

POLYMATE trailers

PUTTING A POLYMATE TO THE TEST!!!

October 2010, Polymate Trailers donated a trailer for the Across Oz Adventure. Not only was this a great cause in Raising Awareness of Depression, but put our Polymate Trailer to the test.

Travelling some of Australia's roughest and rugged country, covering some 12,000 kilometres over six weeks the journey included westward across the heart of Australia, then south through Perth, around the southern westerly tip, and then turn due east across the Nullabor. Without a rest or any maintenance they continue travel through outback NSW, a momentary diversion to the coast, then back inland again before turning north for home.

Not only proving it's self in all forms of strength, durability and reliability, this Polymate Trailer was fully loaded at all times. Carting everything from motorbikes, eskies, cooking and camping accessories along with water tanks and jerry can holders, making the Polymate Trailer a vital part of the Adventure.

Polymate Trailers are very proud to have been a part of this cause, and equally proud to have the opportunity to show just how good a Polymate Trailer is.

When it comes to Trailers, there really is only one choice.

For a quality tough Aussie Trailer – Make sure you've got a POLYMATE Trailer
