# Studded Insulation Panel

## Insulation = energy saved...

Along with excellent insulating properties, the studded insulation panel is a lightweight, durable product designed to hold hydronic piping in place over an existing flooring. The benefits are an energy efficient and quicker reacting

underfloor heating sytem compared to conventional slab heating, with the capacity for individual room control offering flexibility and energy savings.

Description	Technical Details
Panel size	1200 x 800 x 55 mm
Thermal Value	R Value 1.00
Density	30kg/m <sup>3</sup>
Compressed Strength	160kPa @10% deformation
Cross break Strength	260kPa min
Pipe sizes	16, 18 & 20mm OD
Material	expanded flame retardant polystyrene
Concrete Screed	20-50mm depth over pipe* *depending on flooring choice over screed
