Liquid organic fertilizer VERMIEXTRACT

Processed organic fertiliser VERMIEXTRACT is produced from organic farms manure by using California red earthworm in the biological processing.

VERMIEXTRACT by Vērnērs un draugi Ltd is made with earthworm VERMICOMPOST, which is converted into a liquid fertilizer using the hydrodynamic cavitation method. The liquid fertilizer has a higher humus content compared to dry granulated fertilizers.

For more effectively, VERMIEXTRACT should be used to the spray on plants.

THE PRODUCT HAS BEEN RECOGNIZED BY THE LATVIA FOOD AND VETERINARY SERVICE (TRACES) APPROVAL NUMBER A063598 AND GERMANY CERES CERTIFICATE.

Total NPK - not less than 0,5 - 0,7 % **Usage:** Mix just 40 - 70 ml Vermixtract to 10 L water **Humic acids** - 8 - 10 g/l, **Organic matter** - not less than 0,8 - 1%
4 - 7 L Vermixtract to 1000 L water, for better effects and economic use obtain for use by spraying on plants.
