Wi-Fi Related

Connecting Your Android to Wi-Fi

- Open Aps → Click **Settings**
- Scroll down to **Wireless and Networks** → Make sure "Wi-Fi" is turned on → then click **Wi-Fi**
- Wait a moment for the phone to detect Wireless Networks within range
  - To rescan available networks at any time, select **Scan**
- Select the network you want to join
  - If the network is not secured the connection should be completed successfully.
  - If the network is secured there will be a lock symbol next to it. Simply, **click** → **Enter Password** → **Click Connect**
