With an extensive selection of automatic garage door openers within our B&D range, we have a model to suit a variety of residential applications.

Strong motors, contemporary designs and a commitment to providing our customers with quality convenience products means that B&D is the Number 1 choice for garage door openers across Australia.

Call 13 62 63 or visit www.bnd.com.au for further information.
IMPROVE YOUR LIFESTYLE, WITH ADDED CONVENIENCE FROM A B&D CONTROLL-A-DOOR®

CONVENIENCE
You will really appreciate an automatic garage door opener on those cold, dark or rainy days. With just the push of a button on your transmitter you will be able to drive straight into your garage or carport.

COMFORT
You can enter and exit your garage or carport from the comfort of your car without struggling with heavy doors.

SAFETY
In and out of the car at night, parking on steep drives and entering dark garages are all things of the past with a B&D automatic garage door opener.

SECURITY
B&D Controll-A-Door® openers lock every time they close. With ease of garage entry you also use the garage more.

VALUE
Our openers represent excellent value for money and will add value to your lifestyle and your home.

PEACE OF MIND
With an extensive national network of B&D approved and Accredited Dealers, you can be sure your opener will be installed and serviced correctly.

WARRANTY
All Controll-A-Door openers feature a full 5 year/10,000 cycle, on site warranty on the opener, including labour to repair. B&D Firmamatic openers feature a 2 year, parts and labour warranty. Opener must be installed by an approved B&D dealer. 12 month warranty on transmitters. LED’s and batteries excluded.

Visit www.bnd.com.au for further information
Most current garage door openers operate on a single 433MHz frequency with a wide reception bandwidth. Unfortunately many other household products also operate on the same frequency. Every day items like baby monitors, door bells and some domestic and in car wireless entertainment systems. And they don’t have to be in your home. They can be in your neighbours home.

If one of these items is being used in your area, or is malfunctioning, it has the potential to interfere with the operation of your garage door opener. You will push the button on your opener transmitter, and nothing will happen. This can be very frustrating, when you need your door to open/close, and it won’t.

To overcome this problem, which while localised is on the increase, all new B&D Controll-A-Door openers now feature unique Tri-Tran multi frequency operation. Tri-Tran has an automatic frequency change function, with each of its three frequencies transmitted having a much tighter bandwidth. The frequency changes every 22mS during a transmission and reception. So if there is another signal interfering on a part of this frequency spectrum, the automatic change ensures the signal still reaches the opener. This makes Tri-Tran up to one thousand times better, in terms of in band interference rejection, than a typical FM receiver, and up to a million times better than some AM receivers.

To ensure your garage door opener works when you need it to, insist on an opener with Tri-Tran. The world’s first multi-frequency garage door opener technology.
Controll-A-Door® P
Diamond WQ - Whisper Quiet

THE DIAMOND – WHISPER QUIET
shares the same quiet DC motor technology as the B&D Controll-
A-Door P Diamond and therefore includes all the added features,
with the bonus of less operating noise.
Now comes standard with an extra
4 button transmitter and entry keypad.

COURTESY LIGHT
LED arrays ensure minimal power
consumption and on going maintenance.
Lights automatically switch on and off as
you open or close your door. The light can
also be operated independently, via
a transmitter button.

BELT C-RAIL
Encloses moving parts, ensuring a safer,
cleaner looking rail system. Ideal for low
headroom applications and perfect for
bedroom over garage applications.

LOW STANDBY POWER USAGE
The Controll-A-Door P Diamond Whisper
Quiet features one of the lowest standby
power levels of any opener in Australia,
ensuring low power consumption,
reducing your energy bills and helping
improve our environment.

TRANSMITTER CAPACITY
Programme up to 14 transmitters, wall
buttons or entry keypads, at the touch
of a button. Transmitters also include
multiple buttons, so you can programme
in additional openers, or set up some of
the unique features of the opener, such
as pet mode and vacation mode.

SOFT START / SOFT STOP
Controll-A-Door P Diamond Whisper Quiet
openers are programmed to open a garage
door slowly... then speed up... and slowly
come to a stop. Smoothly. Quietly.

QUIET DC MOTOR
Gives smooth, quiet and reliable operation
with the bonus of less operating noise.

Visit www.bnd.com.au for further information
Controll-A-Door® P Diamond

THE CONTROLL-A-DOOR P DIAMOND automatic opener is enabled with superior technology, greater features and quiet, smooth operation. It offers both excellent functionality and style. Now comes standard with an extra 4 button transmitter and entry keypad.

CHAIN C-RAIL
Encloses moving parts, ensuring a safer, cleaner looking rail system. Ideal for low headroom applications.

COURTESY LIGHT
LED arrays ensure minimal power consumption and on going maintenance. Lights automatically switch on and off as you open or close your door. The light can also be operated independently, via a transmitter button.

LOW STANDBY POWER USAGE
The Controll-A-Door P Diamond features one of the lowest standby power levels of any opener in Australia, ensuring low power consumption, reducing your energy bills and helping improve our environment.

TRANSMITTER CAPACITY
Programme up to 14 transmitters, wall buttons or entry keypads, at the touch of a button. Transmitters also include multiple buttons, so you can programme in additional openers, or set up some of the unique features of the opener, such as pet mode and vacation mode.

SOFT START / SOFT STOP
Controll-A-Door P Diamond openers are programmed to open a garage door slowly... then speed up... and slowly come to a stop. Smoothly. Quietly.

QUIET DC MOTOR
Gives smooth, quiet and reliable operation.
Controll-A-Door® S

The Controll-A-Door® S offers improved features and enhanced technology resulting in quiet, smooth operation with unsurpassed functionality and style.

**Chain C-Rail**
Encloses moving parts, ensuring a safer, cleaner looking rail system. Ideal for low headroom applications.

**Courtesy Light**
Automatically switches on and off as you open or close your door... The light is pre-set to 3 minutes and can be programmed to turn on and off via transmitter.

**Quiet DC Motor**
Gives smooth, quiet and reliable operation.

**Transmitter Capacity**
Programme up to 14 transmitters, wall buttons or entry keypads, at the touch of a button. Transmitters also include multiple buttons, so you can programme in additional openers, or set up some of the unique features of the opener, such as pet mode and vacation mode.

**Soft Start / Soft Stop**
Controll-A-Door S openers are programmed to open a garage door slowly... then speed up... and slowly come to a stop. Smoothly. Quietly.

THE CONTROLL-A-DOOR DIAMOND - POWER DRIVE automatic opener is leading the way in smooth, quiet operation. It uses all of the Diamond opener technology and with extra power it ensures that lifting heavy doors is effort free.

Featuring a variety of programmable operation modes you can easily adjust the operation of the opener to suit your individual needs.

TRANSMITTER CAPACITY
Everyone in the home can use your opener. You can program up to 14 transmitters, wall buttons or entry keypads, at the touch of a button.

REDUCED ENERGY CONSUMPTION
The Controll-A-Door Diamond - Power Drive features decreased energy use when in standby mode to provide savings through lower electricity bills.

LED LIGHTING
Never again will you have to replace a light bulb on your opener, as LED lighting has a life span of 30,000 hours. Automatically switches on and off as you open or close your door... the light is pre-set to 2.5 minutes and can be adjusted to ensure that you are never kept in the dark again.

SOFT START / SOFT STOP
Openers are programmed to open a garage door slowly... then speed up... and slowly come to a stop. Smoothly. Quietly.

GREATER POWER
Opener features extra power for increased ease of opening, especially on double doors. Height capabilities vary depending on drum size. Ask your B&D dealer for more information.

QUIET DC MOTOR
Gives smooth, quiet and reliable operation.
**Firmamatic™**

**SMART RECEIVER**
Allows you to electronically program a number of remote control transmitters plus one entry keypad at the touch of a button.

**WATER RESISTANT HOUSING**
Housing can resist exposure to water making this product suitable to be used in carport situations.

**QUIET DC MOTOR**
Gives smooth, quiet and reliable operation.

**MANUAL RELEASE CORD LOCKING**
Available as an optional extra, so that the manual release cord can be locked, making it impossible for intruders to simply reach out, disengage the motor and gain access to your carport.

**REDUCED ENERGY CONSUMPTION**
Features decreased energy use when in standby mode to provide savings through lower electricity bills.

**SOFT START / SOFT STOP**
Openers are programmed to open a garage door slowly... then speed up... and slowly come to a stop. Smoothly. Quietly.

**CONTROL PANEL DISABLING**
This function shuts off the control panel, so that the buttons on the opener become inoperable and thus not a security risk.

**SOFT START / SOFT STOP**
Openers are programmed to open a garage door slowly... then speed up... and slowly come to a stop. Smoothly. Quietly.

**COURTESY LIGHT**
The courtesy light switches on and off as you open or close your door.

**2 CHANNEL REMOTE CONTROL TRANSMITTER**
Comes standard with the opener. A small, compact water resistant transmitter that can easily fit in your pocket.

**SECURE LIGHT MODULE**
The optional secure light module is available to connect to the opener. The light stays on for approximately four minutes after operation of the opener.

**SECURE LIGHT MODULE**
The optional secure light module is available to connect to the opener. The light stays on for approximately four minutes after operation of the opener.

**MANUAL RELEASE CORD LOCKING**
Available as an optional extra, so that the manual release cord can be locked, making it impossible for intruders to simply reach out, disengage the motor and gain access to your carport.

**CONTROL PANEL DISABLING**
This function shuts off the control panel, so that the buttons on the opener become inoperable and thus not a security risk.

**2 YEARS WARRANTY**

**Shed Master GD08**
Driven by a strong and reliable DC motor, with added security features, it represents value for money and quality for all shed and carport situations.

**SMART RECEIVER**
Allows you to electronically program a number of remote control transmitters plus one entry keypad at the touch of a button.

**2 CHANNEL REMOTE CONTROL TRANSMITTER**
Comes standard with the opener. A small, compact water resistant transmitter that can easily fit in your pocket.

**QUIET DC MOTOR**
Gives smooth, quiet and reliable operation.

**MANUAL RELEASE CORD LOCKING**
Available as an optional extra, so that the manual release cord can be locked, making it impossible for intruders to simply reach out, disengage the motor and gain access to your carport.

**CONTROL PANEL DISABLING**
This function shuts off the control panel, so that the buttons on the opener become inoperable and thus not a security risk.

**WATER RESISTANT HOUSING**
Housing can resist exposure to water making this product suitable to be used in carport situations.

**2 YEARS WARRANTY**

PET MODE
Allows the door to be stopped, at a preset height, by simply pressing a transmitter button, in either up or down mode, for the purpose of ventilation or pet access.

INBUILT AUTOMATIC SAFETY REVERSE SYSTEM WITH ISS (INTELLIGENT SAFETY SYSTEM)
Automatically profiles the speed required to move the door and continually monitors and upgrades the profile as the door ages, ensuring the door stops and reverses when it comes in contact with an object. ISS on P and P Diamond openers only.

DISENGAGE CORD
Allows you to manually operate the door.

TRI-TRAN™ MULTI FREQUENCY TECHNOLOGY
Means your opener will never have interference from household wireless products including baby monitors, door bells and some in car entertainment systems. So when you want your garage door to open, it will.

VACATION MODE
A single transmitter can be programmed to disable the garage door opener’s radio receiver, blocking out all transmitters except the specified one. This is ideal if the door is to be left idle for prolonged periods.

AUTOMATIC CLOSER TIMER*
Once programmed, after you drive in or out, the door waits for your programmed time (30 seconds), then closes all by itself. *For safety this feature requires B&D’s Safety Infra-red Beam kit to be fitted and activated.
SAFETY INFRA-RED BEAMS
If you have young children or pets, the addition of safety infra-red beams provides added safety and security, as the door will automatically stop and reverse, if the beam is broken whilst the door is closing. B&D always recommend the use of safety infra-red beams on all automatic garage doors.

ENTRY KEYPAD
Allows entry to the garage without a transmitter. Great for children. No need to give them a key or transmitter, they can enter the house with their PIN number.

RECHARGEABLE BATTERY BACKUP
If power supply to the opener is broken, the door will still be operational with the rechargeable battery back up.

EMERGENCY KEY RELEASE
Allows your garage door to be disengaged and operated manually from outside. Suits sectional door openers.

WALL BUTTON TRANSMITTER
Allows remote door operation. No wiring required, and can be mounted inside the garage. Comes standard with Controll-A-Door P and P Diamond openers. Optional extra for Diamond – Power Drive.

COMBO ACCESS DEVICE
Recommended where the garage door is the only entry point. Allows you to open the door manually during a power failure, using a key to remove the barrel with a cord attached to the disengagement handle. Also allows for key electrical operation. Suits rolling door openers.

ADDITIONAL TRANSMITTERS
Now everyone in the home can enjoy the convenience of the garage door opener, with extra transmitters available.

SECURITY SYSTEM COMPATIBLE
B&D Openers are able to be wired to alarm systems. This allows your handheld opener transmitter to arm and disarm the alarm.

SOLAR POWER SYSTEM
A back up battery can be charged via solar power to ensure that shed lock outs, due to loss of electricity, are a thing of the past.

EXTERNAL ANTENNA
Suitable for areas that are prone to poor reception. This item can be added to increase the range of the transmitter.
