

FibreCem

Functional efficiency for facades

The rear ventilation system

Providing considerable energy savings for any building, the environmentally friendly ventilated facade system and fiber cement panels are not only a good contribution to climate protection, they also offer a great opportunity to enhance the durability, appearance and value of a building.

Combined with each other, they become the most reliable system from the technical construction viewpoint. This cladding system effectively protects the building and its structure from the elements for a long time. Furthermore, it reduces humidity and the air circulation optimizes the efficiency of insulation. Therefore, there will be no problem with mold, fungi, etc. The rot-resistant and non-combustible panels are extremely durable and virtually maintenance free.

KRISTALLIN

GREY PANEL WITH GRAINED COATING

Base panel: Grey based
Top layer: Opaque
Standard colors: 5

Grey based fiber cement panels with fine-grained opaque coating.

Untrimmed panels
3070x1270x8mm
2530x1270x8mm

Trimmed panels
3050x1250x8mm
2510x1250x8mm

GLATT

GREY PANEL WITH RAL COATING

Base panel: Grey based
Top layer: Opaque

This opaque acrylic coating allows the creation of bright and intense colors.

Untrimmed panels
3070x1270x8mm
