecting certain specific physical descriptions, including clothing color, gender and age categorization.

**Search Across Multiple Sites**
Initiate a search for a person or vehicle of interest across one site, then continue the search for the same subject of interest by seamlessly transitioning from one site to the next site that uses the same version of ACC software.

**Face Analytics Included in Search**
Incorporating the unique characteristics of a person’s face enables the Appearance Search technology to understand that it is searching for the same person, even if items such as their clothing change over time.

**Playback, Bookmark and Export Tools**
Build a comprehensive set of video evidence from multiple video sources, to create a powerful narrative of events.

Two Ways to Build Your Avigilon AI-Powered Solution

1. Avigilon Integrated Solution
   Enable Appearance Search by combining Avigilon H4 cameras with self-learning video analytics with our NVRs that are pre-loaded and pre-configured with ACC software.

2. ONVIF®-Compliant Solution
   Evolve your legacy Avigilon and third-party ONVIF-compliant camera systems with the Avigilon AI Appliance, adding patented self-learning video analytics and Appearance Search when connected to ACC 7 or ACC 6 software.
