

Holme Design

Born out of a desire to make homes look beautiful, Holme Design has over 30 years experience and a real reputation for listening to clients' needs. All projects are personally managed by husband and wife team Haydn and Mel Armsby – right through from design to installation, so you are assured of a bespoke and personal service.

During the refurbishment of their own home in Holme-on-Swale, which incidentally is where the company takes its name from, Haydn and Mel realised that together they had the skills and contacts necessary to help other people to achieve a beautiful home, finished to the highest specification. It was this realisation, combined with Haydn's 30 years of experience designing kitchens and bathrooms with some of the most prestigious and successful retailers in the North, that led the couple to decide to branch out – and so they set up Holme Design.

Together, Haydn's in-depth knowledge of every aspect of business from supply to installation, and Mel's background in sales and marketing, not to mention her eye for detail and passion for design,

combine to provide a service that is not only high quality, but personal too. From the moment customers enter their magnificent showroom in Bedale's Craft Yard, they can expect a bespoke service. 'We listen to our clients' needs so they get exactly what they want,' Mel explains. 'We are both passionate about what we do and every project is personally handled by either Haydn or myself, from enquiry to installation. We are always on hand.' Clients are guaranteed real attention to detail, high quality products and exceptional levels of customer service, whether the project is one room or an entire house. 'Because we're a small independent company we can offer a far more friendly and customer focused service than larger firms. Every job, no matter how small or large, gets our equal attention. It's our passion to make people happy in their own environment and be proud of what they have spent their hard-earned money on', Mel says.

Holme Design offer the best of both worlds – a personal service, with a huge choice and range to suit everyone. At their magnificent showroom, customers discover a huge collection from classically elegant to cool and contemporary – the hand-picked selection

includes fabulous high-gloss surfaces and high tech design solutions for kitchens, alongside creative lighting solutions and accessories to add the finishing touch. It really is worth a visit for the 'wow' factor. Although kitchens and bathrooms are the main focus of the business, Holme Design also provide the same high quality bespoke services for bedrooms and personal offices. Whichever room you are looking to revamp, you can rest assured that Holme Design will bring everything together smoothly, from design to installation. From generating ideas and offering inspiration at the initial consultation, before producing a 3D image of your project – Holme Design will do their utmost to realise your dreams.

Always moving with the times, the company works with brands such as Omega, the ever popular Charles Rennie Mackintosh and Chippendale range; combining traditional craftsmanship with high tech ranges from Crown and classic PWS painted kitchens. In addition to these famous names, expect to find Ideal Standard, Karndean, Whirlpool, DeDietrich and Neff amongst the brands also available from Holme Design.

'Quality is at the heart of everything we do. And we love what we do.'

Keeping up with the latest styles, the couple are always aware of trends within the industry and Haydn and Mel have noticed an increasing demand for high tech appliances; 100 °C boiling taps available as a single, neat tap unit that can supply cold, warm or boiling water are understandably popular, and customers are also choosing the world's most advanced and versatile 'zoneless' induction hob from the pioneers of induction technology DeDietrich for their new kitchen. 'Granite is extremely popular especially when we introduce our clients to the fabulous range our supplier F. Jones Cleveland Ltd import from Italy. Quartz is also very popular, with a fabulous range from Silestone; we have just installed their new Nebular leathered Altair which has a depth and movement, continuity of pattern and distinct contrasting effect not

seen before,' Mel explains. As for bathrooms, walk-in showers which feature a glass panel are a contemporary and convenient choice, with no hinges or doors to clean, complemented beautifully by limestone flooring, granite seating and shower wall panels.

Looking to the future, Holme Design are passionate about continuing to provide a high quality bespoke service for clients, along with a continued growth in business – the result of positive feedback and personal recommendations from satisfied customers. 'We always ensure we are at the cutting edge of design by constantly taking on new quality products. We aim to remain the place to come to for the best and most recent innovations, friendly advice and design and supply of quality kitchens, bathrooms and bedrooms. Quality is at the heart of everything we do. And we love what we do.'
