Alcohol 161
Drugs 163
Driver tiredness and fatigue 163
Road rage and aggressive driving 166
Litter 166

Section 14: Correct behaviour at the scene of an accident 168
What drivers must do at an accident or in an emergency 168
What to do if you arrive at the scene of an accident 170
Accidents involving dangerous goods 172

Section 15: Penalty points, fixed charges and driving bans 173
Penalty points 173
Fixed charge system 175
Driving bans 176
Section 16: Rules for motorcyclists
- Licence
- Insurance and tax
- Carrying passengers
- Personal protection equipment
- Riding a motorcycle
- Tactics for surviving as a motorcyclist

Section 17: Rules for cyclists
- Keeping your bicycle roadworthy
- Bicycle checklist
- Protective clothing and equipment
- Cycling safely
- Rules on cycle tracks for other road users
- Cyclists on roundabouts

Section 18: Rules for pedestrians
- Walking beside or along a road
- Crossing the road
- Taking care near buses or trams
- Safe crossing places

Section 19: Respecting other road users
- Pedestrians
- Cyclists and motorcyclists
- Cycle tracks and parking
- Animal traffic
Foreword

The purpose of the Rules of the Road is to save lives and prevent injury on our roads. The rules apply to all road users: drivers, pedestrians, motorcyclists, horse riders and cyclists.

The rules are written in plain English to encourage good behaviour on the road. The rules ask us to take personal responsibility for our use of the road, and in doing so become better, safer and more socially responsible road users.

The Rules of the Road are designed in an easy to read format. It is your responsibility to read the rules and know them. At the back of the book is a Glossary that explains some of the terms used. The rules are also published in Irish.

The rules comply with and reflect the Road Traffic Law as at 1 March 2013. Where planned changes in the law are known with certainty a comment is included in the appropriate section to ensure the content reflects them. It is important to check the relevant section of the Road Safety Authority website www.rsa.ie for updates.

We can save lives and prevent injury by changing our behaviour. Reading these rules and applying them will help achieve this goal.

It’s our responsibility.

It’s our choice.
Introduction

The rules of the road are for all road users – drivers, pedestrians, motorcyclists, horse riders and cyclists. You must have a satisfactory knowledge of these rules to get a driving licence. Learning about road safety doesn’t stop once you pass a driving test. It takes a lifetime.

You need to update your skills and knowledge and be aware of changes to road traffic laws. This is why you should understand and obey these rules whether you are learning to drive or have been driving for many years.

This book uses a ‘how to’ approach and covers many of the manoeuvres identified as factors in a road crash. It uses three methods to set down clearly and concisely how the law applies to all road users.

- It uses must and must not to draw attention to behaviour the law clearly demands or forbids.
- It uses terms such as should and should not to tell you how best to act in a situation where no legal rule is in place.
- It illustrates and describes traffic lights, road markings and signs provided to regulate traffic.

You play a vital role in preventing a crash. Knowing the rules of the road, practising good driving skills and taking care as a road user, you will make road safety policies more effective.

The more effective the policies the greater the positive impact on you and your families’ lives, as well as the lives of others.

For example, a 5km/h difference in your speed could be the difference between life and death for a vulnerable road user such as a pedestrian, where research shows that when:

- Hit by a car at 60 km/h, 9 out of 10 pedestrians will be killed.
- Hit by a car at 50 km/h, 5 out of 10 of pedestrians will be killed.
- Hit by a car at 30 km/h, 1 out of 10 pedestrians will be killed.

Source RoSPA UK
To guide you when on the road, there are a number of skills expected of road users, in particular drivers: the ability to act responsibly, the ability to foresee and react to hazards, good concentration and a good level of driving expertise.

As a road user, you are also expected to have a positive and considerate attitude to each other, and in particular to vulnerable road users such as cyclists, motorcyclists, pedestrians, children, people with disabilities and older people.

In the interest of road safety, you need to be aware of the importance of gaining a good knowledge of this book and putting that knowledge to good practice.

The overall aim of this book is to promote safety, good driving practice and courtesy in using our roads according to the law. It is an interpretation of the law from a road safety view; it is not the law. If you have a query you should check the original legislation or ask a Garda.

The booklet covers the road traffic laws currently in force, but it will be updated regularly in the future to take account of new laws.

It is worth noting that a failure on your part to observe any provision of the Rules Of The Road shall not in itself render you liable to criminal or civil proceedings, but any such failure may in any proceedings, whether civil or criminal, be relied on to establish or to eliminate a liability which is in question.

In the last 50 years the law on the use of the road has evolved and changed, and it continues to do so. At its most basic the law on the use of the road protects, and it does so by virtue of three fundamental rules:

- always be able to stop within a distance you can see to be clear; you need to control the car or other vehicle to the extent that you can stop without causing a problem for anyone else on the roadway. The rule means you must at all times be vigilant and exercise due care and attention.

- always drive having due regard to prevailing road conditions; this is common sense and means you must take account of the factors which will have an impact on your ability to drive safely and securely on the road, for example the weather, the type of road, the condition of the road, the time of day, the nature of the lighting.

- always drive having due regard to other users of the road; you need to take account of all of the variables you will face in any given journey, the number of cars, the speed of the traffic, are there pedestrians, cyclists, animals, what are they doing? You cannot predict or assume you have priority; you need to make full allowance for all others on the road.
You can choose to ignore the fundamental rules but you do so at your peril as to do so could result in you breaking the criminal law and being prosecuted and in a civil claim will allow a Judge to hold you responsible.

It is in your interest to follow the fundamental principles when on the road.

Observance of these three fundamental rules will help protect and keep you, your family, friends and other users of the road, safe.

If you do not obey road traffic law, you could face a fine, penalty points and/or a conviction in court.

You might also be disqualified from driving and in some cases have to serve a prison term.

The road safety policies and laws in the country will work with the support of all road users.

**REMEMBER**

*Driving is a life skill that requires lifelong learning.*

For up to date information, visit www.rsa.ie.
Section 1:

Driving licences and categories of vehicles

You must hold a current driving licence or a learner permit before driving any motor vehicle in a public place. You can drive only the type of vehicle for which you hold a licence / learner permit. And you must carry your driving licence / learner permit at all times when driving.

This section describes when and how to apply for or renew a driving licence. It also describes the different categories of vehicle to which the licences apply.

Categories of vehicles and minimum age for a first learner permit

The following table outlines the types of vehicle you may drive under each category of licence / permit and the age you must reach before applying for a first learner permit in the relevant category.

<table>
<thead>
<tr>
<th>License Category</th>
<th>Description of category since 19 January 2013</th>

</tbody>
</table>
| A                | Motorcycles  
Motor tricycles                                                                                           | 24 years or 20 with progressive access |
| B                | Vehicles (other than motorcycles, mopeds, work vehicles or land tractors) having a Maximum Authorised Mass (MAM) not exceeding 3,500 kg, having passenger accommodation for not more than 8 persons and where the MAM weight of the trailer is not greater than 750 kg.  
Quadricycles (other than those covered by AM) are also covered by this category. | 17 years    |
| BE               | Combination of drawing vehicles in category B and trailer where the MAM of the trailer is not greater than 3,500 kg. | 17 years    |
| W                | Work vehicles and land tractors                                                                                   | 16 years    |
| C                | Vehicles (other than work vehicles or land tractors) having a MAM exceeding 3,500 kg, having passenger accommodation for not more than 8 persons and where the MAM of the trailer is not greater than 750 kg. | 21 years or 18 with CPC |
| CE               | Combination of drawing vehicles in category C and trailer where the MAM of the trailer is greater than 750 kg. | 21 years or 18 with CPC |
For further information on CPC, please see page 15.
If you are under 16 years of age you must not use any vehicle in a public place.

Design Gross Vehicle Weight (DGVW) is the term used by manufacturers for the weight of the vehicle together with the maximum load it is designed to carry (including passengers, fuel, cargo and attachments). The design gross vehicle weight is usually shown on a metal plate attached to the vehicle by the manufacturer. This may also be referred to as the Maximum Authorised Mass (MAM).

You must understand the carrying capacity of your vehicle or you are at serious risk of having a crash or causing harm. Overloading will reduce your ability to control your vehicle and is an offence.

Conditions attached to categories

Motorcycles

Holders of the new plastic card-type licence for Category ‘A’ are entitled to drive motorcycles with:

- An engine output of any size.

The old paper-type driving licence for Category ‘A’ entitles the holder to drive a motorcycle with:

- An engine power output of 35kW or less, and a power/weight ratio not exceeding 0.20kW/kg.

The restriction applies for as long as you hold a learner permit for this category.

It is your responsibility to check the power of the motorcycle. If you are in any doubt, consult with the dealer/manufacturer.

Trailers

Cars and trailers

If you hold a Full category B licence, you may tow a trailer only if:

- the total maximum authorised mass (MAM) of the trailer is 750kg or less, or

- the unladen (empty) weight of your towing vehicle is at least the same as the trailer’s MAM, and the combined MAM of the vehicle and trailer is no more than 3,500kg.

When using a car to tow a heavier trailer, you must hold a category BE licence.
Heavier vehicles and trailers

You must hold a Category CE, C1E, DE or D1E Licence if you want to tow a heavier trailer. These are the licences that entitle you to drive the combinations of the towing vehicles and the trailer (see page 12). Equivalent licences issued before 19 January 2013 are EC, EC1, ED or ED1.

Heavy goods vehicles and buses

You must obey the law on tachographs. For full information please see www.rsa.ie.

Driver Certificate of Professional Competence (Driver CPC)

What is Driver CPC?

Driver CPC is a Certificate of Professional Competence for professional bus drivers (categories D1, ED1, D and ED) and professional truck drivers (categories C1, EC1, C and EC).

Since 19 January 2013, these categories are known as categories D1, D1E, D and DE, and for professional truck drivers the categories will be known as C1, C1E, C and CE.

Driver CPC was introduced across the EU in 2008 for professional bus drivers and 2009 for professional truck drivers. The three key aims are to:

- Ensure that all professional drivers have good driving and safety standards and that those standards are maintained throughout their career;
Create a common standard for the training and testing of drivers throughout the EU;
Reduce fatalities and serious injuries on Irish and European Roads.

The Driver CPC and you

New Professional Driver
To become a professional bus driver after 10 September 2008 or a professional truck driver after 10 September 2009 you must take the following six steps:

- Pass a driver theory test and obtain a driver theory test certificate for Category C or D as appropriate;
- Obtain a learner permit in relevant category;
- Pass a 2-hour multiple choice theory test;
- Pass a 2-hour case study theory test;
- Pass a 90-minute practical driving test; and
- Pass a 30-minute practical test.

Once you have completed these steps, you will be issued with a Driver CPC qualification card.

Driver CPC Theory Tests are conducted by the Driver Theory Test Service [see www.dtts.ie].

The driving test and practical CPC tests are carried out at RSA driving test centres and are usually taken one straight after the other.

Already a Professional Driver
If you were already a professional bus driver/holder of category D licence on 10 September 2008 or a professional truck driver/holder of a Category C licence on 10 September 2009, you are automatically entitled to Driver CPC. This is called ‘acquired rights’.
The following vehicles are exempted:

- Vehicles not allowed to go more than 45 kilometers per hour;
- Vehicles used or controlled by the armed forces, civil defence, the fire service and forces responsible for maintaining public order;
- Vehicles undergoing road tests for technical development, repair or maintenance, or of new or rebuilt vehicles which have not been put into service;
- Vehicles used in states of emergency or for rescue missions;
- Vehicles used for driving lessons for anyone who wants to get a driving licence or a CPC;
- Vehicles used for carrying passengers or goods for personal use and not for business; and
- Vehicles carrying materials or equipment that the driver uses as part of their work, as long as driving the vehicle is not the driver’s main activity.

**Learner permit**

A learner permit is issued to allow a person to learn to drive. Before you apply for your learner permit you must pass your driver theory test (see pages 16–18). In the interest of your safety and that of other road users, you must meet certain conditions attached to the learner permit, while you are driving. See Section 2 for more details. A learner permit replaces the provisional licence, which is no longer issued.

You must have a current learner permit to learn to drive and take your driving test. Your permit must be for the same category of vehicle as the one you will use in your test.
Driver theory test

The driver theory test applies to anyone applying for a first learner permit.

You must pass the driver theory test before applying for a learner permit.

The test is designed to check your knowledge of topics such as:
- Rules of the Road
- Risk perception
- Eco-driving
- Hazard awareness
- Good driving behaviour

The CPC theory test is designed to check your knowledge and understanding of all of the above and of ‘safety loading’ and ‘vehicle security’.

The test involves answering questions on a touch screen computer in a test centre. It is carried out by the Driver Theory Test Service.

The driver theory test study materials and CD rom is available from all good book shops and from www.dtts.ie.

You should check that you are using the most up-to-date study material.

All categories of licences are subject to review. To ensure compliance with EU and Irish road safety policy, you are advised to check the website www.rsa.ie regularly.

Applying for a first learner permit

When you apply for your learner permit you must include two signed passport photographs and the fee with your application form. You may also need to give evidence of your identity, unless you hold a driving licence for another category of vehicle or from another country. The following table outlines what else you will need when applying for a learner permit. The categories of vehicles are described in the table on pages 11 to 13.
**First learner permit**

<table>
<thead>
<tr>
<th>CATEGORY OF FIRST LEARNER PERMIT</th>
<th>WHAT YOU NEED</th>
</tr>
</thead>
</table>
| AM, A1, A2, A, B, W              | • Application form  
  • Photograph (2 signed passport size photos)  
  • Fee  
  • Theory Test Pass Certificate  
  • Evidence of Identity  
  • Medical report, if applicable  
  • Eyesight report |
| C1, C, D1 or D                   | • Application form  
  • Photograph (2 signed passport size photos)  
  • Fee  
  • Theory Test Pass Certificate  
  • Medical report (all applicants)*  
  • Proof of full licence for category B vehicle |
| EB or BE from 19/1/13             | • Application form  
  • Photograph (2 signed passport size photos)  
  • Fee  
  • Theory Test, if applicable  
  • Medical report, if applicable  
  • Proof of full licence for category B vehicle |
| EC1, EC, ED1 or ED or CE1, CE, DE1, DE from 19/1/13 | • Application form  
  • Photograph (2 signed passport size photos)  
  • Fee  
  • Medical report (all applicants)*  
  • Proof of full licence for the appropriate towing vehicle (for example category C if applying for a category CE licence) |

* You will also need to have medical assessments from time to time when you have a full licence for these categories and/or when you renew.
Eyesight and medical reports

- You can get eyesight and medical report forms from your local motor tax office or from the Road Safety Authority website, www.rsa.ie.

- A registered doctor or ophthalmic optician must fill in the eyesight report form.

- You must then sign it in front of them.

- A registered doctor must complete the medical report form.

- You must then sign it in front of them.

When you must supply a medical report

Not all applicants need to supply a medical report. However, you must supply one if any of the following statements applies to you.

- You are applying for a learner permit in any of the categories C1, C, D1, D, C1E, CE, D1E or DE.

- You will be 70 years of age or more on the first day the learner permit is being granted.

- You have any of the conditions listed in Appendix 1 at the back of the book.

- You are taking drugs or medications that are likely to affect your driving.

Note:

1. If you suffer from a serious medical condition, for example irregular or abnormally fast or slow heart beat (arrhythmia) that has ever caused you to lose consciousness, then make sure you visit a doctor before you apply for a learner permit or licence.

2. You are not allowed to hold a learner permit if you depend on or regularly abuse mind-altering substances

Talk to your doctor if you have any doubts about your physical or mental fitness to drive.

You can get full details of the conditions attached to a learner permit on the Road Safety Authority website, www.rsa.ie.
Learner permit expiration

No matter what type of motor vehicle you drive, you may get a third and subsequent learner permit only if you show that you have taken a driving test within the previous two years.

If you have not taken the test, you must give either:

- Evidence of a medical condition that prevented you from taking the test, or
- Evidence that you applied to sit your driving test for that category of vehicle.

‘Six month rule’

If you are a first time holder of a learner permit for categories A, A2, A1, B, AM or W, that is, a person not previously having held a learner permit (or whose learner permit has expired by more than 5 years) in the category, you are not allowed to take a driving test for a six month period after the commencement date of the permit. This provision is to allow you gain experience of driving. Research shows that the longer a learner is supervised while driving, the less likely they are to be involved in a collision.

The ‘six month rule’ does not apply to category BE (previously EB).

If you have any questions about getting a learner permit contact the RSA on 1890 416141 or visit our website www.rsa.ie.

Full driving licence

You need a full driving licence for the category of vehicle that you intend to drive. You can drive only the category or categories of vehicle for which the licence is issued.
Applying for your full licence

To apply for your full driving licence, you should send in an application form, two signed photographs, the relevant fee and your current or most recent learner permit.

With the application for your first licence, you must include your certificate of competency to drive (outlined in Section 3). You may also need to supply other documents, such as a medical report, depending on your circumstances. You can get full details from the Road Safety Authority’s website, www.rsa.ie.

Renewing your licence

A driving licence is normally valid for 10 years and you should renew your licence before this period passes. To renew your licence, send in the correct form and fee, two signed photographs and your current or most recent licence. If you are renewing a category C1, CE1, C, CE, D1, DE1, D or DE licence, you must include a medical report.

You should apply to renew your licence not later than three months before it expires.

You can get full details about driving licences from the Road Safety Authority’s website, www.rsa.ie.

Carrying a driving licence

Remember, you must carry your driving licence, or learner permit as appropriate (all categories), with you at all times when you are driving.
Driving legally

Before taking any vehicle on to the road you must be able to answer ‘yes’ to the following questions:

- Are you carrying your driving licence or learner permit?
- Is the motor vehicle taxed?
- Is the tax disc on the windscreen?
- Is the insurance cover up to date and valid to cover you?
- Is the insurance disc on the windscreen?
- If you are learning to drive a category B vehicle that is over four years old but not a taxi, is the vehicle roadworthy and does it have an up-to-date National Car Test (NCT) Certificate on the windscreen?
- If you are using a coach, bus, ambulance, goods vehicle or goods trailer and it is over a year old, does it have a Certificate of Roadworthiness?
- If you are a professional driver are you carrying your CPC qualification card (as required)?
**Tax**

All motor vehicles **must** be taxed before the vehicle is taken on the road.

![Tax Image]

**Insurance**

All drivers **must** have insurance covering them to drive a vehicle in a public place. The law imposes a duty on you to inform the insurance company of relevant information before you drive a vehicle. If you are in any doubt you **should** discuss the matter with the insurance company. It is a serious offence to drive a vehicle that is not insured.

You need to display an up-to-date insurance disc. It is an offence not to have the disc on display.
Vehicles that do not need to display an insurance disc

- Motorcycles (with or without a side car)
- Tractors
- Vehicles showing a trade licence
- Vehicles owned or used by an exempted person as defined by the Road Traffic Acts, for example members of emergency services

All trailers must be covered by third party motor insurance. This applies whether the trailer is being towed or parked in a public place.

Even though the trailer does not have to display an insurance disc, you must have valid insurance cover.

National car test

Vehicle testing makes sure your vehicle is safe to use on the road. This is especially important for older vehicles.

- Passenger cars over four years old must have a valid NCT Certificate and show the NCT disc on the windscreen.

If you would like more information on the NCT, visit www.ncts.ie or phone 1890 200 670.

Certificates of Roadworthiness

- Goods vehicles, goods trailers with a design gross vehicle weight of more than 3,500kg, ambulances, buses (including minibuses) and coaches that are over one year old, must have a valid Certificate of Roadworthiness.
  
  For details of your local authorised testing centre, please see www.rsa.ie.

Certificate of Professional Competence

Professional bus and truck drivers must also carry their Driver CPC qualification card.

If you held a full bus driver’s licence before 10 September 2008, you will need to carry a driver qualification card from 11 September 2013.
If you held a full truck driving licence before 10 September 2009, you will need to carry a driver qualification card from 11 September 2014.
The Road Safety Authority has produced a suite of manuals to help learners as they learn to drive a car, a truck or a bus, or ride a motorcycle.

**Conditions for learner permit holders**

When you are a learner driver you **must**, in addition to answering yes to the questions on page 23, comply with the following conditions:

1) **Accompanied when driving**
   - A holder of a learner permit for categories B, BE, C, C1, C1E, CE, D, D1, D1E and DE **must** be accompanied and supervised at all times by a qualified driver. A qualified driver is a person who has held a full driving licence in the same category for a continuous period of 2 years.
   - A holder of a learner permit for category AM, A1, A2 and A, as well as a certificate of satisfactory completion of Initial Basic Training (IBT) is **not** required to be accompanied.

2) **‘L’ Plates**
   - Learner permit holders for all categories (except W) **must** display ‘L’ plates while they are driving.
   - Learner permit holders for categories A,A1 (and A2 from 19/01/12) and M(AM)(Motorcycles and Mopeds) **must** display ‘L’ plates on a yellow fluorescent tabard that is clearly visible on the front and back.

3) **Essential Driver Training and Initial Basic Training**

   It is illegal to give driving instruction for hire or reward to learner drivers if you are not registered with the Road Safety Authority. A list of all Approved Driving Instructors (ADI) is available on www.rsa.ie.
4) Car Driver Training

All holders of their first learner permit issued from 4 April 2011 must undertake Essential Driver Training (EDT) with an Approved Driving Instructor (ADI). [See www.rsa.ie for an up to date list of ADIs.]

EDT is a training course that teaches fundamental driving skills to learner car drivers. The course is made up of 12 individual one hour lessons.

At your first EDT lesson your ADI will check your learner permit, and if you are using your own car, will check to make sure your insurance, motor tax, NCT and roadworthiness of the vehicle are all in order. In addition your ADI will give you your official EDT logbook which you are responsible for and should take along to each lesson. The logbook must be completed including an official stamp and instructor’s signature.

A Sponsor is a qualified driver who must supervise any driving practice outside of formal lessons and track practice sessions in your logbook.

Be sure to confirm with your ADI what type of lesson you are booking for your next lesson. Not all lessons are EDT!

5) Motorcycles and Initial Basic Training

Since 6 December 2010 all new first time learner permit holders for motorcycles must undertake Initial Basic Training (IBT) with an approved IBT instructor, before they can ride a motorcycle unsupervised.

IBT is a training course that teaches basic riding skills to learner motorcyclists. IBT is a 16-hour course broken into 4 modules focusing on theory and practical skills, to be taken in sequence.

When you have completed each IBT Module of your IBT course, your instructor will record the details of your training in your logbook. Once all modules have been completed, your ADI will issue you with a Certificate of Satisfactory Completion.

You must keep your Certificate with your learner’s permit and carry it with you whenever you are riding as you may be asked to produce it by a member of An Garda Siochana.

You can then apply for your practical driving test.

[If you want to upgrade the bike you ride you may need to complete a ‘progression module’. Visit www.rsa.ie for more details.]
Until they hold their full licence motorcyclists must carry their IBT certificate when motorcycling without an IBT trainer.

6) Motorways
As a learner permit holder you must not drive on a motorway. It is an offence to do so.

7) Trailers
Learner permit holders driving vehicles in Categories B, C, C1, D or D1 (cars, buses or trucks) must not tow a trailer.

8) Carrying Passengers
A person who holds a learner permit for:
- Any category must not carry any passenger for reward.
- A person who holds a learner permit for category W (for example, a work vehicle or land tractor) must not carry a passenger unless the vehicle is constructed or adapted to carry a passenger and the passenger is a qualified driver.
- A person who holds a learner permit for category A1, A2, A or AM (motorcycle or moped) must not carry a passenger.

9) Motorcycles
Category A2 learner permit holders are entitled to drive motorcycles with:
- An engine power output of 35KW or less, or
- A power/weight ratio of 0.16W/kg or less.

It is your responsibility to check the power of the motorcycle. If you are in any doubt, consult with the dealer/manufacturer.
Learner permit expiration

No matter what type of motor vehicle you drive, you may get a third and subsequent learner permit only if you show that you have taken a driving test within the previous two years.

If you have not taken the test, you must give either:

- Evidence of a medical condition that prevented you from taking the test, or
- Evidence that you applied to sit your driving test for that category of vehicle.

If you are a first time holder of a learner permit for categories A, A2, A1, B, AM (M) or W, that is, a person not previously having held a learner permit (or whose provisional licence/learner permit has expired by more than 5 years) in the category, you are not allowed to take a driving test for a six month period after the commencement date of the permit. This provision is to allow you gain experience of driving. Research shows that the longer a learner is supervised while driving, the less likely they are to be involved in a collision.

**REMEMBER**

The drink drive limit for learner, newly qualified drivers (for a period of two years after passing the driving test) and professional drivers such as bus, goods vehicle and public service vehicle drivers (PSV) is 20 milligrams (mg) of alcohol per 100 millilitres of blood.

Never ever drink and drive.
Section 3:
The driving test

How to apply for your driving test

Once you have learnt to drive safely and completed mandatory training (EDT for category B or IBT for Category AM (M), A1, A2 or A) the next step is to apply for your driving test.

NOTE: bus drivers and truck drivers should refer to page 15 for the CPC Driving Test.

You can apply and pay for your driving test online at www.rsa.ie. You will need a credit or debit card together with a valid email address to complete the application online.

Alternatively, you can download a driving test form from www.rsa.ie or obtain one from your local Garda station or Motor Tax Office. Send the completed form, with a cheque, postal order or money order made payable to the Road Safety Authority to:

Driver Testing Section
Road Safety Authority, Moy Valley Business Park, Primrose Hill, Dublin Road, Ballina, Co. Mayo.

REMEMBER

To take a Driving Test you must comply with the following requirements:

- Hold a Learner Permit for the vehicle in which you wish to be tested;
- Comply with the 6 month rule, that is, you must have held a valid Learner Permit for at least 6 months on the day of the test (this applies to cars, motorcycles and work vehicles);
- Learner Permit holders in Category BE (EB) (Car/van and trailer) do not need to wait 6 months before undergoing practical driving test in that category;
- Have use of a suitable vehicle;
If your first Category B learner permit was issued on or after 4 April 2011 you must have completed an Essential Driver Training (EDT) course;

If your first Category A type learner permit was issued on or after 6 December 2010 you must have completed an Initial Basic Training (IBT) course.

What you need to do on the day of the test

- Use the correct vehicle for your test.
  - Under current regulations specific guidelines set out the minimum requirements that determine whether or not a vehicle is acceptable for use by you during a driving test (see appendix 5). You will be advised of the vehicle requirements on the appointment notice. However, if you have any concerns, please refer to www.rsa.ie where full details are available.

- Make sure your vehicle displays:
  - a current valid motor tax disc,
  - an NCT disc for vehicles obliged to pass the National Car Test (see page 25),
  - proper ‘L’ plates at the front and back, (other than Category A, A1, A2 and M or AM where you wear it on your person), and
  - a current valid insurance disc (except if you are being tested in a category A, A1, A2, M or AM and W vehicle).

- Make sure your vehicle is roadworthy.

- Be in the test centre at least 10 minutes before your test appointment time.

- Give the driver tester your current Irish learner permit. The tester will check the permit to confirm that it relates to you, is current and is for the correct category of vehicle.

- Read checklist on www.rsa.ie entitled ‘Final Checks for Your Driving Test’.

Your test will be cancelled and you will lose your fee if:

- you are late,
- your vehicle does not show the correct discs or L plates,
your vehicle is not roadworthy, or

- you do not have the correct vehicle for your test (see Appendix 5).

You can get more information from www.rsa.ie.

The driving test

The driving test will determine if you have the skills necessary to progress to being a full driving licence holder. It includes questions on the Rules of the Road and how your vehicle works. The test assesses your driving skills while you drive in different road and traffic conditions.

The driver tester will evaluate your driving skills using the Driving Test Report Form. A complete version of this form is in appendix 6.

Before undergoing the test you **should** have achieved a level of knowledge and skill that will satisfy the tester that you are entitled to a full licence.

The requirements for the test process will change on an ongoing basis and to make yourself aware of any changes, visit www.rsa.ie.

The following table highlights some recent changes. Some requirements apply to more than one type of vehicle.

<table>
<thead>
<tr>
<th>IF YOU ARE BEING TESTED FOR:</th>
<th>CATEGORY</th>
<th>YOU MUST KNOW HOW TO</th>
</tr>
</thead>
</table>
| A Car                       | B        | • Demonstrate technical checks.  
|                            |          | • Work the secondary controls.  
|                            |          | • Adjust the seat, seat-belt, head restraint, mirrors and ensure the doors are closed. |
| A Motorcycle                | AM (previously M), A1, A2, A | • Demonstrate technical checks.  
|                            |          | • Remove and replace the machine from its stand.  
|                            |          | • Adjust your protective outfit. (personal safety equipment).  
|                            |          | • Move the motorcycle without the aid of the engine. |
| A Trailer                   | BE (EB)  | • Demonstrate technical checks.  
|                            |          | • Connect and remove the trailer to or from your vehicle.  
|                            |          | • Reverse up to a loading bay. |
Secondary controls and technical checks

Work the secondary controls, such as windscreen wipers and washers, demisters, rear window heater, lights and air-conditioning, fans, rear foglights, air vents and temperature control.

Demonstrate technical checks such as air pressure and the condition of tyres, oil, fuel, windscreen washer fluid level, coolant, brakes (including handbrake), steering, lights, indicators, reflectors and horn.

The Driving Test Report Form explains the technical checks and the secondary controls in detail. Make yourself familiar with the content of the Driving Test Report Form. See appendix 6.

Motorcyclists are further tested on: control of speed, control when braking and obstacle avoidance.

How long does the test last

The test for categories A, A1, A2, B, EB (BE), M (AM) and W vehicles lasts about 40 minutes and assesses your driving skills over a distance of approximately eight to ten kilometres.

The test for vehicles in other categories lasts about 70 minutes and assesses your driving skills over about 20 kilometres.
What happens when your test is finished

If you pass, the tester will give you a Certificate of Competency to drive. You should change it for your full driving licence as soon as possible.

If you are not successful, you will receive a detailed report on the faults that occurred during the test. When you are preparing for your next test, pay particular attention to these faults while continuing to work on other areas of your driving.

What to do if you are not happy with your test result

If you were not successful and believe that your driving test was not conducted properly or fairly, you may appeal the tester’s decision to the District Court. The District Court may either refuse the appeal or, if it concludes that the test was not properly conducted, direct the Road Safety Authority to give you another test free of charge.

For more information on the driving test, please read the leaflet Preparing for your Driving Test. This is available at www.rsa.ie.

From January 2013 it may be possible, in certain circumstances, to progress to a higher category of driving licence for motorcycles without having to undergo an additional driving test. This is known as ‘progressive access’.

At the age of 24 years a rider may also proceed directly to a large unrestricted motorcycle. This is known as ‘direct access’.
Section 4:
Vehicle safety

There are standards set by law for the condition of your vehicle. You must know these standards and make sure your vehicle complies with the law. This section sets out the basic information you need to know. For further information on the testing of your vehicle please see www.rsa.ie.

As a driver, you must make sure that your vehicle is in good working order. You must ensure that the steering, brakes, front and rear lamps, reflectors, rear view mirrors, safety belts, speedometer, tyres, windscreen wipers, horn and silencer are checked regularly.

The RSA advise motorists that it would be useful to have the following items available for use in your vehicle:

- a first aid kit
- a fire extinguisher
- at least 2 high-vis vests or jackets (fluorescent and reflective)
- 2 red warning triangles
- a torch

The above are examples of items that might be useful in an emergency. You might choose to carry other items that you feel might be helpful.

**REMEMBER**

*It is an offence to drive an unsafe vehicle on a public road.*

Motor vehicles must be tested for their roadworthiness. This section sets out the minimum standards required for your vehicle. You should check the following on a regular basis:
Tyres

**Tread depth**: Do not allow your tyres to wear down too much. Most vehicles on the road **must** have a minimum tread depth of 1.6 mm over the main treads. For motorcycles and vintage vehicles the minimum tread depth is 1 mm. However, make sure you replace your tyres before they become this worn.

**Pressure**: Regularly check the pressure of every tyre, including the spare tyre, and pay attention to the recommended pressure levels.

**Checking for damage**: Regularly examine your tyres for cuts, cracks and bulges, which could cause unexpected ‘blow-outs’.

**Replacing tyres**: For your safety only fit new and e-marked tyres bought from a reputable dealer. Do not mix radial and cross ply tyres on any one axle.

**Temporary use (space saver) spare tyres**: Only use these tyres to complete a journey or make a journey to a tyre dealer. Do not travel at a speed in excess of the recommended speed stamped on the tyre.

---

**REMEMBER**

Use of secondhand tyres can be risky because there is no history of how they have been used.

---

**Lights and reflectors**

Motor vehicles (except motorcycles or electric vehicles with a maximum speed of 38km/h) **must** have the following lights and reflectors:
At the front:
- Two headlights (white or yellow)
- Two white sidelights
- Direction indicator lights (amber only)

At the back:
- Two red lights (commonly known as tail lights)
- Two red brake lights
- Two red reflectors
- Number plate lighting
- Direction indicator lights (amber only)
Remember:

- You **must** use fog lights only in dense fog or falling snow. Turn them off in clear weather or you will risk causing glare and may dazzle other drivers.
- You may fit high mounted rear brake lights if you wish, but fitting other optional lighting is controlled by law.

Sections 16, 17 and 20 deal with the required lighting for motorcycles, bicycles and horse drawn vehicles.

Before you change or alter the physical appearance of your vehicle, for example by fitting spot lights, bull bars or ornaments, take care not to increase the risk to road users, in particular the more vulnerable ones, for example cyclists and pedestrians.

You **must not** fit blue or red flashing lights which are solely reserved for Gardaí, ambulance and other designated service vehicles. See [www.transport.ie](http://www.transport.ie) for details.

You **should not** make any technical modifications to your vehicle without professional advice as these may have legal and safety implications.

You **should** also inform your insurance company, as some modifications can invalidate your insurance policy.

---

**REMEMBER**

Your lights, reflectors, number plate lighting and direction indicators will be effective only if you keep them clean and in good working order.

---

**REMEMBER**

Please note that specific reflective markings must be displayed on HGVs and their trailers. Please see [www.rsa.ie](http://www.rsa.ie) for further information.
Windscreens

**Type of windscreen:** Laminated glass **must** be used for the windscreens of motor vehicles registered since January 1986. It **must** also be used when replacing damaged windscreens of older vehicles.

**Windscreen wipers:** Keep your windscreen wipers and wiper blades in good working condition and keep your windscreen washer liquid topped up.

**Clear vision:** Keep your windscreen and windows clean and free of clutter to make sure you can see the road and other road users clearly.

Mirrors

Your vehicle **must** have mirrors fitted so that you always know what is behind (rear-view) and to each side (door or wing mirrors).

On large vehicles the fitment of a front mirror, known as a Cyclops mirror, has the potential to reduce fatalities and serious injuries from collisions between HGVs and cyclists or pedestrians.

HGVs and buses **must** have Cyclops and wide-angle mirrors to eliminate ‘blind spots’ and protect pedestrians and cyclists to the front and sides of the vehicles.

**Note:**

HGVs registered after 2007 are obliged to have these safety enhancing mirrors.

From 1 October 2012, the HGV annual roadworthiness test includes a check for conformance with the new regulations.

Further details are available at [www.rsa.ie](http://www.rsa.ie).

Additional information is also available from vehiclestandards@rsa.ie or alternately at 096-25014

When to use mirrors: You **must** use your vehicle’s mirrors before signalling, when moving off, changing lanes, overtaking, slowing down, stopping, turning, or opening doors.

In addition you **should** check your mirrors regularly whilst driving to maintain a picture of what is going on behind your vehicle.

Clear vision: As with lights an reflectors, you **must** keep your mirrors clean, in good condition and correctly positioned to make sure they are effective.
Safety belts

You must wear a safety belt. The only exceptions are for:

- people who wear a disabled person’s belt,
- people whose doctors have certified that, on medical grounds, they should not wear a safety belt,
- driving instructors or driver testers during a lesson or a test, and
- Gardaí or members of the defence forces in the course of their duty.

Private buses and heavy goods vehicles registered since 20 October 2007 must have seat belts fitted.

Bus owners are required to present documentation at their roadworthiness test certifying that the seat belts, where fitted to their vehicle, meet a minimum standard.

Since October 2011, all buses involved in the organised transport of children are required to be fitted with certified seat belt installations. This requirement does not apply to the transport of children on bus services offered to the general public (scheduled urban or inter-urban bus services).
**Child restraint systems**

Safety belts are designed mainly for adults and older children. Child safety protection laws make it compulsory for all children to use the correct child seat, booster seat or booster cushion. Smaller children – under 150 centimetres and less than 36 kilograms – **must** be restrained in an appropriate child restraint system when travelling in a passenger car or goods vehicle. Examples of appropriate restraint systems are baby car seats and booster seats.

You **must** comply with the following:

- Where safety belts have been fitted, they **must** be worn.
- Children under 3 years of age **must not** travel in a car or goods vehicle (other than a taxi) unless restrained in the correct child seat.
- Children aged 3 years or over who are under 150cms in height and weighing less than 36 kilograms (generally children up to 11/12 years old) **must** use the correct child seat or booster cushion when travelling in cars or goods vehicles.
- Children over 3 years of age **must** travel in a rear seat in vehicles not fitted with safety belts.
- A rearward-facing child car seat **must not** be used in the front passenger seat of cars with active airbags.
- A child car seat **must** be in accordance with EU or United Nations – Economic Commission for Europe (UN-ECE) standards.
- Make sure passengers aged under 17 use the correct seat, booster seat, booster cushion or seatbelt. **All drivers are legally responsible for this.**
Ensuring a child is properly restrained in a child car seat can reduce injuries by a factor of 90-95% for rear-facing seats and 60% for forward-facing seats*.

*Source: AA Motoring Trust
What to remember when using child restraints

- Use the correct restraint for each child.
- Use the child seat for every journey, no matter how short.
- For young children, choose a seat that:
  - bears an E mark (meaning that it meets United Nations Standard ECE Regulation 44 03),
  - suits the child’s weight and height, and
  - is suitable for the type of car.
- The best advice is not to buy or use a second hand car seat.
- Fit the child seat correctly, according to the manufacturer’s instructions.
  It is safer to fit the seat in the back seat of your car.

It is recommended that you buy a child car seat only from a retailer who will check it fits. Make sure it fits your child and your car. For further information go to www.rsa.ie.

Restraints for passengers under 17

By law, the driver of a passenger car or goods vehicle must ensure passengers under 17 years of age wear a safety belt or an appropriate child restraint. You may receive up to 4 penalty points if your passengers in this age group are not belted or restrained.

If you would like more information, you can get a booklet and DVD called Child Safety in Cars from the Road Safety Authority. Lo-Call 1890 50 60 80.
Roof racks and roof boxes

If you use a roof rack or roof box, you must:

- securely fit it to your vehicle,
- make sure that the load does not block your view of the road in any direction,
- never overload it,
- never place the load in a way that might cause it to fall off, and
- never load the rack or box in a way that would destabilise your vehicle.

To be safe, you are strongly advised to check that the roof rack or box is correctly mounted and the load is completely secured before you set off. These checks also apply if you are using a rear or roof-mounted bicycle rack.

Vehicle registration plates

The law sets down what vehicle registration plates must look like. The two diagrams below show the only formats that are allowed for vehicles registered in Ireland on or after 1 January 1991.

Diagram 1:

![Diagram 1](https://example.com/diagram1.png)

Diagram 2:

![Diagram 2](https://example.com/diagram2.png)

Vehicle registration plates must be kept clean and legible. All numbers and letters must be in plain black text on a plain white reflective background. There should be no italics or shadows. You must not interfere with a registration plate.

If you would like more information on vehicle plates, you can get a leaflet from the following page on Revenue’s website: [www.revenue.ie/leaflets/carplate.pdf](http://www.revenue.ie/leaflets/carplate.pdf).
Other safety responsibilities

As a driver, you have a number of other responsibilities to your passengers.

Children in motor vehicles

You must not leave infants or young children on their own in a motor vehicle, even if you are away for a short time. The children may face a number of hazards, such as:

- a fire breaking out,
- difficulty in breathing on a warm day (if all windows are closed), and
- being trapped in electric windows, which could result in serious injury or death.

Animals in motor vehicles

You should never leave animals alone in vehicles. It is cruel and unsafe and can result in injury to the animal and/or damage to your vehicle.

Using a mobile phone

You must not drive a vehicle or ride a motorbike while using a hand-held mobile phone. It is an offence, for which you will receive up to 4 penalty points and a fixed charge of €60 to €90.

Cyclists should never use a mobile phone when cycling and pedestrians should be careful when using one.

Personal entertainment systems

As a road user, you should avoid using personal entertainment systems through earphones. These systems, for example personal radios and MP3 players, can distract you, and may prove dangerous when driving or crossing the road. Cyclists in particular should avoid these systems, as they rely on their hearing while on the road.

If you do use a personal or in-car system, play it at a volume that does not distract or prevent you from hearing emergency sirens or car horns.
Section 5:

Good driving practice

This section describes how to do the most common driving manoeuvres safely and with consideration for other road users. It focuses on:

- moving off,
- your position on the road,
- changing traffic lanes,
- overtaking,
- reversing,
- u-turns,
- slowing down or stopping,
- towing,
- day time running lights,
- driving at night, and
- using a horn.

Moving off

- Before moving off carry out the following safety checks:
  - all doors, the bonnet and the boot are closed,
  - your seat and head restraint are properly adjusted,
  - your rear view mirrors are clean and properly adjusted, and
  - all safety belts (yours and those of your front-seat and back-seat passengers) are fastened.
- When moving off from the kerb you must signal and give way to other traffic as well as any pedestrians.
When the way is clear, move out and adjust your speed to that of the normal safe and legal flow of traffic.

Always look in your mirror but remember that there are blind spots, so always check over your shoulders as well. Traffic and pedestrians may be coming up beside your vehicle. When moving off from a stationary position check your blind spots by looking around you.

When you are ready to move off, check your mirrors, signal your intention to move out into traffic.

**Your position on the road**

Make sure you drive your vehicle far enough to the left to allow traffic to safely pass or overtake on the right but not so far to the left that you are driving on a cycle lane or blocking or endangering cyclists or pedestrians.
What to do if you need to change your position

- If you are overtaking, turning right or passing pedestrians, cyclists, horse riders or other road users or parked vehicles, make sure it is safe to do so.
- Always check in your mirror for any vehicles coming up on your right or overtaking from behind, and don’t forget to check your blind spots.
- Give a clear signal to warn traffic in good time of your intentions and proceed.

Taking care with buses and pedestrians

You should allow signalling buses back into the stream of traffic after they let passengers on and off. Be especially careful of pedestrians getting on and off buses and of children near schools, and when near schools always be prepared to stop. It is advisable to drive your vehicle in a defensive manner, be prepared to stop, sound the horn and brake. Always expect the unexpected.

Taking care with cyclists

If you are at a junction where there is an advanced stop line for cyclists, you should allow cyclists to move off ahead of you.

When turning left, all drivers, especially drivers of heavy goods vehicles, must watch out for cyclists and motorcyclists going ahead or turning.
On left turns, watch out for cyclists and mopeds close to the kerb in front of you or coming up on your left. Do not overtake a cyclist as you approach a junction if you are turning left; the cyclist might be continuing straight ahead.

You should give extra space when overtaking a cyclist, as they may need to avoid uneven road surfaces and obstacles. This is particularly important on wet or windy days.

**Changing traffic lanes**

Don’t move from one traffic lane to another without good reason.

You must give way to traffic already in the lane into which you are moving.

**REMEMBER**

Signalling does not give you the right of way.
How to change lanes safely

- If you have good reason to change lanes, use your mirrors and check in plenty of time to ensure that the way is clear. To check your blind spot when travelling at speed, take a quick sideways glance to check the position of a vehicle that may have disappeared from your view in the mirror.

- Signal your intention and change lane when it is clear and safe to do so.

- When in a lane or approaching a junction, obey any road signs or markings (usually arrows) indicating the direction that traffic in those lanes must take.

Overtaking

Only overtake if it is safe for you and other traffic. Be particularly careful of features that may hinder your view of the road ahead, such as hills, dips, bends, bridges, roads narrowing or pedestrian crossings. Pay attention to the rules on road signs or markings (continuous, broken, single, double white lines) covered in Section 6.

How to overtake safely

- Make sure the road ahead is clear so you have enough distance to allow you to overtake and get back to your own side of the road without forcing any other road user to move to avoid you.

- Never directly follow another overtaking vehicle.

- Give way to faster traffic already overtaking from behind.

- Before overtaking check that the way is clear, check in your mirror and blind spots to ensure another vehicle is not approaching from behind. Give your signal in good time, move out when it is safe to do so, accelerate and overtake with the minimum of delay.

- When you are well past, check the mirror, signal and gradually move in again making sure not to cut across the vehicle you have passed.
Take extra care when overtaking a vehicle displaying a ‘LONG VEHICLE’ sign. This means that the vehicle is at least 13 metres long and you will need extra road length to pass it and safely return to the left-hand side of the road.

You must not break the speed limit, even when overtaking.

REMEmBER

You must normally overtake on the right. However, you are allowed to overtake on the left in the situations listed below.

You may overtake on the left when

- You want to go straight ahead when the driver in front of you has moved out and signalled that they intend to turn right.
- You have signalled that you intend to turn left.
- Traffic in both lanes is moving slowly and traffic in the left-hand lane is moving more quickly than the traffic in the right-hand lane.
You must not overtake when

- You are at or near a pelican crossing, zebra crossing or at pedestrian signals.
- A traffic sign or road marking prohibits it.
- You are approaching a junction.
- You are on the approach to a corner, bend, dip in the road, hump-back bridge, brow of a hill or on a narrow road.
- You are in the left-hand lane of a dual carriageway or motorway when traffic is moving at normal speed.
- At any other time, to do so would cause danger or inconvenience to another road user.

What to do when somebody overtakes you

- Continue at the same pace.
- Keep as near to the left as is safe to do so.
- Do not accelerate.
- Be alert in case the overtaking vehicle suddenly pulls back in front of you.

Reversing

How to reverse safely

- Check for nearby pedestrians and traffic by looking carefully all around, in front of and behind you, over both your shoulders and in your mirrors.
- Take special care where small children may be gathered, such as schools, playgrounds, residential roads, car parks or your own driveway.
- If your view is restricted, ask for help when reversing.
- Give way to other traffic or pedestrians.
When reversing from a major road onto a minor road, wait until it is safe, reverse slowly far enough into the side road to allow you to take up the correct position on the left-hand side when rejoining the major road.

- Take extra care when reversing in darkness.
- If you are in doubt get out of your vehicle and check the area.
- You must not reverse from a minor road onto a major road as it is unsafe to do so.

U-turns

You must not make a U-turn unless traffic conditions make it completely safe to do so.

- Check there are no signs or road markings prohibiting a U-turn, for example a continuous centre white line.
- Check that the road is not one way.
- Look for a safe place, where you can see clearly in all directions.
- Give way to all other road users.
- Check carefully for cyclists and motorcyclists.
- Do not delay or prevent pedestrians from crossing safely.
- Make sure there is sufficient room to complete your manoeuvre safely and smoothly.

(See Section 9 for rules/guidelines on turning)
Slowing down or stopping at the side of a road

- Check in your mirror to make sure you can slow down and stop safely.
- Signal your intention to change course and pull in.
- Signal your intention to slow down either through the brake lights or by moving your right arm up and down outside your vehicle window (shown below) if you think your brake lights might not be seen or working. If not working have them repaired immediately.

Use a traffic lay-by if one is provided or pull in and stop close to the left-hand edge of the road.

Towing

If you are towing another vehicle or a trailer (including a boat trailer or a caravan) remember the following points.

- Make sure the tow bar or other towing device is strong enough and attached securely so that it does not break or become loose when used.
- Make sure the safety breakaway cable is in place and secured.
Do not allow a distance of more than 4.5 metres (about 15 feet) between the vehicles or the vehicle and the trailer.

If more than 1.5 metres separates the vehicles, use some warning device such as a white flag of at least 30 centimetres squared to draw attention to the tow bar.

If towing a vehicle that has its own steering gear, make sure somebody remains in it to take charge of the steering.
If towing a vehicle the person who steers it **must** hold a licence to drive the same category of vehicle.

- Make sure a trailer is fitted with brakes if it has a Maximum Authorised Mass (MAM) of more than 750kg or is more than half the laden weight of the drawing vehicle (whichever is lower).

- A combination of vehicles or an articulated vehicle more than 13 metres long **must** display a ‘LONG VEHICLE’ sign or signs on the back of the last trailer.

- You **must** mark any loads sticking out more than 1 metre from the back of the trailer with a red flag or marker board during the day. If you are towing this type of load at night, mark it with a red reflector and red lights.

- If the load is sticking out to the side and you are towing it at night, mark it with a light or lights showing a white light to the front and a red lights to the back.

### Driving at night

Make sure your lights, indicators, reflectors and number plate lighting are clean and in good working order so that you can see clearly and be seen at all times. A clean windscreen is also important when driving at night.

You **must** drive at a speed that allows you to stop within the distance covered by your lights. Assuming good driving conditions on an unlit road, the headlights of a typical car let you see for about 100 metres. Dipped lights will let you see for about 30 metres and a car travelling at 100km/h will cover this distance in approximately a second.

Keep your headlights adjusted properly. If they are out of line, they are less effective and may dazzle oncoming traffic, even when dipped.

Even with the best headlights, you can see less at night than during the day. Pedestrians and unlit bicycles are extremely difficult to see in the dark, particularly if you have to deal with the glare of oncoming lights.

Some junctions are marked with special coloured studs and/or delineator posts to help road users determine where a junction is as they approach in the hours of darkness or during periods of poor visibility.
Daytime running lights

Day time running lights refers to driving with dipped head lights during daytime. The use of dipped headlights can help reduce the number of deaths and serious injuries on our roads.

If your vehicle is not fitted with daytime running lights, it is advisable to drive with your dipped headlights on during the daytime.

When to use headlights

If conditions require you to use headlights to drive safely, you must use them. Use dipped headlights at night or main beam headlights as appropriate. When in doubt, turn them on. Make sure that the red lights and number plate lighting at the back of your vehicle are working.

- Use dipped headlights:
  - just after the beginning (dusk) and before the end (dawn) of lighting-up hours,
  - as long as they are needed to let you see clearly,
  - when stopped in traffic,
  - when meeting other traffic,
  - in built-up areas where there is good street lighting,
• on continuously lit roads outside built-up areas,
• when following behind another vehicle,
• where there is dense fog, falling snow or heavy rain,
• when daylight is fading, and
• generally to avoid inconveniencing other traffic.

It is good practice to use dipped headlights or dim/dip lights, where fitted, instead of only sidelights in built-up areas where there is good street lighting.

- Use **main beam** headlights in situations, places and times outside of those listed above.
- Use **fog lights** only during dense fog and falling snow. You **must** turn them off at all other times.

**What to do if you are dazzled by another vehicle’s headlights**

- Slow down and stop if necessary.
- Always watch for pedestrians or cyclists on your side of the road.
- If the dazzle is from an oncoming vehicle, avoid it by looking towards the verge (edge of your side of the road) until the vehicle has passed. If the dazzle is from a vehicle behind you and reflected in your mirror, operate the night-driving mode on the mirror.
Driving carefully behind other vehicles

Section 8 covers the importance of keeping a safe distance behind vehicles in front of you. In particular, don’t drive on the tail lights of the vehicle in front. It gives a false sense of security and may lure you into driving too close or too fast, or both. If you see red vehicle lights in front of you, dip your headlights to avoid dazzling the driver of the vehicle ahead.

Using a horn

Only use a horn to:

- warn other road users of on-coming danger, or
- make them aware of your presence for safety reasons when reasonably necessary.

Remember, the horn does not give you the right of way.

Do not use a horn in a built-up area between 23.30hrs and 07.00hrs unless there is a traffic emergency.

**REMEMBER**

You must drive having due regard to other road users.
You **must** know what traffic signs and road markings mean before you attempt to drive on a public road. This section focuses on the signs that you as a driver will come across most often. Sections 21 to 25 covers a range of the most important signs currently used on Irish roads.

You **must** know and understand these signs and respond correctly when you see them on the road.

Traffic signs and roadway markings are divided into three broad categories:

- Regulatory,
- Warning, and
- Information.

Sometimes signs from different categories are used together to improve road safety.

Different types of signs are used for bus and cycle lanes, motorways and railway crossings and bridges. There is also a special series of warning signs for road works. These are all outlined at the end of this section.
Regulatory signs

These indicate what you must do under road traffic law, so all road users must obey them. Regulatory signs are divided into a number of groups:

- Upright signs;
- Road markings; and
- Traffic lights.

This section concentrates on regulatory upright signs and road markings. Section 7 covers traffic lights in detail.

Upright signs

What they look like.

These generally come in two formats. Their shape can be circular, octagonal, triangular or rectangular, as shown in the examples below:

- a white background with a red border and black letters, symbols or numbers, and
- a blue background with white symbols or letters.
The sign below applies to drivers of HGVs and large non-passenger vehicles. It means that vehicles with the number of axles shown (or more) cannot use the road during the times shown without a permit. You **should** check the information plate and/or the permit to confirm the time limits and any restrictions that apply.
Stop and Yield signs

As you can see from the diagram, the Stop upright sign is a red octagon with a white border. It is the only regulatory sign of this shape. Stop signs appear at junctions with major roads. If you approach a Stop sign, you must stop completely before entering the major road, no matter how quiet it might appear.

The Yield upright sign shown is just one version of this sign. Other versions are the same shape and colour but might say ‘Yield Right of Way’, or ‘Géill Slí’. If you see a Yield sign on the road, usually near a junction or roundabout, you must give way to any traffic on a major road ahead and you must not proceed out onto the main road until it is safe to do so. It is better to be safe than sorry, make sure you allow enough time to complete your manoeuvre.
One-way streets

When you are approaching a one-way street, you may see one of two regulatory signs. If you are at the entrance to a one-way street, you will see the ‘Proceed Straight Ahead’ regulatory sign. If you are approaching the ‘wrong’ end of a one-way street, you will see the regulatory road markings shown below to indicate ‘No Entry’ and you must not enter past those markings.

You may also see an upright ‘No Entry’ sign with the road markings.

Driving in a one-way street

Even though all traffic on a one-way street is travelling in the same direction, you should still drive on the left-hand side. You may leave the left-hand side only if you intend to overtake or turn right up ahead. You may drive on either side of a traffic island, but take note of arrow markings on the road.

Only change lanes if you have to. If you have to change lanes, check your mirrors and blind spots for any traffic coming up behind or overtaking you. When the way is clear, signal your intention and move, giving way to any traffic already in the lane.
When turning right from a one-way street, drive as close as you can to the right-hand side.

Remember that the road at the end of a one-way street may be two-way. You may see the warning sign below if it is.

![Two-way traffic sign](image)

**Streets for pedestrians**

The regulatory sign below shows that the street is closed to all road users except pedestrians at the time shown on the information plate underneath.

![Pedestrianised street sign](image)

**Road markings**

Road markings are a traffic sign in the form and design of a marking on the surface of the road. They have the same standing as upright signs. Road users must obey these road markings.

The diagrams below show the most common types of road marking and what they mean.
### ROAD MARKINGS

<table>
<thead>
<tr>
<th>ROAD MARKINGS</th>
<th>WHAT THEY MEAN</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single or double continuous white lines along the centre of the road</td>
<td>All traffic must keep to the left of the line (except in an emergency or for access).</td>
</tr>
<tr>
<td>Longer white lines / warning lines along the centre of the road</td>
<td>These warning lines alert drivers to hazards such as restricted vision, approach to a junction, approach to a roundabout, a hill, crests, bends and continuous white line ahead.</td>
</tr>
<tr>
<td>Short broken white lines along the centre of the road</td>
<td>These divide two lanes of traffic travelling in opposite directions. You must not cross them unless it is safe to do so.</td>
</tr>
<tr>
<td>Double broken white lines along the centre of the road</td>
<td>These alert drivers to continuous white lines a short distance ahead. As a driver, you must not cross them unless it is safe to do so.</td>
</tr>
<tr>
<td>A broken white line with a single white line along the centre of the road</td>
<td>The driver must obey the line that is nearest to them. In this picture, the driver in the car must remain to the left of the continuous white line.</td>
</tr>
<tr>
<td>A single broken yellow line along the side of the road</td>
<td>This road contains a hard shoulder, which is normally only for pedestrians and cyclists. If a driver wants to allow a vehicle behind them to overtake, they may pull in to the hard shoulder briefly as long as no pedestrians or cyclists are already using it and no junctions or entrances are nearby. Different rules exist for hard shoulders on motorways. See Section 11 for details.</td>
</tr>
<tr>
<td>ROAD MARKINGS</td>
<td>WHAT THEY MEAN</td>
</tr>
<tr>
<td>---------------</td>
<td>----------------</td>
</tr>
<tr>
<td>A broken white Yield line crossing the left-hand lane.</td>
<td>The driver must give right-of-way to any traffic on a major road ahead. The yield line usually appears with an upright Yield sign.</td>
</tr>
<tr>
<td>A white triangular Yield symbol may also be provided with the Yield line.</td>
<td></td>
</tr>
<tr>
<td>A continuous white Stop line crossing the left-hand lane. The word STOP may also be provided with the Stop line.</td>
<td>The driver must come to a complete stop before entering a major road. The stop line sometimes appears with an upright Stop sign.</td>
</tr>
<tr>
<td>An advanced stop line for cyclists, which is in front of the stop line for other traffic</td>
<td>Cyclists may position themselves in front of other traffic at a junction controlled by traffic lights. The motor vehicle driver must wait behind the first white line they reach and not cross into the shaded area. The driver must also give cyclists enough time and space to move off when the lights turn green.</td>
</tr>
<tr>
<td>A turning box showing a white arrow in a white edged box, found at junctions controlled by traffic lights</td>
<td>This shows where to position a vehicle if you want to take a right-turn. Do not proceed into the box through a red light. If oncoming traffic means you cannot take a right turn immediately, you must wait in the box until you can safely take the turn.</td>
</tr>
</tbody>
</table>
Warning signs

These signs warn you of hazards ahead, such as roundabouts, crossroads, dangerous bends or anything else that would call on you to drive more carefully. You should always take special care when you see a warning sign. If you fail to observe these signs you could create an emergency.

What they look like

All warning signs have the same format. They:

- are diamond or rectangular shaped,
- have a yellow background with a black border, and
- use a black symbol to show the hazard ahead.

They are also upright, meaning they are at the side of the road or mounted on a wall instead of painted onto the road surface.

This diagram shows some of the most common warning signs.

Section 22 has more examples of warning signs.
Roadwork signs

These signs differ from other warning signs. You should always take extra care and reduce your speed when you see these signs.

The signs are:
- rectangular or diamond shaped, and
- orange with a black border and black symbols or words.

The images below are examples of these signs.

The movement of vehicles at or near road works is controlled by law.

Stop and Go traffic control at road works

When road works are being carried out you must stop when you see the Stop sign below. You may only proceed through or past the road works when the Go sign (Téigh) is displayed. It is an offence not to obey these signs.

Where plant or machinery is crossing the roadway and no matter what direction you approach from, you must stop when you see the Stop sign below. You must obey these road signs. The signs can be operated by mechanical or manual means.

Manual traffic control sign at roadworks

There are more signs displayed in Section 23.
Variable Message Signs (VMS)

These signs provide information in an electronic format and are designed to inform you of a range of issues relating to roads, road works and road safety. The content of the sign will change, dependent on the situation. You should pay particular attention to these signs and messages.

Information regarding speed limit 
New road layout ahead

mobile VMS (displaying text message) 
mobile VMS (displaying chevrons)

Arrow formats for mobile VMS
Information signs

As their name suggests, these signs give information about directions and distances from your current location.

What they look like

There are three formats for information signs:

- blue signs with white letters on motorways,
- green signs with white letters, which are on national roads, and
- white signs with black letters, which are on local and regional roads.

Advanced direction signs
Motorway information signs

All motorway signs are blue. The following table identifies the most common signs and what they mean.

<table>
<thead>
<tr>
<th>Motorway signs</th>
<th>What they mean</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motorway ahead</td>
<td>There is an entrance to a motorway ahead and the road users listed on the sign <em>must not</em> enter the motorway.</td>
</tr>
<tr>
<td>Entry to motorway</td>
<td>The road user is now entering a motorway and <em>must</em> obey motorway rules. This sign usually appears beside the ‘Motorway ahead’ sign.</td>
</tr>
<tr>
<td>Countdown sign</td>
<td>The driver is 300 metres from the next exit off the motorway.</td>
</tr>
<tr>
<td>Countdown sign</td>
<td>The driver is 200 metres from the next exit.</td>
</tr>
<tr>
<td>Countdown sign</td>
<td>The driver is 100 metres from the next exit.</td>
</tr>
<tr>
<td>Motorway ends 500m ahead</td>
<td>There are 500 metres to the end of the motorway.</td>
</tr>
<tr>
<td>End of motorway</td>
<td>The driver has reached the end of the motorway.</td>
</tr>
<tr>
<td>Lane gain sign</td>
<td>An additional lane is joining the motorway.</td>
</tr>
<tr>
<td>Next exit sign</td>
<td>Indicates distance to the next exit and supplementary routes.</td>
</tr>
</tbody>
</table>
Section 11 covers the main rules on motorway driving. It is an offence to disobey these rules.

**Markings for merging and diverging traffic (hatched markings)**

The diagrams show how the markings can be used for:

- merging traffic, for example, where two lanes of traffic become one,
- diverging traffic, for example where channelling traffic taking a left turn away from traffic going straight ahead, and
Markings for Separating Traffic (hatched markings)

Hatched markings can also be used for separating traffic travelling in opposite directions (in what are called central median islands).

If you see these markings on a road, you must not enter the area they cover.

A 2-plus-1 road consists of two lanes in one direction of travel and one lane in the other direction. The two-lane section allows for safe overtaking and alternates with a one-lane section roughly every 2 kilometres.

There may be a safety barrier in the centre of the road which separates the two directions of traffic and prevents drivers from overtaking in the one-lane section. If vehicles need to turn right, they can do so at junctions.

In other cases vehicles which need to turn right or turn around may first turn left onto a minor road and perform a U-turn in the area provided for that purpose. They can then resume their journey as originally intended.

A form of 2-plus-1 road already exists on some climbing national primary roads – the uphill stretch is two lanes and the downhill stretch is just one.
Traffic calming signs

Some towns and villages use road features, signs and markings for traffic calming, which generally involves slowing the pace of traffic and managing its flow at junctions. The signs used for traffic calming are regulatory, warning and information. When you enter one of these towns or villages, you will see an information sign that may be combined with the town or village name and a speed limit sign.

In these towns, expect the following speed reducing measures:

- traffic islands,
- gateways,
- mini-roundabouts,
- build-outs,
- chicanes, and
- pinch points.

You may also come across the following signs on residential roads in built-up areas. These signs indicate that the road includes ramps, speed cushions or speed tables.

- Ramps on road
- Mini-Roundabout ahead
- Traffic calming
- Supplementary plate
Special signs and markings for buses, trams, rail and light rail

There are special regulatory signs and markings used to show the parts of a road that are reserved for particular vehicles, namely buses, bicycles, trams and light rail. The signs can be regulatory, warning and/or information signs. The design of the signs is consistent with the design of regulatory, warning and/or information signs.

This section deals with the more common signs that you will see as a road user. You should take care when you see any signs for buses, bicycles, trams, rail and light rail.

Bus signs

Bus lanes

Bus lanes are sections of road reserved for buses, whether public or private. Taxis and bicycles may also use some bus lanes.

Where there is a bus lane, you will see an upright blue and white sign on the side of the road on a pole and on the roadway there will be markings of a continuous white line and the words ‘Lána Bus’. You must obey the road marking and the sign. The white plate shows when the section of road is meant only for the buses shown. Normally bus lanes operate from 7am to 7pm or during peak hours. Outside these times, all traffic may use them. You should check the information plate to confirm the time limits that apply.

There are two types of bus lane:

- with-flow, and
- contra-flow.
A with-flow near-side bus lane, shown below, runs in the same direction as the traffic beside it. It can be used by bicycles and taxis as well as buses and is normally reserved during the periods shown on information signs at the start of the lane.

Contra-flow bus lane

A contra-flow bus lane runs in the opposite direction to the traffic beside it. It is reserved only for buses, which generally means that no other traffic may use it, day or night, unless signs authorise its use by cyclists.

If a ‘yield’ sign appears at the end of the bus lane, the bus must give way to other vehicles as it merges back into normal traffic.

Bus-only streets

As their name suggests, these streets are intended only for buses. Other traffic may use them only to get access to a building or side road.
Section 10 covers the rules on parking in bus lanes.

**Trams/light rail signs**

Road users **must** be familiar with signs for tram tracks for on-street trams (such as the Luas in Dublin city and suburbs).

**Regulatory signs for tram lanes**

The blue signs below show that a tram lane is running beside a traffic lane ahead. A driver can only enter the tram lane to overtake another vehicle when it is safe to do so.
The red and white sign below shows that a pedestrian may not walk beyond the point where the sign is placed.

![No entry for pedestrians to tramway](image)

A ‘No Entry’ sign with the information plate ‘Except Trams – Ach amháin Tramanna’ means that the street is only for trams and no other traffic is allowed enter it.

![Tram only street](image) ![Tram and access only street](image)

A ‘No Entry’ sign with the information plate ‘Except Trams and Access – Ach amháin Tramanna agus Rochtain’ means that a driver or cyclist may enter the street if they need to enter or leave a building.

Remember, when approaching junctions where there is a tram line:

- obey traffic lights, and
- keep yellow junction boxes completely clear.

For more information on traffic lights. See Section 7. For more information on types of junctions. See Section 9.
Warning signs for tram lanes

Pedestrians should cross tram tracks only where they see the sign below. It displays a tram symbol and the words ‘ Féach gach treo - LOOK BOTH WAYS ‘ to indicate a tramway crossing point.

The alternative text that may be shown on this warning is ‘ Féach ar dheis, LOOK RIGHT ‘ or ‘ Féach ar chlé, LOOK LEFT ‘.

When in the vicinity of tramways, pedestrians are advised to:

- stop, look both ways, listen,
- walk, do not run,
- always use designated crossing points, and
- obey signs and listen for warning horns and tram chimes.

Cyclists need to take special care because tram tracks can be slippery, especially during wet or icy weather. The Luas warning sign for cyclists is shown below.

In particular, cyclists should avoid braking while on tram rails. They should always cross tram rails at a right angle or as close to it as possible.

They should take care to avoid getting their bicycle wheels caught in the groove of the tram rails.
Road users should be aware of the overhead wires used by trams. This is particularly important for drivers carrying loads and people carrying long items. All road users should be careful not to risk electrocution by touching overhead wires, even indirectly.

The LÁNA TRAM roadmarking sign may be used to draw attention to the presence of tram tracks. It is an information sign to tell you there is a section of road used by trams and vehicles. You should be aware that trams are controlled by a different type of light signal and that you need to be extra careful.

Drivers must not follow a tram through a traffic light controlled junction unless permitted to do so.
Railway level crossings

Introduction

A railway level crossing is an intersection where a road or passage crosses a railway track.

Drivers and other users should be aware of the different types of crossing and should know how to cross safely. You must always approach a level crossing with care.

This section outlines the different types of level crossings and the correct and safe way to use them.

As you approach any railway level crossing you must obey the signs and roadway markings, slow down and be prepared to stop.

You must not enter a yellow box area unless you can clear it without stopping. You must never stop on the railway tracks.

At unattended level crossings:

Use the Rail Cross Code each time you cross:

- Always expect a train
- Stop, Look and Listen
  - Stop – at least two metres before the railway line
  - Look – right and left, watching for the lights of approaching trains
  - Listen – for a train horn or whistle
- Give Way to Trains
  Let any approaching train pass, then look right and left again
- When the Railway is clear, cross quickly.

**REMEMBER**

Never stop a vehicle on the railway tracks.
Emergency actions at level crossings

If your vehicle stalls or an animal strays on the railway:

- move everyone well clear of the railway
- leave the animal or vehicle where it is
- tell the railway controller, using the phone number displayed at the crossing
- state the ‘crossing number’ shown at the crossing

Unusual movements across level crossings

Drivers of very high vehicles should note that at level crossings with overhead electrified lines, such as on the DART network, the safe head-room is 5 metres (16ft 4ins).

You should contact the railway in advance, using the phone number displayed at the level crossing, when arranging special events such as matches, funerals or processions that will involve the use of the level crossing.

In addition, at level crossings with iron gates or automatic half-barriers, or on minor roads where protection is by traffic lights only, you should contact the railway, using the phone number displayed at the level crossing, to seek permission before crossing with:

- awkward vehicles – for example, long, low, wide, heavy or slow, vehicles
- vehicles carrying dangerous goods or exceptional loads
- crowds of people or herds of animals

Example ‘crossing number’ plate shown at a level crossing
General instructions for the safe use of different types of level crossing

1. Unattended railway level crossings with iron gates

These unattended level crossings are found on minor roads. The railway is normally guarded by iron gates which must be kept shut – there is no other protection. The user has the responsibility to open and shut the gates.

These crossings can be dangerous to use and drivers should use all available help to cross safely. It is preferable for drivers to use a bridge or an attended or automated level crossing where one is available.

Drivers – what you should do

Prepare

- STOP clear of the gates
- Switch off phone and music systems
Open windows on driver and passenger sides
Read instructions at the crossing
Get a helper to operate the gates if possible

Use the **Rail Cross Code** each time you cross:

- **Always expect a train**
- **Stop, Look and Listen**
  - **Stop** – at least two metres before the railway line
  - **Look** – right and Left, watching for the lights of approaching trains
  - **Listen** – for a train horn or whistle
- **Give Way to Trains**
  Let any approaching train pass, then **look** right and left again
- **When the Railway is clear, cross quickly.**

**Drive across safely**
- First walk across and open both gates
- Drive forward and STOP two metres clear of the railway line
- Apply your handbrake
- Look right and left and listen
- Drive across quickly when the railway is clear
- Stop well clear of the tracks on the opposite side
Drivers – what you **must** do

**Shut gates at unattended level crossings**

- You must shut and fasten the gates as soon as you and any person, animal or vehicle under your care has passed through.
- Even if the gates are open when you arrive, you must shut and fasten them after you to protect others.
- Failure to shut and fasten the gates is an offence.

**REMEMBER**

Stay Alert...

STOP, LOOK and LISTEN

Give way to trains

Always shut and fasten the iron gates

Failure to do so is an offence.
2. Attended railway level crossings with gates or barriers operated by railway staff.

These level crossings are manually operated by railway staff. The level crossing is only open to the public when the gates are fully open to the road.

Drivers – what you must do

- Slow down approaching the crossing
- Be prepared to stop if necessary
3. **Automated railway level crossings protected by road traffic lights only**

These level crossings have no barriers or gates. Users must obey the road traffic lights at these open level crossings.

**Drivers – what you must do**

- Obey the rules for traffic lights
- If you have already entered the crossing move clear as quickly as possible
4. Automated railway level crossings with barriers and flashing red lights

These level crossings have barriers which automatically descend when a train is approaching. The amber light is the same as an amber traffic light – stop safely when the amber light shows. Flashing red lights have the same meaning as a steady red traffic light – stop safely when they show.

Drivers – what you must do

- Obey the rules for traffic lights
- If you have already entered the crossing move clear as quickly as possible
- Wait for all lights to extinguish and barriers to be raised before moving on
Pedestrians crossing the railway

**Pedestrians – what you should do**

**Prepare**

- Switch off phones and music systems
- Read any instructions at the crossing
- Contact the railway in advance, using the phone number displayed at the level crossing:
  - when arranging special events such as matches, funerals or processions that will involve the use of the level crossing
  - to seek permission before crossing the railway with crowds of people or herds of animals at a level crossing with iron gates or automatic half-barriers, or on minor roads where protection is by traffic lights only
- Take extra care with a wheelchair, pram or buggy
Beware

- Never trespass onto a railway line
- Always expect a train
- Supervise children near the railway
- Keep dogs on a lead
- Only cross at a designated level crossing
- Obey traffic lights, where provided
- If crossing with a pram, wheelchair or bicycle, you should cross the tracks carefully to avoid getting the wheels caught in the groove

Use the **Rail Cross Code** each time you cross:

- **Always expect a train**
- **Stop, Look and Listen**
  - **Stop** – at least two metres before the railway line
  - **Look** – right and left, watching for the lights of approaching trains
  - **Listen** – for a train horn or whistle
- **Give Way to Trains**
  Let any approaching train pass, then **look** right and left again
- **When the Railway is clear, cross quickly.**

**REMEMBER**

STOP, LOOK and LISTEN
Give way to trains
Never trespass onto the railway
Pedestrians – what you must do

Shut gates at unattended level crossings

- You must shut and fasten the gates as soon as you and any person, animal or vehicle under your care has passed through
- Even if the gates are open when you arrive, you must shut and fasten them after you to protect others.
- Failure to shut and fasten the gates is an offence

**REMEMBER**

Always shut and fasten the iron gates
Failure to do so is an offence.

Emergency actions at level crossings

If your vehicle stalls or an animal strays on the railway:

- move everyone well clear of the railway
- leave the animal or vehicle where it is
- tell the railway controller, using the phone number displayed at the crossing
- state the ‘crossing number’ shown at the crossing

![Example 'Crossing number' plate displayed at a level crossing](image)
Cyclists and horse riders crossing the railway

- As you approach a level crossing, you **must** obey the signs, slow down and be prepared to stop
- You **must** obey the Rules of the Road
- Follow the relevant instructions and emergency actions applying to pedestrians at railway level crossings
- Cyclists – cross at right angles to the tracks or else dismount to avoid getting the wheels caught in the groove
- Cyclists and horse riders – dismount and walk across the railway line at iron-gated level crossings and at passages
Railway bridges and overhead structures

Introduction

A railway bridge is a structure where a road or passage crosses a railway track by a bridge either under or over the railway. As you approach a railway bridge you must obey any signs and roadway markings.

You will see information notice similar to the one shown below on railway bridges. This sign plate gives an identification number for the bridge and Iarnród Éireann’s emergency contact phone number.

Emergency actions - reporting bridge incidents

You must immediately report all incidents of your vehicle striking any railway bridge or structure whether or not damage is obvious. Drivers must contact the emergency telephone number following any incident at a bridge, stating the nature of the incident and the bridge identification number given on the sign.

If you cannot make contact immediately at this number, you must immediately notify a member of An Garda Síochána.

REMEMBER

You must report any incident of your vehicle impacting a railway structure.

Failure to do so is an offence.
Bridge under the railway with height restriction

This is an example of a bridge under the railway with a height restriction. The sign below is a regulatory height restriction sign, which may appear on a height restricted railway bridge. You must not pass unless your vehicle is lower than the height shown on the sign.

In the case of arch bridges, the indicated height is available only over a certain width of the arch. This width is shown by ‘goalposts’.

As you approach a bridge under the railway, you may see an advance warning sign such as the ‘restricted headroom’ sign below showing the height restriction that applies at the bridge. The height restriction is written first in feet and inches and then in metres.
Your vehicle, including any load being carried, **must** be lower than the height shown on the warning sign. It is very important to know the height of your vehicle and of any load being carried before you start your journey.

You may also encounter advance information signs with warnings such as the signs below.

*Bridge over the railway*

This is an example of a bridge over the railway. There can be restrictions on vehicles entitled to use these bridges. These restrictions will usually be related to vehicle weight, width and number of axles.

**REMEmBER**

Know your height. Know your route.
These are some of the signs that you may see at a bridge over a railway.

As you approach a railway bridge you **must** obey any road signs and roadway markings.

### Examples of Weight Restriction signage

<table>
<thead>
<tr>
<th>Maximum Gross Weight</th>
<th>Maximum Axle Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Sign" /></td>
<td><img src="image2" alt="Sign" /></td>
</tr>
</tbody>
</table>

The total weight of your vehicle including its load must weigh less than this to safely proceed beyond the sign.

If any axle on your vehicle exceeds this value you shall not proceed beyond the sign.

### Other Signs

<table>
<thead>
<tr>
<th>Maximum Gross Weight (Safety)</th>
<th>Maximum Vehicle Width</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image3" alt="Sign" /></td>
<td><img src="image4" alt="Sign" /></td>
</tr>
</tbody>
</table>

If your vehicle’s gross weight exceeds that specified on the sign, you shall not proceed beyond the sign.

Your vehicle must be narrower than the width shown to be permitted to proceed beyond the sign.
Road tunnel signs

These lane control signs will be found above each traffic lane at, or on, the approach to the entrance to a road tunnel and at regular intervals inside a road tunnel. When the signs are operational, the amber lights at the top, and at the bottom, will flash in turn. A **green** arrow pointing down means the lane is open and it is permitted to proceed in that lane.

A **red** X means the lane is closed. You **must** stop. You **must not** pass this sign. It has the same effect as a stop sign.

A **green** arrow pointing to the left means you **must** move into the left-hand lane. In doing so you **must** observe the general rules of the road relating to safely changing lanes.
A green arrow pointing to the right means you **must** move into the right-hand lane. In doing so you **must** observe the general rules of the road relating to safely changing lanes.

![Move into the right-hand lane](image)

The following sign means that goods vehicles and large non-passenger vehicles with three or more axles cannot use the right-hand lane of the carriageway. You **must** travel in the left-hand lane of the carriageways in a road tunnel.

![In a tunnel goods vehicles cannot use right-hand lane (by reference to number of axles)](image)

The regulation does not apply when:

- a red X is displayed over the left-hand lane, which means the lane **must not** be used
- a green arrow is displayed over the right-hand lane, which directs all vehicles to use the right-hand lane, or
- the left-hand lane is blocked.
There are two forms of speed limit signs in tunnels.

- A standard speed limit sign applies where there is a fixed speed limit in a tunnel. You **must** obey the speed limit and remember this is the maximum permitted speed, not the required speed.

- Where the speed limit can vary in a tunnel, you will see a variable message sign, which is a black square with a red circle and figures in white or yellow. The speed limit is shown by the numbers and will vary according to traffic conditions and road safety considerations. You **must** obey the speed limit and remember this is the maximum permitted speed, not the required speed.
Section 7: Traffic lights and signals

This section builds on Section 6, which covers traffic signs and road markings. This section covers two general forms of traffic signals:
- traffic lights, which direct the flow of traffic, and
- signals given by motorists and cyclists to indicate their intent.

Traffic lights

These include lights controlling junctions and pedestrian crossings.

A red light means ‘stop’. If the light is red as you approach it, you must not go beyond the stop line at that light or, if there is no stop line, beyond the light.

A green light means you may go on if the way is clear. Take special care if you intend to turn left or right and give way to pedestrians who are crossing. A green light is not a right of way, it is a licence to proceed with caution.

REMEMBER
A green light is not a right of way, it is a licence to proceed with caution.
An amber light means that you **must** not go beyond the stop line or, if there is no stop line, beyond the light. However, you may go on if you are so close to the line or the light when the amber light first appears that stopping would be dangerous.

A green arrow (also known as a filter light) means that you may move on in the direction of the arrow, assuming it is safe and the way is clear, even if a red light is also showing.

If you wish to turn right at a set of traffic lights that has an arrow to the right, drive into the junction when you see a green light, taking care not to block any oncoming traffic. Then, when it is safe, finish your turn. You **should** only wait for the filter arrow for turning right when you are in the junction and if it would be dangerous to finish your turn before the filter light appears.

A flashing amber arrow pointing left can appear at a junction with another road. It means that you may move on past the traffic light, but only if you first give way to traffic already coming through the junction on the other road.

Remember that a flashing amber light at a pelican crossing means you **must** yield to pedestrians. See Section 18, on pedestrian lights.

**REMEMBER**

You **should** always approach traffic lights at a speed that will allow you to stop if the amber light appears.
Cycle track lights

- A red light showing a figure of a cyclist means that the cyclist **must** stop at the traffic light.
- A green light showing a figure of a cyclist means the cyclist may move beyond the light as long as this does not put other road users in danger.
- A flashing green light or an amber light showing a figure of a cyclist means the cyclist may not cross the road unless they had started crossing when there was a steady green light showing a figure of a cyclist.

Signals by motorists and cyclists

A motorist **must** always signal **before** they change their course. This means signalling clearly and in good time before:

- moving off,
- turning right or left,
- changing lanes,
- overtaking,
- slowing down, or
- stopping.

Signalling

Signals are an indication of intent - they do not confer a right of way. The law requires you to signal your intention of doing things on the road. This means signalling properly before moving off, turning right or left, changing lanes, overtaking, slowing down or stopping. You must signal clearly and in good time.
If you are not certain that your direction indicators or stop lamps, for whatever reason, are giving an adequate signal, use clear decisive hand signals as well.

**An indicator is not a right of way.**

Before you start to manoeuvre you must exercise due care and attention with particular heed to other users of the road, prevailing road conditions and how your driving will impact other road users.

Always take care, and especially when you:

- intend to change lane;
- turn across oncoming traffic;
- drive onto and/or exit from a roundabout; and
- drive into and/or reverse into a parking space.

**Hand signals**

Make sure you use hand signals to help, rather than confuse, other road users. Make sure you are familiar with the hand signals shown on the next two pages. Be prepared to use the appropriate hand signal where it will help others to understand your intentions.

Learner drivers should be guided by their approved driving instructor on when and where a hand signal might be particularly useful. For example:

- when turning right just after changing position to pass stationary traffic on the left, or
- to indicate to oncoming traffic that you intend to give way at a pedestrian crossing, or
- where you believe another road user may not be able to see your flashing indicators, or
- where you believe your indicators are not working (you should have them repaired before continuing your journey).

The signals for cyclists also apply to motorists and people in charge of horse drawn vehicles and agricultural machinery not fitted with indicators.
The following are the hand signals to be used:

**Hand signals to be given to traffic behind you**

- **I am going to move out or turn to my right.**
- **I am going to turn to my left.**
  Note that the car driver moves his arm and hand in an anti-clockwise direction.
- **I am going to slow down or stop.**
Hand signals to be given to a pointsman and on-coming traffic

- I want to turn right.
- I want to turn left.
  Note that the car driver points the right forearm and hand with the fingers extended to the left.
- I want to go straight on.
- I want to slow or stop.

The signals for the cyclist apply also to a motorcyclist and to a person in charge of a horse drawn vehicle.

**REMEMBER**

Signals show only what you are intending to do – they never give you right of way.
Section 8:

Speed limits

A vehicle must not be driven at a speed exceeding that which will enable its driver to bring it to a halt within a distance the driver can see to be clear.

This section describes the rules for keeping pace in traffic and the speed limits that apply on different types of road and to different vehicles.

As a driver, you must always be aware of your speed and judge the appropriate speed for your vehicle, taking into account:

- driving conditions,
- other users of the road,
- current weather conditions,
- all possible hazards, and
- speed limits.

Driving conditions relate to the volume of traffic around you and the quality of the road.

Other users of the road include motor-cyclists, cyclists, pedestrians, school children, animals and all others you as a driver should anticipate will or may be on the road.

Possible hazards include anything you can see that can, and will, give rise to an emergency, such as oncoming traffic if you are turning onto a major road. They also include anything you cannot yet see and anything you can reasonably expect to happen, such as a pedestrian walking onto the road in front of you, a child running onto the road between parked cars, and or animals on the roadway. It includes your own physical and mental state while driving (for example whether you are stressed or tired) and the condition of your vehicle.
Driving safely in traffic – the two-second rule

Your vehicle is your responsibility. You must be in control at all times.
You must keep your vehicle to a speed that allows you to stop it:

- safely, in a controlled way,
- on the correct side of the road,
- within the distance that you can see to be clear, and
- without risk or harm to you, your passengers and/or any other users of the road.

In traffic, the distance between your vehicle and the one in front of you is known as the safe headway. Keep a safe headway by ensuring you are at least two seconds behind the vehicle in front. This is known as the two-second rule. You can use the following steps to check if you are obeying the rule:

- On a dry road, choose a point like a lamp post or road sign.
- When the vehicle in front passes that point, say out loud “Only a fool breaks the two-second rule.”
- Check your position in relation to your chosen point as you finish saying this. If you have already passed the point, you are driving too close to the vehicle in front and need to pull back.
- In wet weather, double the distance between your vehicle and the one in front of you by saying “Only a fool breaks the two-second rule” twice.
Avoid driving too slowly

In normal road and traffic conditions, safely keep up with the pace of the traffic flow while obeying the speed limit. While you must keep a safe distance away from the vehicle in front, you should not drive so slowly that your vehicle unnecessarily blocks other road users. If you drive too slowly, you risk frustrating other drivers, which could lead to dangerous overtaking. However, remember: you must not drive at a speed at which you cannot stop the vehicle within the distance you can see to be clear ahead.

Speed limits

Signed speed limits set the maximum speed at which vehicles may legally travel on a section of road between speed limit signs, assuming the vehicles are not restricted in any way.

The signs indicate the maximum speed at which your vehicle may travel on a particular road or stretch of road, not the required speed for the road.

There are two types of speed limit:

- speed limits that apply to roads, and
- speed limits that apply to certain types of vehicles.

Speed limits on roads

All public roads have speed limits. In most cases, a ‘default’ speed limit applies. This automatically applies to a particular type of road if there is no speed limit sign to show otherwise.

The following table sets down the default speed limits for different roads under the Road Traffic Act 2004.
Local authorities can apply special speed limits to these roads, for example:

- at particular times, such as when children are entering or leaving schools. See Section 19,
- on different sides on a dual carriageway,
- at selected locations such as a tunnel, where the limit may be lowered if one lane must be closed,
- where there is a series of bends, and
- at road works.

If the local authority sets a special speed limit, you will see one of the signs below. Speed limit signs, like most other regulatory signs, have a red border, white background and black numbers and letters. They show the speed in kilometres per hour (km/h). (For more information on regulatory and other traffic signs, see Section 6.)
The main speed limit signs on national primary and other roads are sometimes followed by small repeater signs to remind you of the road’s speed limit.

No vehicle other than fire engines, ambulances or Garda vehicles may exceed the road speed limit at any time.

**Periodic speed limits**

Normally, speed limits apply 24 hours a day and all year round. In certain situations, local authorities can apply a special speed limit to certain stretches of road for particular periods of time or particular days. Outside these times or days, the usual speed limit at that location is in force.

An example of a periodic speed limit is one used near school grounds. One way to show this special limit is through a standard upright sign with an information plate underneath that shows the periods and days when the speed limit applies.
Another way of showing the speed limit is an electronic speed limit sign which when lit up shows the speed limit in white figures within a red border against a black background. Outside the special speed limit periods, the sign remains blank. Sometimes the electronic sign can be mounted on a grey backing board with two amber lights, which may flash when the sign is lit up.

The sign School Children Crossing Ahead that includes two amber flashing lamps may appear beside periodic speed limit signs to alert you to the presence of school children.

You must not break the periodic speed limits while they are in force.

Checking speed

From time to time and on various stretches of road, Gardaí may use certain equipment to check if vehicles are obeying the speed limit. It is against the law to supply, carry or use any device that can detect or interfere with any speed monitoring equipment under their control.
Speed limits for vehicles

Some drivers **must** obey speed limits for their vehicles as well as speed limits for the roads on which they are travelling.

The table below outlines the speed limits that apply to different vehicles.

<table>
<thead>
<tr>
<th>Vehicle speed limit</th>
<th>Type of vehicle to which it applies</th>
</tr>
</thead>
<tbody>
<tr>
<td>65 kilometres an hour (65km/h) On all roads</td>
<td>- A single or double deck bus or coach designed for carrying standing passengers</td>
</tr>
<tr>
<td>80 kilometres an hour (80km/h) On all roads except motorways</td>
<td>- A goods vehicle with a maximum authorised mass (MAM) of more than 3,500 kilograms</td>
</tr>
<tr>
<td>90 kilometres an hour (90km/h) On motorways</td>
<td>- A goods vehicle with a maximum authorised mass (MAM) of more than 3,500 kilograms</td>
</tr>
<tr>
<td>80 kilometres an hour (80km/h) On all roads</td>
<td>- Any vehicle towing a trailer, caravan, horsebox or other attachment</td>
</tr>
<tr>
<td>80 kilometres an hour (80km/h) On all roads except motorways or dual carriageways</td>
<td>- A single or double deck bus or coach that is not designed for carrying standing passengers</td>
</tr>
<tr>
<td>100 kilometres an hour (100km/h) On motorways or dual carriageways where no lower speed limit is in place</td>
<td>- A single or double deck bus or coach that is not designed for carrying standing passengers</td>
</tr>
</tbody>
</table>
If the vehicle and road speeds are different, the driver must obey the lower of the two. For example, if a bus designed to carry standing passengers is travelling on a road with a speed limit of 80km/h, it cannot travel faster than its vehicle speed limit of 65km/h. But if it is travelling on a road with a speed limit of 50km/h, it must obey this limit regardless of the maximum speed at which it might otherwise be allowed to travel.

Stopping distance for cars

Many drivers have a false belief that if the car in front starts braking they can react, brake and come to a stop, still leaving the same distance between the two vehicles.

The total minimum stopping distance of your vehicle depends on four things:

- your perception time,
- your reaction time,
- your vehicle reaction time, and
- your vehicle braking capability.

Your perception time is how long you take to see a hazard and your brain realising it is a hazard requiring you to take immediate action. This can be as long as ¼ to ½ of a second or more.
Your reaction time is how long you take to move your foot from the accelerator to the brake pedal once your brain understands you are in danger. Your reaction time can vary from $\frac{1}{4}$ to $\frac{3}{4}$ of a second.

These first 2 components of stopping distance are down to you and can be affected by alcohol, drugs, tiredness, fatigue or lack of concentration. A perception and reaction time of 4 seconds at 100km/h means the car travels 110 metres before the brakes are applied (this is more than the length of a football pitch).

Once you apply the brake pedal it will take time for your vehicle to react. This depends on the condition your vehicle is in and, in particular, the condition of the braking system.

The last factor that determines your total minimum stopping distance is the vehicle’s braking capability. This depends on many things, for example:

- brakes;
- tyre pressure, tread and grip;
- the weight of the vehicle;
- the vehicle’s suspension; and
- road surface.

Table 5: The RSA recommend you allow a minimum stopping distance under dry conditions of (see table below):

<table>
<thead>
<tr>
<th>Speed (km/h)</th>
<th>Minimum Reaction Distance (m)</th>
<th>Minimum Braking Distance (m)</th>
<th>Total Minimum Stopping Distance (m)</th>
</tr>

</tbody>
</table>

Source Transport Research Laboratory, UK, 2012, © Road Safety Authority, 2012
It is worth noting that from 50km/h to 100km/h the total braking distance of your car can increase from at least 26 metres to at least 101 metres. When you double the speed of your car you multiply the total braking distance nearly four times.

Remember a 5km/h difference in your speed could be the difference between life and death for a vulnerable road user like a pedestrian.

- Hit by a car at 60km/h, 9 out of 10 pedestrians will be killed.
- Hit by a car at 50km/h, 5 out of 10 of pedestrians will be killed.
- Hit by a car at 30km/h, 1 out of 10 pedestrians will be killed.

Source RoSPA UK

The RSA recommend you allow a minimum overall stopping distance of (see table below):

![Total Minimum Stopping Distance (m)](image)

Source Transport Research Laboratory, UK, 2012, © Road Safety Authority, 2012
Skidding

Any factor which reduces the grip of your tyres on the road is a possible source of skidding. Wet or greasy roads, overloading, worn or improperly inflated tyres, mud, leaves, ice, snow, harsh acceleration, sudden braking, or excessive speed for the conditions can all cause or contribute to a skid.

Aquaplaning occurs when a car is being driven on a wet road and a film of water builds up between the tyres and the road surface.

When that happens, the car loses contact with the road, and braking and steering are affected.
Section 9:

Junctions and roundabouts

This section outlines the correct way to approach and drive at junctions and roundabouts.

Junctions

If you see a ‘Stop’ sign (shown below), you must stop at the sign or at the stop line on the road, if provided, even if there is no traffic on the road you would like to enter.

If you see a ‘Yield’ sign or yield line (shown below), you must slow down, but you do not have to stop completely unless you need to wait for any oncoming traffic to pass.

Section 6 has more information on these and other regulatory signs.
**Right of way**

- Traffic travelling straight ahead in either direction along a major road generally has right of way at all times.

- If you are at a junction where the roads are of equal importance, the traffic on your right has right of way. You **must** let that traffic pass before moving on. It is important to understand that the right of way is not an absolute right. You **must** proceed with caution while showing regard for other users of the road.

- If you are approaching a T junction, the traffic already on the road you are joining has right of way. This means any traffic on the road ending at the junction **must** wait for the other traffic to pass before turning left or right.

- If you are turning right at a junction, the traffic coming straight through the junction from the opposite direction has right of way.

- If you plan to turn right at a junction and a vehicle from the opposite direction wants to turn into the same road, the vehicle that is turning left has right of way. If yours is the vehicle turning right, you **must** wait for the other vehicle to turn first.

- If you are approaching a junction with a major road, you **must** yield to other traffic. This means giving right of way or letting them pass before you enter the road you are joining.

Vehicles do not have an automatic right of way on the road. The overriding rule is, in all circumstances, proceed with caution.

**You must** always yield to:

- pedestrians already crossing at a junction,
- pedestrians on a zebra crossing,
- pedestrians on a pelican crossing when the amber light is flashing, and
- pedestrians and traffic when you are moving off from a stationary position (for example from your position at a stop sign or a parking space).
To avoid doubt and in the interest of road safety a vehicle should always yield to pedestrians. You must also yield to:

- traffic already turning at a junction,
- traffic in another lane when you wish to change lanes, and
- traffic on a public road when you are coming out of a private entrance.

Stop, look, listen, and look again. This is your duty when entering the roadway.

Motorists should watch for cyclists emerging from the end of a cycle track and mopeds and motorcycles emerging from junctions who might be difficult to see because of their small size.

It is important to understand that the right of way is not an absolute right of way. You must proceed with caution, having regard for other road users.

**Turning right from a major road onto a minor road**

- Check your mirrors and blind spots well in advance for traffic following behind you and give a right turn signal.
- As soon as you can do so safely, take up a position just left of the middle of the road or in the space provided for right-turning traffic.
- Where possible, leave room for other vehicles to pass on the left.
- Do not turn the steering wheel until you are ready to make the turn.
When a safe gap occurs in oncoming traffic, finish your turn so that you enter the left-hand side of the road into which you are turning.

Do not cut the corner when you turn. Do not make a ‘swan neck’ by passing the correct turning point and then having to turn back into the road you want to enter.

Turning right from a minor road onto a major road

- Check your mirrors well in advance for traffic following behind you and give a right turn signal.
- As soon as you can do so safely, take up a position just left of the middle of the road.
- If you are at a junction controlled by a Stop or a Yield sign, wait at the entrance to the junction until the road is clear in both directions.
- Where possible, leave room for other vehicles to pass on the left.
- When a safe gap occurs in traffic coming from both directions finish your turn so that you enter the left-hand side of the road onto which you are turning.
- Be alert for road markings which direct you to follow a certain course.
Turning right at a crossroads

When turning right at a crossroads and a car coming from the opposite direction is also turning right, if possible you should both try to turn back to back. This allows you and the other driver to see oncoming traffic and allows the traffic to see you.

Turning back to back

If you cannot do this, you may turn near-side to near-side if necessary. This means starting the turn while the vehicles are still facing each other.

Turning near side to near side

Turning right from a one-way street

Drive as close as you safely can to the right-hand side of the one-way street. Look out for areas where two lanes may be allowed for turning right.
Turning left from a major road to a minor road

- Check your mirrors well in advance for traffic following behind you.
- Give a left-turn signal and, when safe, slow down.
- Keep as close as you safely can to the left-hand edge of the road, using your mirrors to watch for cyclists or motorcyclists coming up on your left.
- Watch for flashing amber arrows that allow you to proceed to the left if no traffic is approaching from the right.
- Where possible, leave room for other vehicles to pass on the right.
- Make the turn, keeping close to the left-hand edge. Do not hit or mount the kerb.

Turning left from a minor road to a major road

- Check your mirrors well in advance for traffic following behind you.
- Give a left turn signal and slow down.
- If you are at a junction controlled by a Stop or a Yield sign, wait at the entrance to the junction until the road is clear.
- Watch for flashing amber arrows that allow you to proceed to the left if no traffic is approaching from the right.
- If a left-turn slip lane is provided, you should use it.
- When it is safe, finish your turn so that you enter the left-hand side of the road onto which you are turning.

Take care not to swing wide when you turn and always give way to pedestrians and cyclists crossing the junction before you start any turn.
Yellow box junctions

These junctions consist of patterns of criss-cross yellow lines.

**REMEMBER**

You must not enter the yellow box junction unless you can clear it without stopping.

An exception is when you want to turn right. In this case, you may enter the yellow box junction while waiting for a gap in traffic coming from the opposite direction. However, don’t enter the box if to do so would block other traffic that has the right of way.

Yellow box junctions can also be found at railway level crossings or tramway crossings. Never enter these yellow box junctions unless you can leave them without stopping. Section 6 has more information on traffic signs and road markings.
Junctions and dual carriageways

Dual carriageways are roads with two or more lanes of traffic travelling in each direction. The outer or right-hand lane in each direction is the lane nearest to the centre of the dual carriageway.

You must normally drive in the left-hand lane of a dual carriageway. You may use the outer lane of a two-lane or three-lane dual carriageway only:

- for overtaking, and
- when intending to turn right a short distance ahead.

Turning left onto a dual carriageway

- Drive as close as you safely can to the left-hand edge of the approach road.
- Watch for oncoming traffic.
- Take the turn when it is safe to do so.
- Keep to the left-hand lane on the dual carriageway and build up your speed to that of the normal flow of traffic subject to the speed limits and road conditions.
Crossing a dual carriageway or joining it by turning right

- When it is safe to do so, wait in the median space (the gap in the central dividing strip) until there is a safe gap in traffic.
- Finish your crossing or turn into the second half of the dual carriageway and build up your speed to that of the normal flow of traffic, subject to speed limits and prevailing road conditions.

If another vehicle is already blocking the median space, wait on the minor road until there is enough space to clear the first half of the road without stopping on the carriageway. If the median is too narrow for your vehicle, wait on the minor road until you can clear both sides of the carriageway, or complete your turn in one go.

When driving a large vehicle, it is generally not safe to treat each half of the dual carriageway as a separate road. You should remain on the minor road until you can cross both sides of the dual carriageway without having to stop.

Always take care when you are behind large vehicles or vehicles towing trailers when they are turning. Remember, a long vehicle or combination needs extra room to finish a turn. Cyclists, motorcyclists and pedestrians, in particular, should be extra careful when near these vehicles.

Turning right from a dual carriageway

- Follow the normal procedure (see below) and move into the right-hand lane. If there is a deceleration lane, move into it.
- At the junction, turn into the median space and wait for a safe gap in traffic.
- When it is safe to do so, finish your turn and move into the left-hand lane of the road you are entering.
Roundabouts

Not every roundabout is the same. They are different shapes and sizes and can have different numbers of exits. Some are controlled by traffic lights.

The purpose of having a roundabout is:
- to reduce delays – traffic flows smoothly compared to the stop and go traffic at normal intersections such as at traffic lights.
- to significantly reduce the risk of collisions.
- to reduce pollution – emissions from vehicles on roundabouts are less than they would be at traffic light junctions.

Golden Rule

This ‘golden rule’ should help motorists to drive safely at any roundabout regardless of the number of exits:

Think of the roundabout as a clock.

- If taking any exit from the 6 o’clock to the 12 o’clock position, motorists should generally approach in the left-hand lane.
- If taking any exit between the 12 o’clock to the 6 o’clock positions, motorists should generally approach in the right-hand lane.
- If there are road markings showing you what lane you should be in, follow those directions. Traffic conditions might sometimes mean you have to take a different approach but, in the main, the ‘golden rule’ will help you to drive safely on almost any roundabout.
Approaching a roundabout

- Conditions at roundabouts may vary. When you are coming up to a roundabout, look for directional arrows, road markings or signs which might be indicating which lane you should use for the exit you’re taking.

- Move into the correct lane in good time. Use the 12 o’clock ‘golden rule’ to help you plan a safe course of action unless road signs indicate otherwise.

- Treat the roundabout as a junction. You must yield to traffic coming from the right, but keep moving if the way is clear.

Making a left turn

Approach in the left-hand lane, indicate ‘left’ as you approach and continue until you have taken the left exit.

Going straight ahead (or any exit to the left of 12 o’clock)

Approach in the left-hand lane (unless road markings say otherwise) but do not indicate ‘left’ until you have passed the exit before the one you intend to take. Where traffic conditions dictate otherwise, for example a long line of traffic in the left lane signalling left or road works in the left lane, you may follow the course shown by the red line.

When leaving the roundabout take extra care at all exits, checking for other road users – for example, cyclists and motorcyclists who may be continuing on the roundabout.
Taking any later exits (those past 12 o’clock – right)

Approach in the right-hand lane (unless road markings say otherwise), indicate ‘right’ on your approach and leave your indicator on until you have passed the exit before the one you intend to take. Then change to the ‘left’ turn indicator. Move over towards the left on the roundabout and continue signalling left to leave.

In all cases watch out for and give plenty of room to:

- pedestrians who may be crossing the approach and exit roads,
- traffic crossing in front of you on the roundabout, especially vehicles intending to leave by the next exit,
- traffic that may be straddling lanes or positioned incorrectly,
- motorcyclists,
- cyclists and horse riders who may stay in the left-hand lane and signal right if they intend to continue round the roundabout,
- long vehicles (including those towing trailers), which might have to take a different course approaching or on the roundabout because of their length. Watch out for their signals.

**REMEMBER**

Conditions at roundabouts may vary. Exercise caution at all times. In particular, be aware of traffic signs, traffic lights, road markings and traffic coming from your right when approaching roundabouts.
Section 10: Parking

This section covers the rules on parking safely.

Parking

General rules

- Where possible, park in the direction of traffic flow.
- Park close to, and parallel with, the kerb or edge of the road except at any location where perpendicular or angled parking bays are marked out on the surface of the road.
- Where a parking bay is marked out on a road you must park your vehicle fully within the parking space.
- Apply the handbrake.
- Switch off the engine.
- Leave the vehicle in first gear or reverse, or in the case of an automatic, select P.
- Before opening any doors, check for other road users nearby, in particular motorcyclists, cyclists and pedestrians.
- Open your doors only when you need to and keep them open only for as long as necessary.
- Get out of your vehicle only when it is safe and you and your passengers are not blocking other road users.
- Passengers should exit on the kerbside.
- Lock your vehicle as you leave it.
How to make sure your vehicle is parked safely

Make sure you do not interfere with normal traffic flow and that your vehicle does not disturb, block or endanger other road users.

<table>
<thead>

<td>• Don't park where parking is forbidden by traffic signs or road markings (see section 6).</td>
</tr>
</tbody>
</table>
The following traffic signs and road markings show where parking is not allowed or is allowed only at certain times.

**Traffic signs**

These signs and their information plates show that you can park only during certain periods (sign 1) or outside certain periods (sign 2).

![Sign 1: Parking permitted](image1)

![Sign 2: Parking prohibited](image2)

The sign below shows a clearway – an area of road that must be kept clear for moving traffic during certain times of the day (usually busy periods). The times when stopping or parking is prohibited are shown on an information plate under the sign.

Other vehicles may stop during these times only if they are waiting in a line of traffic, but they are not allowed to park, even if disc or metered parking is normally available.
Road markings

This single yellow line usually has an upright information plate nearby. Together, the road marking and information plate mean you **must not** park during the times shown.

The double yellow lines mean no parking at any time.
No parking

Even if you do not see a particular ‘no parking’ sign or yellow line on the road, you **must not** stop or park:

- in a parking space unless you display a ‘reserved for a person with a disability’ permit holder. Wheelchair users need to use the extra wide special parking bay to open their car door fully. This will allow a person to get from a wheelchair to a vehicle or from a vehicle to a wheelchair. Normal parking bays are too narrow to give the access required by wheelchair users so other road users **must not** park in the designated disabled persons parking spaces. It is an offence to do so;

- where there are white zig-zag lines on either side of pedestrian lights or of pelican or zebra crossings;
- wholly or partly on a zebra or pelican crossing or at pedestrian lights;
- 15 metres before or 5 metres after a pedestrian crossing or traffic lights;
- near a school entrance where there are yellow zig-zag lines along the edge of the roadway enclosing the words ‘SCHOOL KEEP CLEAR’;
- near an entrance or exit from a Fire, Ambulance or Garda station;
- within an area marked as a bus stop or taxi rank - white roadway markings line the areas and, in addition show the word ‘BUS’ at a bus stop and ‘TAXIS’ at a taxi rank;
- where there is a single or double continuous white line along the centre of the road;
- wholly or partly on a footpath, a grass margin, a cycle lane or track or a median strip;
within 5 metres of a road junction unless parking spaces are clearly marked;

• on a part of a road reserved for casual trading during trading hours;

• in a contra-flow bus lane at any time or in a with-flow bus lane during the hours the bus lane is in force;

• in a loading bay (reserved for goods vehicles to use while loading or unloading goods for a maximum period of 30 minutes) - roadway markings show the word ‘LOADING’ repeated across the entrance of the parking area;

• in an entrance or exit for vehicles to or from a premises, unless authorised by the occupier of the premises;

• in a tram lane during the period the tram lane is in force (tram lanes operate on a 24-hour basis unless an alternative period is shown on an information plate beside the lane);

• on the approach to a level crossing;

• where the kerb has been lowered to help wheelchair users.

**REMEMBER**

You **must not** park in any way which interferes with the normal flow of traffic, or which obstructs or endangers other road users.

You **must** never park:

• at a corner, a bend, the brow of a hill or on a hump-back bridge,

• where there is a sharp dip in the road, or

• anywhere that blocks the view of a school warden or junior school warden service, the restriction does not apply to a vehicle displaying a disabled persons parking permit.
Disc parking

Disc parking operates in built-up areas to restrict parking during certain times of the day. You will see the regulatory sign and information plate below in an area covered by disc parking. When you park, you must buy a disc for a set period of time and remove your car by the time this period ends. You must not park again in the same street within one hour of leaving a disc-parking space. The restriction does not apply to a vehicle displaying a parking permit for a person with a disability.

Clamping or removing vehicles

Some local authorities have introduced systems to combat illegal parking. If your vehicle is parked illegally, a clamp may be fixed to a wheel, or your vehicle may be towed to another place and have a clamp attached there or removed and locked up in a vehicle pound. You must then pay a fee to remove the clamp and/or have your vehicle returned to you.

Dangerous parking

If you park in a way that is likely to cause danger to other road users, for example, if it forces a pedestrian out onto the roadway, a Garda can decide that this is dangerous parking and prosecute you. If you are convicted of this offence, you will receive five penalty points.
Section 11:

Motorways and tunnels

Motorways are roads that help reduce journey times by separating traffic and removing road junctions. They are probably the safest way of moving large volumes of traffic, mainly because they remove the risk of head-on collision. However, compared with other types of road, they carry a greater risk of pile-ups.

This section covers the rules on who can drive on a motorway, the meaning of motorway signs and how to join, leave and overtake safely.

See section 25 for a list of common signs you will see on a motorway.

<table>

<td>The driver is 200 metres from the next exit.</td>
</tr>
</tbody>
</table>
General rules

The signs below appear as you are about to enter or join a motorway. The sign on the left shows that the following must not enter a motorway:

- people who do not hold a full driving licence for the category of vehicle they drive,
- vehicles incapable of a speed of at least 50km/h,
- vehicles with an engine capacity of 50cc. or less,
invalid-carriages or motorised wheelchairs,
vehicles that do not use inflated tyres,
cyclists,
pedestrians, and
animals.

Motorway speed limits

The maximum speed limit on a motorway is 120km per hour unless:

- there are signs stating another speed limit, for example, warning signs to highlight road works; or
- you are driving a vehicle that is subject to a lower limit such as a bus or truck.

Remember your total stopping distance at 120km per hour in dry conditions is 102 metres (27 car lengths). This is about the length of a soccer pitch.

- The ordinary speed limit for HGVs is increased to 90km/h on motorways or dual carriageways where no lower speed limit is in place.
- The ordinary speed limit for buses is increased to 100km/h on motorways or dual carriageways where no lower speed limit is in place.

Joining the motorway

When entering the motorway, be careful and pay attention, and let traffic already on the motorway pass. You **must** follow the steps below when joining a motorway.

- Use the acceleration lane to build up your speed before merging into traffic on the motorway.
- Signal early to other motorists that you intend to merge.
- As you approach on the slip road, check in your mirrors and your blind spot for a safe gap in traffic in the left-hand lane of the motorway.
- Obey road signs and road markings.
- Do not drive on hatch markings before merging into traffic on the motorway.
Give way to traffic already on the motorway.

Adjust your speed as you join the motorway so you match, as near as possible, the general speed of traffic in that lane.

Treat each lane change as a separate manoeuvre. Stay in the left-hand lane long enough to adjust to the speed of traffic before attempting to overtake.

**On the motorway**

- You **must** only drive ahead. No turning or reversing is permitted.
- You **must** progress at a speed and in a way that avoids interference with other motorway traffic.
- You **must not** drive on any part of the motorway that is not a carriageway; for example a hard shoulder, except in case of emergency.
- You **must not** stop or park on any part of the motorway unless your vehicle breaks down or you are signalled by a garda to do so.
- You **must not** pick up or set down anybody on a motorway.

**REMEMBER**

If you find yourself driving against the flow of traffic, pull in immediately to the hard shoulder and stop. Contact the gardaí by dialling 999. Do not attempt to turn your vehicle. Wait for help in a safe place.

**Using lanes properly**

It is very important that you understand the purpose of each lane on a motorway. To help explain how and when to move from one lane to another, each lane is given a number. The picture below shows that lane 1 is the lane nearest the hard shoulder. This is also known as the inside lane. On a two-lane motorway, the lane nearest the central median is lane 2 (also called the outside lane). On a three-lane motorway, this lane is lane 3.
Lane 1

The normal ‘keep left’ rule applies. Stay in this lane unless you are overtaking.

Lane 2

On a two-lane motorway, use this for overtaking only and move back into lane 1 when you have finished. You may also use this lane to accommodate traffic merging from the left.

On a three-lane motorway, you may stay in this centre lane while there is slower moving traffic in lane 1.

Lane 3

If you are travelling on a three-lane motorway, you must use this lane only if traffic in lanes 1 and 2 is moving in queues and you need to overtake or accommodate merging traffic. Once you’ve finished overtaking, move back to your left and allow faster traffic coming from behind to pass by.

You must not use the lane nearest the central median, that is, the outside lane (lane 2 or lane 3, depending on the number of lanes), if you are driving:

- a goods vehicle with a maximum authorised mass of more than 3,500 kilograms, such as a lorry or heavy goods vehicle, or
- a vehicle towing a trailer, horsebox or caravan.

You may use it, however, in exceptional circumstances when you cannot proceed in the inner lane because of an obstruction ahead.
Keeping your distance

Section 8 covers the ‘two second rule’ to help you keep a safe distance behind the vehicle in front. Use this rule on motorways – driving too close reduces your ability to stop safely and significantly reduces your vision ahead.

When in a queue, your instinct may be to get closer to the vehicle in front to protect your position. Please remember that you must leave enough room in front of you to allow you to stop safely.

Signalling

Once on a motorway, you must make a signal before every move. For example, moving from lane 3 to lane 1 involves two separate stages.

- In stage one you signal once to move from lane 3 to lane 2.
- In stage two you signal again to move from lane 2 to lane 1.

An indicator is not a right of way.

Before you start to manoeuvre you must exercise due care and attention with particular heed to other users of the road, prevailing road conditions and how your driving will impact other road users.

Checking traffic around you

Check your mirrors regularly, as you need to have a constant picture in your mind of what’s going on all around you. Be very aware of your blind spots as well.

Avoid staying in other drivers’ blind spots. Keep your eyes moving – avoid looking only at the vehicle immediately ahead. Instead, scan up the queue. Use your view to drive smoothly and avoid unnecessary braking. If you notice traffic slowing down sharply, use your hazard warning lights to warn traffic behind you.

Before changing lane, remember ‘mirror, signal, mirror, manoeuvre’. Remember that traffic may be coming from behind you at speed. Checking your mirrors at least twice helps you judge this approach speed and will help you to see vehicles travelling in your blind spots.
Avoid causing another driver to brake or change lane to accommodate you while you are on the motorway (aside from joining it). Learn to read the traffic around you. A vehicle in your mirror on the motorway with its right indicator flashing is trying to tell you that it’s catching up on you and intends to overtake your vehicle.

**Overtaking**

Overtake only on the right, unless traffic is travelling in slow moving queues and the traffic queue on your right is travelling more slowly than you are. If you intend to move from a slower lane to a faster lane, adjust your speed first.

Before you start to overtake, remember ‘mirror, signal, mirror, manoeuvre’, and look in your blind spots. Check that the way is clear (behind and ahead) and signal well in advance.

Remember that traffic will be travelling a lot faster than on ordinary roads. Be particularly careful at dusk, during darkness, and in poor weather conditions when it is more difficult to judge speed, distance and stopping distance. Signal and return to your original lane as soon as possible.

**Gantries**

Gantries are structures used to display traffic signs above traffic lanes on motorways and dual-carriageways. They are common and display important information, so make sure you pay attention to them as well as to other signs along the side of the road.

**Variable message signs**

Variable message signs such as the one displayed below are used on motorways to provide messages and information to motorists and to warn of incidents that may affect traffic conditions and journey times.

Motorists **should** pay attention to these signs at all times.
Leaving the motorway

The signs below show the distance to the next exit on a motorway. Plan well ahead and use these signs to position yourself in good time so you can get into lane early.

When you leave the motorway, you will first enter a deceleration lane. If possible, keep up your speed until you enter this lane, but then slow down and check for signs showing a lower speed limit. Use your speedometer to make sure you are obeying the reduced limit. Remember that the slip roads and link roads between motorways may include sharp bends.

If you miss your exit, drive on to the next exit. You must not attempt to cross the ghost island or reverse back up the hard shoulder.
When you leave a motorway, or it comes to an end, you will see the signs below.

![Signs](image)

**Motorway ends 1km ahead**  **Motorway ends 500m ahead**  **End of motorway**

### Rest areas, lay-bys and motorway services

The best advice is to plan your journey to avoid having to stop on motorways if at all possible. However, it is important to take regular breaks to rest at appropriate intervals when travelling long distances. Before you start your journey you should plan where you will stop to rest and use motorway services. The Map below shows rest and service areas. Areas marked P are lay-bys where you can stop safely if necessary. They have no facilities. Do not walk on or close to the hard shoulder or motorway lanes. Take care when re-joining the motorway (see advice on page 141).
Three motorway service areas are now open at:

- Lusk on the M1 motorway, Co. Dublin;
- Castlebellingham on the M1 motorway, Co. Louth; and
- Enfield on the M4 motorway, Co. Westmeath.

These are online services, which include parking for cars, motorbikes, coaches and HGVs, public toilets, playgrounds, baby changing areas, fuel and food. They are open 24 hours a day, 7 days a week.

The term ‘offline services’ is used to describe services available off the motorway, perhaps in a local town or village.

The following signs indicate the motorway services which may be available:
Stopping and parking

You may only stop or park on the motorway when:

- your car breaks down,
- a Garda signals you to do so,
- there is an emergency (such as a crash),
- there are road works, or
- you are at a toll plaza.

Before you begin a long motorway journey, make sure your vehicle:

- is fit to carry out a long journey at motorway speeds,
- has the correct tyre pressure,
- has enough oil and coolant, and
- has enough fuel to at least take you to the next petrol station.

Also make sure that any loads carried or towed are secure and that you have enough money or a suitable pass if you are using a tolled motorway.

What to do if your vehicle breaks down

- Look out for marked parking areas.
- Move your vehicle to the hard shoulder. Park as near to the left as you can. If you cannot do this, take steps to warn other drivers such as switching on your hazard warning lights.
- Use the roadside phone to contact the gardaí. This automatically lets them know your exact location. If you cannot use this phone use your mobile but be aware they will require information about your location.
- Do not place any warning device such as a triangle on the motorway as it is too dangerous.
- Never try to do repairs yourself on the hard shoulder.
- Wear a high visibility vest. Always carry at least two in the vehicle.
Do not walk on the motorway. Leave your vehicle through the left-hand door and make sure your passengers do the same. Leave animals in the vehicle or, in an emergency, keep them under control on the verge.

Make sure that passengers keep away from the motorway lanes and hard shoulder, and keep children under control.

Wait for help on the embankment side of the motorway well behind the crash barrier.

If for some reason you are unable to follow the above advice, you should stay in your vehicle with your safety belt securely fastened and switch on your hazard lights.

Before you rejoin the motorway after a breakdown, build up your speed on the hard shoulder before merging into traffic. Be aware that other vehicles may have stopped on the hard shoulder.
Obstructions

If you become aware of something blocking the flow of traffic ahead, use the roadside telephone or a mobile phone to tell the gardaí. Do not attempt to remove it yourself. Do not use a mobile phone whilst driving.

Driving in fog

Dense fog seriously reduces your visibility and makes driving very dangerous. Our advice is to switch on dipped headlights and fog lamps, reduce your speed and keep a safe distance from the vehicle in front. If the fog closes in, reduce your speed further and take your time getting to your destination.

The added dangers posed by dense fog is that a collision involving one vehicle can quickly involve many others, especially if driving too fast and too close to one another. The greatest risk is of a multiple-vehicle pile-up on roads with higher speeds such as motorways and dual carriageways. As you enter fog, check your mirrors and slow down. Use your foot brake lightly so that your lights warn following drivers.

Toll plazas

When approaching a toll, reduce your speed appropriately. Always leave a safe gap between your vehicle and the vehicle in front. All toll roads in Ireland, with the exception of the M50 eFlow barrier-free tolling system, are managed by a conventional barrier-operated toll plaza. For these toll roads, the toll payment options are:

- manual lanes with a toll booth attendant;
- automatic coin machine lanes; and
- payment by electronic toll tag.
**Toll lane signage**

</tbody>
</table>
Tunnels

The general rules of the road and the Road Traffic Acts apply, but specific road safety issues apply when you are approaching, driving through or leaving a tunnel.

Approaching the tunnel

- Check you have enough fuel in your vehicle before entering the tunnel.
- Remove sunglasses.
- Switch on dipped headlights.
- If available tune in to the designated FM radio station as this will let you hear safety instructions during your journey. The station frequency will be displayed on an information sign at the entrance to the tunnel.
- Keep a safe distance from the vehicle in front. Remember, you’re entering a tunnel and tailgating could create an emergency. The recommended minimum safe distance for a car or motorcycle is 50 metres and for all other vehicles 100 metres. Always remember the ‘two second rule.’
- Be aware there are restrictions on the use of tunnels by Heavy Goods Vehicles (HGVs).
  - The maximum permissible height will be sign-posted. You must check this before you enter the tunnel.
  - Wide loads may not be permitted. If you are carrying a wide load you must contact the tunnel operators well in advance to see if the load is allowed.
  - Vehicle size - there may be a ban on the use of the right-hand lane in a tunnel by large goods vehicles or other non-passenger vehicles if the number of axles on the vehicle equals or is more than the figure shown on a regulatory sign provided on the approach road to a tunnel.

For detailed information contact the tunnel operator.
In the tunnel

- Keep in lane and do not overtake.
- You must not drive in the right-hand lane in a tunnel if you are driving a type of vehicle prohibited from using this lane.
- Do not turn or reverse.
- Do not stop, except in case of emergency.
- Obey the speed limits. There are two forms of speed limit signs.
  - a standard speed limit sign applies where there is a fixed speed limit. You must obey the speed limit and remember this is the maximum permitted speed, not the required speed.
  - where the speed limit can vary you will see variable message signs, which are black squares with red circles and figures in white or yellow throughout the tunnel. The speed limit is shown by the figures and will vary according to traffic conditions and road safety considerations. You must obey the speed limit and remember this is the maximum permitted speed, not the required speed. ‘Always remember the two second rule.’
- Keep your distance. The recommended minimum safe distance for a car or motorcycle is 50 metres and for all other vehicles 100 metres.

Stopping

If you are instructed to stop, you should stop and,

- keep a safe distance between your vehicle and the vehicle in front,
- switch on your hazard warning lights,
- switch off your engine,
- check your radio for instructions from the tunnel operator,
- check all electronic signs in the tunnel for information, and
- if necessary, leave the tunnel using the nearest available pedestrian exit.
Breakdown or a crash

If there is a breakdown or a crash in the tunnel, you should:

- switch off your engine,
- switch on your hazard warning lights,
- check your radio for instructions,
- go to an emergency station and use the emergency phone to tell the tunnel operator, and
- check all electronic signs in the tunnel for information.

Fire in your vehicle

If there is smoke or fire in your vehicle, you should:

- switch off your engine,
- leave your vehicle immediately,
- go to an emergency station and use the emergency phone to tell the tunnel operator, and
- leave the tunnel from the nearest available exit.

Fire in another vehicle

If there is smoke or fire in another vehicle, you should:

- if the fire is behind you, drive out of the tunnel, or
- if the fire is ahead of you, turn off your engine, leave the vehicle immediately, and leave the tunnel by the nearest emergency exit.

Leaving the tunnel

- Keep a safe speed and position on the roadway.
- Follow the road signs.
Signage in tunnels

Be aware that as with all emergencies, care needs to be taken to find the safest evacuation route. Take note of information provided on signage to determine what action you should take.
Section 12:

Assisting Gardaí

An Garda Síochána are responsible for enforcing road traffic law. This section covers the Garda signals and instructions you must obey when on the road.

Signals

If a Garda is controlling traffic, their signals override all other signals from traffic lights. This means that if they signal you to stop, for example, you must do so even if a green light is showing. The signals and their meanings are shown below. You must understand them so you know how to respond when in traffic.
Instructions

You must do the following if a Garda asks you to:

- Show your driving licence, which you must carry at all times when driving.
- Allow the Garda to examine the insurance disc, tax disc, and, where relevant the NCT disc, all of which you must display on your vehicle.
- Produce a certificate of roadworthiness or NCT certificate, as appropriate, at a named Garda station within 10 days.
- Produce a valid motor insurance certificate to a Garda within 10 days of it being requested. A Garda may ask to see a valid motor insurance certificate anytime up to a month after observing or reasonably believing that an uninsured vehicle has been used in a public place.
- Produce the vehicle registration certificate at any reasonable time.
- Stop your vehicle and allow a Garda to check it for defects.
- Give your name and address.
- Write out your signature.
- Give a sample of your breath. You may be required to provide a roadside breath sample if you have been involved in a crash, if you have committed a road traffic offence or if a Garda forms the opinion that you have consumed an intoxicant, such as, alcohol or certain drugs.
Gardaí can set up Mandatory Alcohol Testing checkpoints (MATs) to take roadside breath samples without the need to form the opinion that you have consumed an intoxicant. It is a criminal offence to refuse to provide a sample.

If you are arrested for an offence related to alcohol and driving or refusing to give a roadside breath sample, you will be required to provide a sample of breath and blood or urine at a Garda station.

Other controls on road users

- Officials from the Revenue Commissioners including Customs may also stop and examine vehicles.
- Your vehicle may also be impounded by a Revenue Official and/or Gardaí.
- You may also be stopped by the Gardaí working with Transport Officers from the Road Safety Authority who will check the Tachograph and Operator’s Licence.
What to do when an emergency vehicle approaches

You need to know that to do when you see an emergency vehicle. You must react quickly, safely and carefully to allow emergency service vehicles to pass.

Gardai, fire fighters and ambulances save lives in the course of their work and every second counts when they are responding to an emergency.

When an emergency vehicle approaches:

- Clear the way as soon as you can do so safely when you see the flashing lights and/or hear the sirens.
- Never mount the kerb unless you absolutely have to and, even then, only if you are certain that there are no pedestrians in the area.
- Check your rear mirror and both side mirrors to gauge the speed of the emergency vehicle and also look out for pedestrians, cyclists, motorcyclists and other road users. Indicate your intention to pull over. Pull over only in a place which has enough space for the emergency vehicle to pass you safely.
- Stay there until the emergency vehicle has passed. Watch out for other emergency vehicles as there may be more than one.
- Indicate that you are going to pull out again. When it is safe to do so, gradually merge back into traffic.

Never ever:

- Tailgate or overtake an emergency vehicle with lights or sirens unless directed to do so.
- Race after an emergency service vehicle to get through a traffic light.
- Break a red light or speed to allow emergency service vehicles to pass you unless you’re directed to do so by the Gardai or emergency service personnel.

For more information see ‘Sharing the Road with Emergency Service Vehicles – some basic tips’, available from www.rsa.ie.
Section 13:
Factors that affect safe driving

The main factors that can affect your driving are:
- alcohol;
- drugs (prescription and non-prescription);
- tiredness and fatigue;
- road rage or other forms of aggression.

Individually or together, these factors will:
- affect your judgment;
- slow your ability to react to and avoid hazards;
- cause you to lose concentration; and
- make you a less safe and socially responsible driver.

Alcohol

Alcohol is a major factor in crashes that lead to death and injury.

Research proves that even small amounts of alcohol affect your judgement and ability to drive.

**REMEMBER**

The only safe advice is to NEVER EVER drink and drive. Could you live with the shame?
There is no reliable way to tell how much you can drink before you exceed the legal limit. Our best advice is never ever drink and drive. Please check the current levels at www.rsa.ie.

The Gardai may breathalyse any driver stopped at a mandatory alcohol checkpoint without the need to form any opinion in relation to the driver of the vehicle.

Gardai must conduct mandatory testing of drivers for alcohol at the scene of a crash where someone has been injured, or of a driver who has been injured and removed to hospital.

By law, drivers may be required to give a sample of breath in a Garda Station. Gardai are allowed to make arrangements to take a blood or urine sample and have it analysed to check the level of alcohol. The result of these tests can be used as evidence when the driver’s case goes to court.

Penalties for drink driving

Once stopped by An Garda Síochána a driver may be tested for alcohol and taken to a garda station for further testing. In all cases, if a driver fails a preliminary breath test at the road side they will be arrested and required to provide an evidential breath, blood or urine specimen at a Garda station.

The offence of refusing to provide a sample of blood, urine, or breath for evidential purposes will attract an automatic disqualification of four years for a first offence and six years for a second or subsequent offence.

Under the new system if a driver is not already disqualified from holding a driving licence at the time of detection or has not availed of the fixed penalty notice option in the preceding 3 years, and the BAC (Blood Alcohol Concentration) levels in the body do not exceed 100mg, he or she will be subsequently served with a fixed penalty notice. Court proceedings will not be initiated if payment of the fixed charge is made and the penalty accepted.

The penalties which apply are:

- If a driver is tested and they are between 50mg and 80mg they will be served an on the spot fixed penalty notice, receive a fine of €200 and 3 penalty points. Points will remain on the licence record for a period of three years.

- If a driver is tested and they are between 80mg and 100mg they will be disqualified from holding a licence for six months.
If a driver who is a learner, novice or professional driver are tested and they are above the 20mg limit (but less than 80mg) they are served with an on the spot fixed penalty notice, receive a fine of €200 and the person will be disqualified from holding a driving licence for three months.

Where a driver is tested and they are above 100mg (or 80mg for a learner, novice or professional driver) or they have failed to pay a fixed penalty notice they will have to go to Court where the disqualification periods range from 1 to 6 years depending on the level of alcohol detected, and whether it is a first or subsequent offence.

Drugs

It is against the law to drive a car, motor bike, truck, pedal bike or an animal drawn vehicle while 'under the influence of an intoxicant to such an extent as to be incapable of having control of the vehicle'.

Intoxicants include alcohol and drugs, whether taken separately or together. The word ‘drugs’ here includes legal prescribed and over the counter (OTC) medicines.

If a Garda suspects you of driving under the influence of drugs, they may arrest you. You will then have to give a blood or urine sample to be tested for the presence of any drugs (prescription and non-prescription). If they are present, you may be convicted of driving while under the influence of an intoxicant.

Driver tiredness and fatigue

You should not drive while tired or fatigued. Research has shown that tired drivers are a major road safety risk, both to themselves and to others.

If you are tired and fighting sleep, you are likely to experience ‘micro sleeps’. These episodes can last up to 10 seconds and can be experienced even when your eyes are open.
During a micro-sleep of even 4 seconds, your car can travel 100 metres (more than the length of a football pitch) without you being in control of your vehicle.

All drivers are at risk from driver tiredness but the following drivers are particularly high risk;

- Night workers
- People driving home after a night shift
- Lorry drivers
- Company car drivers
- Men (particularly those aged 18-24 and 50+)
- Skilled manual workers

Truck drivers fall into several of the above high risk groups and need to be particularly careful.

Advice for drivers:

- Never drive if you are fighting sleep.
- Prepare yourself for driving by ensuring you get adequate sleep.
- If you are on any medication check if it causes drowsiness.
- Prepare your journey properly and plan where you can take a safe break from driving.
Stop in a safe place when you feel tired.

Drink a cup or 2 of strong coffee or caffeinated drink and take a nap for a maximum of 20 minutes (set the alarm on your mobile phone). Caffeine takes about 20 minutes to take effect and much more than this and you might wake feeling groggy.

After the nap, if it is safe to do so, get some fresh air and stretch your legs.

NOTE: these measures should only be considered in an emergency and should not be used on a regular basis. If you are a professional driver you should consider what long term steps you need to take which will help you to get the sleep that you need.

Do not be tempted to keep driving when you are tired because you are only minutes from your destination. Many tiredness-related collisions occur within a few minutes of the driver’s destination as the body begins to relax.

For further advice and information on Driver Tiredness see RSA leaflet ‘Driver Tiredness’ which is available to download on www.rsa.ie.

**REMEMBER**

If you are suffering from a serious lack of sleep the only cure is sleep.
Road rage and aggressive driving

If you display road rage as a driver, it means you have uncontrolled anger that results in intimidation or violence against another driver.

Aggressive driving is inconsiderate, stupid driving. It can involve speeding, tailgating (driving too close behind another vehicle), failing to use an indicator for lane changes, recklessly weaving in and out of traffic and over-use of a horn or flashing headlights.

If another driver is attempting to provoke you, don’t react. Don’t be tempted to speed up, brake or swerve suddenly. This could cause a crash or make other drivers think you are confronting them. Instead, stay calm and remain focused on your driving to complete your journey safely. Always remember that safety is your number one concern.

Report all incidents to your local Garda station or contact Traffic Watch on: Lo-Call 1890 205 805.

Remember: Throwing litter from a vehicle is not only irresponsible but can cause a hazard to other road users and yourself.
REMEMBER

You must not supply a mechanically propelled vehicle to anyone who is under 16 years of age for use in a public place. The word ‘supply’ means sell, hire, loan, gift or provide in any other way. If you do, you can be fined up to €3,000 or face up to six months imprisonment.
Section 14:
Correct behaviour at the scene of an accident

This section covers what you must do if you have been involved in an accident, whether with another vehicle, another user of the road and/or with an object along the road. It also outlines what to do if you come across an accident.

What drivers must do at an accident or in an emergency

- If you are involved in an accident, you must stop your vehicle and remain at the scene for a reasonable time. If vehicles are blocking the roadway or posing a danger to other road users, the roadway should be marked and the vehicle should then be removed as soon as possible.

- If you are asked by a garda, you must give your name and address, the address where the vehicle is kept, the name and address of the vehicle owner, the vehicle's registration number and evidence of insurance, such as the name of your insurance company or a disc or motor insurance certificate. If there is no garda at the scene, you must give this information to any person involved in the crash or, if requested, to an independent witness.

- If you or another person are injured and there is no garda at the scene, the accident must be reported to the nearest garda station.

- If the accident damages only property and there is a garda in the immediate vicinity you must report it to the garda. If there is no garda available you must provide this information to the owner or the person in charge of the property. If, for any reason, neither a garda nor the owner is immediately available you must give all relevant information at a garda station as soon as reasonably possible.
You are advised to keep a disposable camera with built-in flash in your vehicle and if possible take photographs of the scene and any damage done.

Take care when moving damaged or broken-down vehicles and make every effort to warn oncoming traffic of the accident.

You can warn them by using your hazard lights.

If you need to ask for another road user’s help to warn traffic, do so right away.

If you have a reflective advance-warning triangle, (heavy vehicles and buses must have one), place it on the road far enough from the scene of the accident to give enough warning to approaching traffic. A warning triangle should not, however, be used on a motorway or in a place where it would otherwise be unsafe.

When placing a triangle you should take account of prevailing road conditions, traffic speed and volume. This is particularly important on motorways and dual-carriageways.

If the breakdown occurs near a bend in the road, make sure you give warning to traffic on both sides of the bend.

Leaking fuel from a crashed vehicle is dangerous, so be careful approaching any vehicle after an accident.

Carry at least two high visibility vests or jackets and a torch in your vehicle. If there is an accident, wear the vest or jacket and use the torch to alert other road users of your presence.

---

**REMEMBER**

*Gardai must* conduct mandatory testing of drivers for alcohol at the scene of a crash where someone has been injured, or of a driver who has been injured and removed to hospital.
## What to do if you arrive at the scene of an accident

<table>
<thead>
<tr>
<th><strong>DOs ✓</strong></th>
<th><strong>DON'Ts X</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Do remain calm.</td>
<td>• Don’t panic – assess the situation before taking action.</td>
</tr>
<tr>
<td>• Do switch off the engine and apply the handbrake.</td>
<td>• Don’t stay at the scene if there are enough people helping and keeping it under control.</td>
</tr>
<tr>
<td>• Do use a reflective advance-warning triangle if available, except on a motorway.</td>
<td>• Don’t get injured yourself – park your vehicle safely out of the way.</td>
</tr>
<tr>
<td>• Do switch on hazard warning lights and parking lights.</td>
<td>• Don’t move an injured person unless there is a risk of fire or of the vehicle turning over.</td>
</tr>
<tr>
<td>• Do make sure you are safe as you try to help others.</td>
<td>• Don’t attempt to lift a car off an injured person without help.</td>
</tr>
</tbody>
</table>
• **Do** make sure others are safe, however you **should** keep any injured people warm, by placing coats or rugs around them.

• **Don’t** remove helmets from injured motorcyclists. Neck injuries are common in motorcycle collisions, and any attempt by inexperienced people to remove the helmet may leave the injured person paralysed from the neck down.

• **Do** organise bystanders to warn oncoming traffic from both directions, if this has not already been done. Be particularly careful at night so that people giving help are visible (by wearing reflective armbands or bright clothes or carrying lit torches).

• **Do** call for help. Contact the emergency services on 999 or 112.

• **Don’t** allow anyone to smoke at, or close to, the scene.

• **Don’t** give an injured person anything to eat or drink.
Accidents involving dangerous goods

If a vehicle carrying petrol, heating fuel or acid is in an accident, you should:
- keep well clear of the scene,
- if possible, position yourself to make sure that the wind is not blowing from the accident towards you,
- warn other road users about the danger,
- give as much information as possible about the marking labels on the vehicle when summoning help, and
- let the emergency services do any rescuing.

The signs for vehicles carrying hazardous chemicals are shown below.

![Warning signs](image)

Harmful to skin  Explosive  Bio Hazard  Acid

If you would like to know more about transporting dangerous goods by road, you can contact the Health and Safety Authority (www.hsa.ie) for a guide to the Carriage of Goods by Road Act 1998 and the regulations made under it.
Encouraging good road user behaviour is important and Ireland has adopted a system of penalty points to support this change. This system is a key part of road safety policy in this country, and is designed to save lives.

If you break the law, there’s a price to be paid. The system will record your failure and the penalty on your driver licence record. For minor offences, the penalty is a sum of money, a fixed charge, and points that attach to your licence record: penalty points. For more serious offences you may be brought to court. The system applies to both full licence and learner permit holders.

If you break the law and are caught, you will be fined and you will build up penalty points.

REMEMBER
If you collect 12 points in 36 months, you will be banned from driving.

This section describes how penalty points and fixed charges work and outlines the points and charges that apply to road traffic offences. For a list of all current penalty point offences and fixed charges, see appendix 4 or www.rsa.ie.

Penalty points

The penalty points system covers offences that relate to road safety. Offences can be detected either:

- by Gardaí directly, or
- in the case of speeding, safety cameras.
If a Garda stops you for committing an offence

- You must show your driving licence or learner permit, and give your name and address, if asked.
- You will receive a fixed charge notice by post.
- You have the choice to pay the fixed charge within the time allowed or let the matter go to court.
- Penalty points will be applied to your licence record, either when you pay the charge or if convicted of the offence in court.

If your vehicle is recorded breaking the speed limit

- If you are the registered owner of the vehicle, you will receive the fixed charge notice.
- If you were not driving the vehicle when the offence took place, you must give the Gardaí the name and address of the driver of your vehicle within 28 days. If you do, the named driver will receive the fixed charge notice. If you don’t, you will be assumed to be the driver of the vehicle when the offence took place.
- Penalty points will be applied to the driver’s licence record either when the charge is paid or when the driver is convicted of the offence in court.

**REMEMBER**

Most penalty point offences attract a fixed charge. Some offences will result in a mandatory court appearance without the option of only paying a fixed charge.

For more information on penalty points, visit the penalty point website [www.penaltypoints.ie](http://www.penaltypoints.ie).
Fixed charge system

This system applies to many offences, including most of the penalty point offences.

How it works

- You receive a fixed charge notice setting out:
  - the details of the offence,
  - the fixed charge amount to be paid, and
  - where that charge can be paid.
- You have 28 days to pay the fixed charge.
- If you do not pay the charge within this period, it increases by 50%. You then have another 28 days to pay the increased charge.
- If you do not pay it, the matter goes to court.
Driving bans

- If you build up 12 or more penalty points in 36 months:
  - you will receive a notice telling you that you have been banned from driving for 6 months from a particular date, and
  - you will have to hand in your driving licence to your local motor tax office within 14 days of the start of the driving ban.

- You will be banned from driving if you are convicted in court of an offence such as drink driving, dangerous driving or leaving the scene of a crash. You will be banned from driving as a result of the conviction alone, no matter how many penalty points are on your licence record.

- The courts can issue driving bans for any offences involving vehicles, not just the offences already resulting in automatic bans. The court will decide the period of the ban in each case.

- If you are convicted in court, you may be fined and, in some cases, face a prison term.

**REMEMBER**

It is an offence not to surrender your licence. It is an offence to drive while banned from doing so.
Section 16:

Rules for motorcyclists

Motorcycles represent less than 1 in 50 of all licensed vehicles in Ireland, but motorcycle users account for 1 in 8 road deaths. In a crash, motorcycle and moped users have less protection than drivers or passengers in vehicles.

This section is aimed at motorcyclists, including those who use mopeds, and describes how you can keep yourself safe on the road. Trained motorcyclists around the world prove everyday that biking can be a fun, safe and satisfying activity if you have appropriate skills, the right attitude to safety and the benefit of education and training.

Licence

You must hold a current driving licence or learner permit for a motorcycle or moped. See section 1 for information on licences and permits and the categories of vehicle they cover. As a motorcyclist on a learner permit you will be required to display an ‘L’ on a yellow fluorescent tabard to give greater awareness to other road users that you are a learner and that additional care may be required. The ‘L’ must conform in size and colour to the normal ‘L’ plate.

Insurance and tax

You must display a current motor tax disc and have insurance cover before you can take your motorcycle or moped on a public road.
Since December 2010 all new first time learner permit holders for motorcycles must undertake Initial Basic Training (IBT) with an approved IBT instructor, before they can ride a motorcycle unsupervised.

**What is IBT?**

Initial Basic Training (IBT) is a training course that teaches basic riding skills to learner motorcyclists. IBT is a 16-hour course broken into 4 modules focusing on theory and practical skills, to be taken in sequence.

When you have completed each IBT Module your IBT course, your instructor will record the details of your training in your logbook and, once all modules have been completed, issue you with a Certificate of Satisfactory Completion.

You must keep your Certificate with your learner’s permit and carry it with you whenever you are riding as you may be asked to produce it by a member of An Garda Síochana.

You can then apply for your practical driving test.

**Carrying passengers**

You must not carry a passenger if you hold a learner permit as this is illegal. If you wish to carry a passenger, make sure your full licence and your insurance policy allows you to do so. The rider should make certain the passenger wears appropriate PPE (properly fitted and secured helmet, motorcycle jacket, trousers, gloves and boots – all properly fitting). A rider must not carry more than one pillion passenger, who must sit on a proper seat. They must face forward with both feet on the footrests. Riders must not carry a pillion passenger unless their motorcycle is designed to do so.
Daylight riding

- Make yourself as visible as possible from the side, as well as the front and rear.
- Wear a white helmet and fluorescent clothing or strips.
- Use dipped headlights. Even in good daylight, they may make you more visible.

Night-time riding

- Wear reflective clothing or strips to improve your chance of being seen in the dark. These reflect light from the headlamps of other vehicles, making you more visible from a long distance.
Lights
You must have on your motorcycle or moped:
- a white or yellow head lamp,
- a red rear lamp,
- a red rear reflector, and
- a number plate light on the back.

In order to be seen at all times it is important to:
- Use your dipped headlights at all times.
- Use headlights at night and during the day when visibility is seriously reduced.
- Slow down, and if necessary stop, if you are dazzled by oncoming headlights.
- Use full headlights when appropriate to do so.
- Use your hazard warning lights when your motorcycle or moped is stopped in a dangerous place.
- Make sure all sidelights and rear number plate lights are lit at night.

Personal protection equipment
Wear appropriate clothing and a secure helmet every time you get on your bike.

Protective clothes
- Jackets and trousers should give you enough protection from impact, abrasion, cold and weather conditions.
- Use body armour on exposed areas such as the back, knees, elbows, shoulders, hips and shins. This should be adjustable so it fits snugly and does not move in a crash.
- You should wear a good reflective jacket, to make you more visible on the road.
- Wear protective gloves, and footwear that at least comes above the ankle.
Helmets

- Buy from reputable dealers. Try several different sizes and makes. Make sure the dealer knows how to assess fit.
- Never buy or use second-hand helmets.
- Never lend your helmet to someone else.
- If your helmet is damaged, replace it.
- Read the manual for your helmet and follow the care instructions.
- Clean your visor gently with warm soapy water.
- Use a helmet with a clear visor. If you use a dark visor, it will be almost impossible for you to see oil on a wet road.
- Replace the visor if it is scratched.
- Make sure your helmet is securely fastened. An unsecured helmet is illegal and useless in a crash.
- Do your research before you buy. Ensure all equipment meets EU standards.

**REMEMBER**

Since August 2012 new penalty points exist for riders and pillion passengers who ride on a motorcycle without wearing a crash helmet. Riders can also receive additional penalty points for permitting passengers to ride on the motorcycle whilst not wearing a crash helmet.
Eye and ear protection

- Use ear protection on long journeys.
- If you wear an open face helmet (one without a chin bar) make sure you wear eye protection.
- When riding a motorcycle, do not use a personal entertainment system.
Riding a motorcycle

As a motorcyclist you **must** obey the law governing traffic. You need to develop:

- a high level of attention;
- an awareness of likely hazards;
- good anticipation; and
- excellent observational skills.

You also need to make the most of the advantages of height, positioning, flexibility and manoeuvrability a motorcycle provides. The ability to sense danger in a situation develops only with experience, so you **should** always ride within your abilities.

Always make sure that the road space that you intend to enter is completely safe and be aware that others may be looking at larger objects and not the narrow profile of the motorcycle. Gravel chips, sand, pools of water and rough surfaces can seriously de-stabilise motorcycles and can be a cause of crashes. Reduce speed before hazards such as these and continue riding with extreme caution.
Follow the rules below.

- Avoid riding between traffic lanes.

- Keep well clear of other vehicles when passing them. Remember that drivers might not always see you in their ‘blind spots’.

- If your machine is fitted with indicators and a brake light, use them. However, if other road users cannot see these signals, or if you think they might not be working, you should give clear hand signals as well. See section 7 on hand signals.

- Use rear-view mirrors if your motorcycle or moped is fitted with them. Remember though, not to rely on your mirrors when moving off, changing lane, turning right and overtaking. You should also look over your shoulders and check any ‘blind spots’.

- Your motorcycle tyres must have a tread depth of at least 1 mm, but you should replace them before they become this worn.
Tactics for surviving as a motorcyclist

1. Watch your surroundings. This means watching:
   - into the far, middle and near distance, and
   - behind you, using your mirrors and checking over your shoulders, before changing position or turning.

2. Keep your distance. Use the ‘two second rule’ (see Section 8). In wet or icy conditions, always leave a bigger gap.

3. Be seen. Make sure your position is correct. Use dipped headlights and wear high visibility clothing (such as a neon vest and ‘Sam Browne’ reflective belt).

4. Do not surprise others. Never do anything on the road that could cause another road user to slow down, brake or swerve or that could startle pedestrians.

5. Think like other road users. Anticipate how other road users might react.

6. Read the road. In other words, ride to current road, weather and traffic conditions.

7. Adopt the right speed for the conditions. Never let others dictate your pace.

8. Never ride your bike after consuming alcohol or drugs.

9. Trust your machine by maintaining it properly. Follow the acronym **POWDERS** and check petrol, oil, water, damage, electrics, rubber (tyres) and security.

You can get more detailed information on safety and on caring for and maintaining your motorcycle in the booklet *This is Your Bike* from the Road Safety Authority. Phone Lo-Call 1890 50 60 80, e-mail info@rsa.ie or visit the website [www.rsa.ie](http://www.rsa.ie).
Section 17:
Rules for cyclists

This section covers the rules for keeping your bicycle roadworthy, wearing proper equipment and cycling safely and considerately. You should also be familiar with the rules on cycle tracks, (see page 159), and hand signals, (see Section 7).

Keeping your bicycle roadworthy

- Your brakes, tyres, chain, lights, reflector and bell must all be in good working order.
- Your bicycle should be the right size to allow you to touch the ground with both feet.
- When carrying goods, you should use a proper carrier or basket and take care that nothing is hanging loose.
- At night you must carry a lamp showing a white or yellow light to the front and a lamp showing a red light to the back. These are the minimum lighting requirements laid down by law. However, to be even more visible to motorists at night, you should:
  - add strips of reflective material to the bike (white to the front and red to the back),
  - wear a reflective armband, and
  - wear a ‘Sam Browne’ reflective belt or reflective vest.

REMEMBER
Check your gear, be seen, wear a helmet and listen – avoid using mp3s, radios or mobile phones when cycling.
Bicycle checklist

- Handlebars should be square with the frame and level with the saddle. Movement should be neither too stiff nor too loose.

- When on the saddle, both feet should just touch the ground.

- Your wheels should be straight and in line. Replace wheels if they are buckled or out of alignment.

- Tighten loose spokes and replace any that are damaged.

- Make sure your tyres are properly inflated, with a good tread.

- Make sure mudguards are secure and well clear of the wheels.

- Check your gears and get them adjusted when necessary.

- Check your brake cables and adjust them when necessary. Replace them when frayed.

- Make sure the closed ends of brake shoes face the front.

- Make sure brake blocks are close to the rim of the wheel. Replace worn blocks.

- Check pedals and replace them when worn or broken.
Make sure your lamps are white or yellow to the front and red at the back. Use a red reflector. Replace batteries when necessary and clean lenses.

Make sure your bell is within easy reach of your thumb.

Oil all moving parts.

Wear a cycle helmet at all times.

A bicycle should have the following braking system:

- If it has one fixed wheel or is designed for a child under 7 years of age, it should have at least one brake;
- If it is designed for an older child or an adult or neither wheel is fixed, it should have one brake acting on the front wheel and another for the back wheel.

**Protective clothing and equipment**

As a cyclist, you are a vulnerable road user and your bicycle will not protect you if there is a crash. The law does not require you to wear a helmet. However, in the interest of road safety, and in your personal interest, you should wear a helmet at all times.

When buying a helmet:

- look for a mark to show that it has been made to a recognised national standard, and
- check that it does not restrict your field of vision or your hearing.

**When you own a helmet you should:**

- replace it when it is damaged or dropped,
- adjust the straps on your helmet to fit you correctly. Always check the manufacturers instructions.
Cycling safely

- Make sure you keep to the left. Always look behind and give the proper signal before moving off, changing lanes or making a turn.
- You must obey the rules applying at traffic lights, pedestrian crossings, pelican crossings and zebra crossings.
- Keep both hands on the handlebars except when signalling or changing gears.
- Keep both feet on the pedals.
- Do not take up a position on the ‘inside’ of a large vehicle out of view of the driver. Instead, stay behind if the large vehicle has stopped at a junction with the intention of turning left.
- Keep clear of the kerb – riding clear will make you more visible and help reduce unsafe overtaking.
- When turning left, keep close to the left-hand side of the road, watch out for pedestrians and give the proper signal in good time.
- Beware of blind spots – all vehicles have blind zones and a driver may not be able to see you!
- When turning right, get into the left side of the right-turning lane, look behind and give the proper signal before you move out and ensure traffic in that lane is not going straight ahead. On steep hills or busy roads, pull into the left-hand side of the road and wait until there is a break in traffic in both directions to let you make the turn safely.
- When cycling alongside traffic stopped in line, be aware of gaps in the traffic to allow other vehicles to turn across the stationary lane. The view of the car that is turning may be blocked due to the traffic build-up.
- In poor weather conditions, it may be safer to dismount and cross the roadway on foot. Where available, you should use a pedestrian or controlled crossing.
- Wear reflective clothing at all times.

REMEMBER

Cyclists put themselves and other road users at risk when they do not stop as required at traffic lights.
In the company of one or more cyclists you must have due regard to other users of the road, and you must take full account of prevailing road conditions. On occasion it may be safe to cycle two abreast, but you must not cycle in a manner likely to create an obstruction for other users.

**Cycle tracks**

A cycle track or lane is a reserved part of a roadway for bicycles (not motorcycles).

Some cycle tracks are bordered by a continuous white line on the right-hand side. These are only for bicycles and motorised wheelchairs, so no other drivers may use them or park in them.

Other cycle tracks have a broken white line on the right-hand side. Other drivers may make temporary use of this type of track if it is not occupied.

Cycle tracks are reserved 24 hours a day, unless an upright information sign at the start of and/or the side of the track shows another period of time.

A cycle track can also be a reserved part of a footpath or other area off the road.

If a cycle track is two-way, meaning bicycles travelling in opposite directions at the same time can use it, cyclists should stay as near as possible to the left-hand side of their track.

You must obey cycle track lights.

---

**REMEMBER**

Cyclists must use any cycle track provided as part of a pedestrian street or area, or as part of a contra flow cycle track.
**Rules on cycle tracks for other road users**

**Driving**

No vehicle (other than a motorised wheelchair) may cross into or over a mandatory cycle track unless the driver is entering or leaving a place or a side road.

**Parking**

No driver may park a vehicle in a mandatory cycle track.

A driver may park in a non-mandatory cycle track for up to 30 minutes, but only if they are loading or unloading their vehicle and there is no alternative parking available. Remember the basic duty of care and do not obstruct a cycle track.

If a driver parks their vehicle in a cycle track that operates for only some of the day (shown on an information plate under the cycle track sign), they **must** move the vehicle by the time the next operating period starts.

If there is no information plate, it means the cycle track operates all the time and no parking is allowed.
The table below sets down particular road traffic rules on cycling which you must obey.

<table>
<thead>
<tr>
<th><strong>DOs ✓</strong></th>
<th><strong>DON’Ts ✗</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Do cycle in single file when overtaking.</td>
<td>• Don’t ever ride or attempt to ride a bicycle while under the influence of alcohol or drugs.</td>
</tr>
<tr>
<td>• Do allow extra space when overtaking parked vehicles as the doors may open suddenly.</td>
<td>• Don’t ever ride on or across a footpath, other than where a cycle track is provided on the footpath.</td>
</tr>
<tr>
<td>• Do cycle on cycle tracks where they are provided.</td>
<td>• Don’t ever hold on to a moving vehicle.</td>
</tr>
<tr>
<td>• Do cycle in single file if cycling beside another person would endanger, inconvenience or block other traffic or pedestrians.</td>
<td>• Don’t ever cycle side-by-side with more than one cyclist.</td>
</tr>
<tr>
<td>• Do cycle in single file in heavy traffic.</td>
<td>• Don’t ever cycle against the flow of traffic on one-way streets.</td>
</tr>
<tr>
<td>• Do give your name and address, if requested, to a Garda.</td>
<td>• Don’t ever cycle through red traffic lights or pedestrian lights.</td>
</tr>
<tr>
<td>• Do obey signals given by a Garda or school warden.</td>
<td>• Don’t ever cycle on a motorway.</td>
</tr>
<tr>
<td>• Do obey all rules applying to road traffic signs and road markings, including signs and signals at traffic lights, pedestrian crossings, pelican crossings, level crossings and zebra crossings.</td>
<td>• Don’t ever cycle in a contra-flow bus lane, unless signs authorise it.</td>
</tr>
<tr>
<td>• Do know the meaning of hand signals for cyclists and use them when cycling.</td>
<td>• Don’t ever cycle without appropriate lighting during hours of darkness.</td>
</tr>
</tbody>
</table>
The table below lists the actions that you **should** take or avoid taking in the interests of your safety and that of other road users.

<table>
<thead>
<tr>
<th><strong>DOs ✓</strong></th>
<th><strong>DON'Ts ✗</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do keep well back when cycling behind a motor vehicle in slow-moving traffic.</td>
<td>Don’t ever hold on to or lean against stationary vehicles.</td>
</tr>
<tr>
<td>Do take extra care on wet or icy roads or when it is windy.</td>
<td>Don’t ever weave in and out of moving traffic.</td>
</tr>
<tr>
<td>Do use your bell as a warning device only.</td>
<td>Don’t ever carry a passenger unless your bicycle has been built or specially adapted to carry one.</td>
</tr>
<tr>
<td>Do take extra care and look well ahead for uneven road surfaces, drains and other obstructions so that you do not have to swerve suddenly in front of another vehicle.</td>
<td>Don’t ever use a personal entertainment system when cycling.</td>
</tr>
<tr>
<td>Do use a bus lane, and be extra vigilant when a bus is stopped and about to move off from the stop.</td>
<td>Don’t ever use a mobile phone while cycling.</td>
</tr>
</tbody>
</table>
Cyclists on roundabouts

- Be particularly careful when approaching a roundabout.
- Be aware that drivers may not see you easily.
- Watch out for vehicles crossing your path as they leave or enter the roundabout.
- Take extra care when cycling across exits.
- Give plenty of room to long vehicles on the roundabout, as they need more space. Do not ride in the spaces they need to use to get around the roundabout. Be aware of the driver’s blind spots. If you can’t see the driver, they can’t see you. Indeed, it may be safer to wait until they have cleared the roundabout before you go on it.
Section 18:

Rules for pedestrians

Pedestrian deaths account for 1 in 5 deaths on our roads. This section covers the rules on walking along and crossing roads.

The most important rule for all pedestrians is to behave responsibly, exercise care and not endanger or inconvenience other users of the road.

Walking beside or along a road

- If there is a footpath you must use it.
- If there is no footpath, you must walk as near as possible to the right-hand side of the road (facing oncoming traffic).
- Do not walk more than two abreast. If the road is narrow or carries heavy traffic, you should walk in single file.
- You should always wear reflective clothing at night when walking outside built-up areas.
- You should always carry a torch when walking at night time.
- You should always be aware of other road users.
Crossing the road

Follow the do’s and don’ts below to make sure you cross the road safely.

<table>
<thead>
<tr>
<th>DOs ✓</th>
<th>DON’Ts ✗</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Do look for a safe place to cross.</td>
<td>• Don’t cross at a corner or bend in the road.</td>
</tr>
<tr>
<td>• Do stop and wait near the edge of the path. If there is no path, stand close to the edge of the road.</td>
<td>• Don’t cross near the brow of a hill.</td>
</tr>
<tr>
<td>• Do look right and left and listen for traffic.</td>
<td>• Don’t cross near or at parked vehicles.</td>
</tr>
<tr>
<td>• Do let any traffic coming in either direction pass, then look right and left again.</td>
<td>• Don’t cross where there are guard rails along the footpath.</td>
</tr>
<tr>

</tbody>
</table>

Taking care near buses or trams

Take extra care if crossing a road where there is a bus lane (especially a contra-flow bus lane), cycle lane or tram track. You should also be careful when getting on or off buses and when crossing the road at or near bus stops.

**REMEMBER**

Never cross in front of a stopped bus.
Safe crossing places

Use the following places to cross the road safely.

Zebra crossing

This is marked by yellow flashing beacons. The actual crossing area is marked by black and white ‘zebra’ stripes.

Drivers **must** stop to let you cross. As they approach the crossing, they **should** slow down and be prepared to stop. They **must** stop behind the stop line if there is one and **must** not enter any part of the crossing.

Drivers **must** not overtake or park within areas covered by zig-zag markings on either side of the crossing. Section 10, on parking, has more information.

- You do not have the right-of-way over other traffic until you actually step onto the crossing. Never step onto the crossing if this would cause a driver to brake or swerve suddenly.
- You **must** not cross within the area marked by zig-zag white lines if these are provided on either side of a zebra crossing. If they are not provided, you **must** not cross within 15 metres of the crossing.
- If there is a central island, treat each side as a separate crossing.
- Always watch carefully for approaching traffic. Place one foot on the crossing to indicate that you wish to cross. Wait until traffic has stopped before you start crossing.
Pedestrian lights

Pedestrian lights consist of a set of traffic lights for drivers and a set of light signals for pedestrians. Usually there is a push button for pedestrians. When you press it, the traffic lights will turn to red after a short while.

- Do not cross while the ‘wait’ or ‘red man’ light is showing.
- Cross with care when the ‘cross now’ or ‘green man’ is showing.
- If there is a central island at the pedestrian lights, the ‘green man’ or ‘cross now’ sign will let you cross only as far as that. You must then press the push button at another set of lights to cross the rest of the way.
- For vision-impaired pedestrians an audible bleep signal and/or vibrating panel on the push button may be in place to indicate when it is safe to cross.

Pelican crossing

At this crossing, an amber light will flash for a short period after the red light for drivers goes out. Similarly, the ‘green man’ light for pedestrians will flash for a short time before changing to the ‘red man’ light. A flashing amber light at a pelican crossing gives priority to pedestrians.
Traffic lights
If you are crossing at traffic lights, but there are no signals for pedestrians, check the lights in both directions. When the traffic on the road you wish to cross is governed by a red light, cross carefully. Look out for traffic that might be turning onto the road you wish to cross and remember that some traffic lights allow traffic to proceed in some lanes when other lanes are stopped. Be especially careful at junctions with filter lanes.

Uncontrolled crossing places
A traffic island is provided to help pedestrians. These are safer places to cross because the crossing is divided into two parts.

Don’t cross the road in the area in front of a truck. This is a truck drivers blind spot.

REMEMBER
If you can’t see the driver, they can’t see you.
Section 19:
Respecting other road users

This section is aimed at motor vehicle drivers and builds on the information in Section 5 on good driving practice.

The vehicle does not have greater right-of-way than any other road user, so, for safety reasons, you should drive defensively. This means expecting the unexpected and making way for other road users when necessary.

Some of the actions you might need to take in normal conditions include:
- making way for an ambulance, fire engine or Garda vehicle,
- watching and stopping for children emerging from between cars, and
- waiting until a vehicle has started its left-hand turn before you emerge from a side road.

To make sure all road users are safe, be aware of your responsibilities towards:
- pedestrians, children, older people, people with disabilities and wheelchair users,
- cyclists and motorcyclists, and
- any animal traffic on the road.

This helps drivers to become safer and more socially responsible, not only to themselves, but to their families and other road users.

Pedestrians

As a driver, you must not put a pedestrian at risk. In particular, you must give way to pedestrians:
- on or at a zebra crossing (even if they are only waiting to cross),
- on or at a pelican crossing, when the amber light is flashing,
- crossing the road, if you are moving off from a stationary position (for example at a traffic light or a parking space), and
- at a junction, if they have started crossing the road.
Watch out for pedestrians who might attempt to cross the road suddenly from between parked vehicles. Make extra allowances for older people, people with disabilities and children. Watch for pedestrians walking to and from buses.

**REMEMBER**

It is an offence to drive a vehicle partly or fully along or across a footpath, unless you are crossing a footpath to enter or leave a building or other place beside it.

**Children**

By their nature, children have less experience than other people in using the road, so you **should** make extra allowances for their behaviour.

Take care when you are:
- driving beside footpaths where there are young children,
- coming out from side entrances or driveways,
- driving in car parks, and
- reversing, in particular where there are young children. You cannot see a small child behind your vehicle through your mirror. If in doubt, get out and check.

**Schools**

Do not park at a school entrance. Thoughtless parking can confuse parents and their children or block the entrance/exit of a school. It can also force children onto the road to get around your vehicle.

It is an offence if your vehicle blocks a footpath or a cycle track.

You **should** also take care near school buses, especially if overtaking a bus that children are boarding or leaving. School buses are clearly marked with stickers.

Do not leave any room for doubt. If you see school children, particularly young children, you may use your horn to let them know you’re there.
Be careful near children who are cycling. Take extra care near a school, where cyclists may emerge in groups. Remember, it is hard to predict a young cyclist's balance and behaviour.

**School wardens**

Adult school wardens provide safe road crossing places for children outside or near schools. They wear a hat and an overcoat, which include reflective material. Wardens carry a special sign and are allowed by law to stop traffic.

When a warden raises the ‘Stop’ sign (shown below on the left), you **must** stop and remain stopped until:

- the school children have crossed the road,
- the sign is lowered, and
- the school warden has safely returned to the footpath.
Junior school wardens

Junior school wardens are the senior pupils of primary schools who operate in teams of six to give the same service given by an adult school warden. When they want traffic to stop, they give a signal to traffic on both sides of the road. When the traffic is stopped, the wardens take up their position and guide the younger children across the road. All vehicles must remain stopped until all the junior wardens have returned to the footpath.

Never park in a place that blocks a warden’s view. School wardens must be able to see the road clearly to do their work properly and safely.

Cyclists and motorcyclists

Never put a cyclist or motorcyclist at risk and know your duty to be aware of them. They are especially vulnerable if there is a crash.

In particular, watch for cyclists and motorcyclists:

- at junctions,
- where cycle tracks merge with roads,
- when you change lanes,
- when opening your door to get out of a vehicle,
- when stopping and turning, especially when making a left turn, and
- when reversing.

The best way to take care near cyclists and motorcyclists is to use your mirrors and recheck blind spots.

**Overtaking**

Never cut in front of cyclists or motorcyclists when overtaking them. Give them plenty of space, especially:

- in wet or windy weather,
- when road conditions are icy,
- when they are starting off. Cyclists tend to wobble until they build up their speed, and
- when the road surface is poor. Cyclists and motorcyclists may need to avoid potholes.

**Turning left**

On left turns, watch out for cyclists and mopeds close to the kerb in front of you or coming up on your left. Do not overtake a cyclist as you approach a junction if you are turning left. The cyclist might be continuing straight ahead.

**Turning right**

When turning right through a gap in oncoming traffic (for example at a yellow box junction), watch out for cyclists who might be moving up on the inside (at the centre of the road) or might be travelling in a cycle or bus lane running in the opposite direction at the far side of the road. Also use your mirrors to check for any motorcyclists who may be overtaking you as you approach the turn.
**Cycle tracks and parking**

Do not park or drive on cycle tracks. Before you open the door of a parked vehicle, use your mirrors to check for cyclists and motorcyclists coming up on your right and give them enough room to pass.

**Animal traffic**

Always slow down and be prepared to stop when approaching or overtaking animals. If a person in charge of animals gives a signal to slow down or stop, you **must** obey it. Avoid using your horn if animals are in front of you, as it might frighten them.

If you are travelling on a road where animals are common, you will see a warning sign like the one below.
Section 20:

Other road users

Emergency services vehicles

In the course of their duty, Garda, fire brigade vehicles or ambulances and other emergency vehicles can be exempt from some of the road traffic law as long as this does not put other road users in danger. As a user of the road, if you hear or see a Garda or emergency vehicle approaching under emergency conditions and/or using a siren or flashing lights, you should exercise caution, and give way if it is safe to do so. Never ‘tailgate’ an emergency service vehicle (see page 160).

People using agricultural machinery

Tractors

Tractors are governed by normal road traffic laws on driver licensing, insurance, motor tax and vehicle lighting.

All tractors used in a public place must be fitted with safety frames. The purpose of the frame is to protect the driver from being crushed underneath if the tractor overturns. The frame must comply with approved standards.

It is up to the owner or driver to fit a safety cab.

Tractors must carefully transport loose material such as silage, slurry, sand or gravel, so that the material does not spill onto a public road and cause a crash. Loads of lime or other dusty materials, offal or other offensive material must be fully covered with a tarpaulin.

Farmers using agricultural tractors and trailers to haul agricultural produce must not:

- use exceptionally high frames on trailers which could endanger the stability, steering and braking of an agricultural tractor and trailer combination, or
exceed the maximum legally permissible combination weight or the design gross vehicle weight.

For more information contact the RSA on Lo-Call 1890 50 60 80.

Tractors on the road

A tractor used in a public place must obey the laws governing road traffic.

If you are driving a tractor, you should keep left to let faster traffic pass. Your driving mirror must provide an adequate view of the road to the back.

Do not carry a passenger unless the tractor is equipped to carry one.

People in charge of animals

Horse-drawn vehicles

The normal rules apply, including the general rule to keep left. The hand signals to be given by the driver are the same as those given by a cyclist (see Section 7).

A horse-drawn vehicle must be equipped with two red rear reflectors and at night must also carry on the right-hand side of the vehicle a lamp showing a white light to the front and a red light to the back.

You must not drive a horse-drawn vehicle while under the influence of alcohol or drugs.
Riding or leading horses

If you are riding or leading a horse, you **must** remain on the left-hand side of the road and obey all Rules of the Road.

You **should** wear a high-visibility vest and an approved riding helmet.

When leading a horse, you **should** walk ensuring the handler is between the horse and the traffic, so as to prevent the horse from interfering with the traffic.

When riding one horse and leading a second horse, you **must** remain on the left-hand side of the road. You **should** ensure the led horse is on the left-hand side of the ridden horse, to ensure the handler is positioned between the horse and the traffic. This is in order to control the led horse, in the interest of the safety of other users of the road.

Drivers **should** take special care when:

- approaching riding schools or places where horses are likely to appear.
- overtaking horses, especially loose horses or horse-drawn vehicles.
- approaching a horse and rider. If appropriate a driver **must** stop a vehicle and allow them to pass.

Driving animals on the road

If you are in charge of animals on a roadway, you must take reasonable steps to make sure the animals do not block other traffic or pedestrians.

If you are in charge of animals on the road at night, you should carry a lamp showing a white light to the front and a red light to the back. You should also wear a reflective armband.
Section 21:

Regulatory traffic signs

This section includes the signs that show a road regulation is in place. These must be obeyed. Regulatory signs show the course a driver must follow and an action they are required to take or forbidden to take. They are generally circular and have a red border and black symbols or letters on a white background. Mandatory regulatory signs that indicate the direction traffic must take at junctions are blue and white.
**Mandatory signs at junctions (white and blue)**

- Turn left ahead
- Turn right ahead
- Turn left
- Turn right
- Pass either side
- Straight ahead
- Keep right
- Keep left

**Manual traffic control sign at roadworks**

- No entry for pedestrians to tramway
- STOP
- GO
- Téigh
- No entry to goods vehicles (by reference to number of axles)

- With flow bus lane on left
- With flow bus lane on right
- Contra flow bus lane
- Tram lane on left
- Tram lane on right

- Start of cycle track
- End of cycle track
- Electronic variable speed limit sign (tunnel only)
- In a tunnel goods vehicles cannot use right-hand lane (by reference to number of axles)
Traffic lane control signs in a tunnel

- Electronic periodic speed limit sign
- Electronic periodic speed limit sign at school
- Tram only street
- Tram and access only street
- Bus only street
- Turn back
- Pedestrians and bicycles only
- Separate bicycle and pedestrian lanes

Variable message signs (VMS)

- Overhead VMS
- Mobile VMS displaying text message
- Mobile VMS displaying chevrons
- Examples of VMS chevron formats
Section 22:  

**Warning traffic signs**

This section includes signs that warn road users of a hazard ahead. They are diamond or rectangular in shape and have a black border and black symbols or letters on a yellow background.

- Dangerous corner ahead
- Roundabout ahead
- Mini-Roundabout ahead
- Merging traffic
- Two-way traffic
- Dangerous bend ahead
- Series of dangerous bends ahead
- Series of dangerous corners ahead
- Restricted headroom
- T-junction

**Junction ahead with roads of less importance**  
* (the latter being indicated by arms of lesser width)*

- T-junction
- Y-junction
- Side road
- Crossroads
Junction ahead with a road or roads of equal importance

Crossroads  Side road  T-junction  Y-junction  Staggered crossroads

Advance warning of a major road (or dual carriageway ahead)

T-junction with dual carriageway  Crossroads with dual carriageway  Crossroads

General purpose warning signs

Drive on left  Traffic cross-over ahead  Low flying aircraft  Road divides  Merging/diverging traffic

Dual carriageway ends  Safe height plate  Overhead electric cables  Traffic signals ahead  Pedestrian crossing ahead

Slippery road ahead  Road narrows on both sides  Road narrows from left  Road narrows from right  Tunnel ahead

- Tourist advanced direction sign
- Tourist attraction direction sign
- Pedestrian sign to a tourist attraction
- Pedestrian sign to a car park
- Sign to approved tourist information points
Section 25:

Motorway signs

These signs are rectangular with blue backgrounds and white writing or symbols.
Appendix 1:

List of medical report requirements

If you have any of the diseases or disabilities listed below, you must supply a medical report when applying for a driving licence.

- Diabetes treated by insulin and/or sulphonylurea tablets. Ask your doctor whether you are on these or not. There is no need to report diabetes if managed by other tablets and/or diet.
- Epilepsy.
- Stroke or TIs with any associated symptom lasting longer than one month.
- Fits or blackouts.
- Any type of brain surgery, brain abscess or severe head injury involving in-patient treatment, or brain tumour, spinal injury or spinal tumour.
- An implanted cardiac pacemaker.
- An implanted cardiac defibrillator (ICD).
- Repeated attacks of sudden disabling dizziness.
- Any other chronic neurological condition, such as multiple sclerosis, motor neurone disease, Parkinson’s disease or Huntington’s disease.
- A serious problem with memory or periods of confusion.
- Persistent alcohol misuse or dependency.
- Persistent drug misuse or dependency.
- Serious psychiatric illness or mental health problems.
- Sleep apnoea syndrome.
- Narcolepsy.
- Any condition affecting your peripheral vision.
- Total loss of sight in one eye.
- Any condition affecting both eyes, or the remaining eye if you only have one eye (not including colour blindness or short or long sight).
- A serious hearing deficiency, which has worsened since your last application/renewal.
- Any persisting problem with arm(s) or leg(s) which needs driving to be restricted to certain types of vehicle, or those with adapted controls.
- Severe learning disability.
Appendix 2:

Laws covering road traffic and safety

This section lists the main laws on which the contents of this book are based. It divides the laws into Acts and regulations made under the Acts.

Acts

Road Traffic Acts
Road Traffic Act 1961
Road Traffic Act 1968
Road Traffic (Amendment) Act 1984
Road Traffic Act 1994
Road Traffic Act 1995
Road Traffic Act 2002
Road Traffic Act 2003
Road Traffic Act 2004
Road Traffic Act 2006
Road Traffic Act 2010
Road Traffic Act 2011
Road Traffic (No. 2) Act 2011

Other relevant Acts
Local Authorities (Traffic Wardens) Act 1975
Road Acts 1920, 1993 and 2007
Finance Acts, 1960 and 1976
Finance (Excise Duties)(Vehicles) Act 1952
Dublin Transport Authority Act 1986
Dublin Transport Authority (Dissolution) Act 1987
Transport (Railway Infrastructure) Act 2001
Taxi Regulation Act 2003
Railway Safety Act 2005
Safety, Health and Welfare at Work Act 2005
Road Traffic and Transport Act 2006
Road Safety Authority Act 2006
Road Transport Act 2011
Motor Vehicle (Duties And Licences) Act 2012
Road Safety Authority (Commercial Vehicle Roadworthiness) Act 2012

**Regulations made under the Acts**

- Road Traffic (Construction, Equipment and Use of Vehicles) Regulations
- Road Traffic (Construction & Use of Vehicles) Regulations
- Road Traffic (Immmobilisation of Vehicles) Regulations
- Road Traffic (Courses of Instruction) (Learner Permit Holders) Regulations
- Road Traffic (Licensing of Learner Drivers) (Certificates of Competency) Regulations
- European Communities (Vehicle Testing) Regulations
- Road Traffic (Traffic and Parking) Regulations
- Road Traffic (Ordinary Speed Limits - Buses, Heavy Goods Vehicles, Etc.) Regulations
- European Communities (Driving Theoretical Tests) Regulations
- European Communities (Vehicle Drivers Certificate of Professional Competence) Regulations
- Road Traffic (National Car Test) Regulations
- Road Traffic (Special Permits for Particular Vehicles) Regulations
- Road Traffic (Signs) Regulations
- Road Traffic (Lighting of Vehicles) Regulations
- Road Traffic (Registration and Licensing) Regulations
- Road Traffic (Licensing of Drivers) Regulations
- Road Traffic (Requirement to have Audible Warning Devices on Vehicles) Regulations
- Road Traffic (Compulsory Insurance) Regulations
- European Communities (Road Traffic) (Compulsory Insurance) (Amendment) Regulations

12 penalty points = automatic disqualification!
Table 1 – Penalty points offences effective 3 August 2012

The two offences described in the Table below have been removed from the Penalty Point Schedule:

<table>
<thead>
<tr>
<th>Offences incuring penalty points</th>
<th>Penalty points on payment</th>
<th>Penalty points on conviction</th>
<th>Amount paid in 28 days</th>
<th>Amount paid in next 28 days</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure by Driver to comply with front seat belt requirements</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
<tr>
<td>Failure by Driver to comply with rear seat belt requirements for passengers under 17 years</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
</tbody>
</table>

and replaced with the following new offences:

<table>
<thead>
<tr>
<th>Offences incuring penalty points</th>
<th>Penalty points on payment</th>
<th>Penalty points on conviction</th>
<th>Amount paid in 28 days</th>
<th>Amount paid in next 28 days</th>
</tr>
</thead>
<tbody>
<tr>
<td>Driver of car or goods vehicle not wearing safety belt</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
<tr>
<td>Driver permitting person under 17 years of age to occupy a seat when not wearing safety belt</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
</tbody>
</table>
Four new seatbelt offences have been added to the schedule:

<table>
<thead>
<tr>
<th>Offences incurring penalty points</th>
<th>Penalty points on payment</th>
<th>Penalty points on conviction</th>
<th>Amount paid in 28 days</th>
<th>Amount paid in next 28 days</th>
</tr>
</thead>
<tbody>
<tr>
<td>Driver of car or goods vehicle permitting child under 3 years of age to travel in it without being restrained by appropriate child restraint</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
<tr>
<td>Driver of car or goods vehicle permitting child over 3 years of age to travel in it without being restrained by appropriate child restraint</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
<tr>
<td>Driver of car or goods vehicle permitting child to be restrained by rearward facing child restraint fitted to a seat protected by active frontal air-bag</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
<tr>
<td>Driver of bus not wearing safety belt</td>
<td>2</td>
<td>4</td>
<td>60</td>
<td>90</td>
</tr>
</tbody>
</table>

There is a new offence relating to vehicle weights.

<table>
<thead>
<tr>
<th>Offences incurring penalty points</th>
<th>Penalty points on payment</th>
<th>Penalty points on conviction</th>
<th>Amount paid in 28 days</th>
<th>Amount paid in next 28 days</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using vehicle – (a) whose weight un-laden exceeds maximum permitted weight, (b) whose weight laden exceeds maximum permitted weight, or (c) any part of which transmits to ground greater weight than maximum permitted weight</td>
<td>1</td>
<td>3</td>
<td>200</td>
<td>300</td>
</tr>
</tbody>
</table>
### Table 2 – Traffic offences included in the fixed charge system since 3 August 2012

<table>

</tr>
</tbody>
</table>
Since January 2013, there are significant changes to the types of vehicles that can be used in the practical driving test. You will see the details of these changes on your appointment letter and in RSA driving test centres. You can also visit www.rsa.ie for further information. The following tables show details of the vehicles that can be used for driving tests from 30 November 2013.

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM</td>
<td>Two-wheeled mechanically propelled vehicle, not capable of being manually propelled. The machine must have a cylinder capacity not exceeding 50cm³, in the case of an internal combustion engine, or a maximum continuous rated power of no more than 4 kilowatts in the case of an electric motor. The vehicle must have a design speed of at least 25km/h but not more than 45km/h.</td>
</tr>
<tr>
<td>A1</td>
<td>A Category A1 motorcycle without sidecar, with a cylinder capacity of at least 115cm³, and capable of a speed of at least 90km/h, with an engine power not exceeding 11kW and with a power/weight ratio not exceeding 0.1kW/kg. If the motorcycle is powered by an electric motor, the power to weight ratio of the vehicle shall be at least 0.08kW/kg.</td>
</tr>
<tr>
<td>A2</td>
<td>A Category A2 motorcycle without sidecar, with a cylinder capacity of at least 395cm³, and an engine power of at least 20kW, but not exceeding 35 kW, and with a power/weight ratio not exceeding 0.2 kW/kg, and not derived from a vehicle of more than double its power. If the motorcycle is powered by an electric motor, the power to weight ratio of the vehicle shall be at least 0.15kW/kg.</td>
</tr>
<tr>
<td>A</td>
<td>A Category A motorcycle without sidecar, with a cylinder capacity of at least 595cm³, an unladen mass of more than 175kg, and an engine power of at least 50kW. If the motorcycle is powered by an electric motor, the power to weight ratio of the vehicle shall be at least 0.25kW/kg.</td>
</tr>
<tr>
<td>B</td>
<td>Four-wheeled vehicles (e.g. cars/light vans), having a maximum authorised mass not exceeding 3,500kg, with passenger accommodation for not more than 8 persons and capable of a speed of at least 100km/h.</td>
</tr>
<tr>
<td>BE</td>
<td>A combination, made up of a Category B test vehicle which should be either (a) a length of at least 4.25 metres, or (b) a 4 wheel drive vehicle, and a trailer with a maximum authorised mass of between 1,400–3,500 kg, capable of a speed of at least 100km/h, which does not fall within Category B. The cargo compartment of the trailer must consist of a permanent, closed box body which is at least as wide and as high as the motor vehicle, and at least 2.4 metres long. The closed box body may be slightly less wide than the motor vehicle, provided that the view to the rear is only possible by use of the external rear-view mirrors of the motor vehicle. The trailer must be presented with a real total mass (the actual weight of the trailer including the necessary load) of at least 800kg, having due regard for safety, stability, manufacturer’s guidelines and legal limits of the combination.</td>
</tr>
</tbody>
</table>
Representative vehicle if registered before 1 January 2004 (from 30 June 2014, all vehicles presenting for test must comply with the requirements on pages 242–243)

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>W</td>
<td>Works vehicles and land tractors.</td>
</tr>
<tr>
<td>C1</td>
<td>Vehicles (larger vans/light trucks) with passenger accommodation for not more than 8 persons, having a maximum authorised mass of at least 4,000 kg, but not exceeding 7,500 kg, and capable of a speed of at least 80 km/h.</td>
</tr>
<tr>
<td>C1E</td>
<td>A combination made up of a Category C1 test vehicle and a trailer, capable of a speed of at least 80 km/h and with an overall length of at least 8 metres. The trailer used must have a maximum authorised mass of at least 2,000 kg, and have a length of at least 2.4 metres and a width of at least 1.2 metres. The trailer must be presented with a real total mass (the actual weight of the trailer including any load if necessary) of at least 800 kg, having due regard for safety, stability, manufacturer’s guidelines and legal limits of the combination.</td>
</tr>
<tr>
<td>CE</td>
<td>Either (a) an articulated vehicle, or (b) a combination of a Category C test vehicle and a trailer. The vehicle must have at least 4 axles, a combined maximum authorised mass of at least 18,000 kg, an overall length of at least 12 metres, and capable of a speed of at least 80 km/h. A Cyclops mirror must be fitted where required. The combination must be presented with a real total mass (the actual weight of the combination including any load if necessary) of at least 15,000 kg, having due regard for safety, stability, manufacturer’s guidelines and legal limits of the combination.</td>
</tr>
<tr>
<td>D1</td>
<td>Vehicles (minibuses) having passenger accommodation for more than 8 persons, but not more than 16 persons, and capable of a speed of at least 80 km/h.</td>
</tr>
<tr>
<td>D1E</td>
<td>A combination made up of a Category D1 test vehicle, and a trailer, capable of a speed of at least 80 km/h. The trailer used must have a maximum authorised mass of at least 1,400 kg, a length of at least 2.4 metres and a width of at least 1.2 metres. The trailer must be presented with a real total mass (the actual weight of the trailer including the necessary load) of at least 800 kg, having due regard for safety, stability, manufacturer’s guidelines and legal limits of the combination.</td>

<tr>
<td>Failure of your Driving Test</td>
<td>The result of the test, and the points awarded for the various faults, will be recorded on your test form. You will be shown a summary of the faults you committed on your test form, and you will be given an opportunity to sign it.</td>
</tr>
<tr>
<td>Grading of faults</td>
<td>Faults are graded as follows:-</td>
</tr>
<tr>
<td>Grade 1 (Green area) Minor fault</td>
<td></td>
</tr>
<tr>
<td>Grade 2 (Blue area) More Serious fault</td>
<td></td>
</tr>
<tr>
<td>Grade 3 (Pink area) Dangerous/ Potentially dangerous or total disregard of traffic control.</td>
<td></td>
</tr>
<tr>
<td>Grading of faults</td>
<td>Grade 1 faults do not affect the test result.</td>
</tr>
<tr>
<td>A combination of 3 or more uncorrected or incorrectly answered questions on the Rules of the Roads/Checks, constitutes a grade 2 fault.</td>
<td></td>
</tr>
<tr>
<td>Checks include doors closed safely, the headlight, mirror, seat and seatbelt adjustment, and for motorcyclists, the helmet, gloves, boots and protective clothing.</td>
<td></td>
</tr>
<tr>
<td>3 or more hand signals not demonstrated correctly constitutes a grade 2 fault.</td>
<td></td>
</tr>
<tr>
<td>3 or more Secondary Controls not demonstrated correctly constitutes a grade 2 fault. (Secondary controls include temperature controls, fan, seat Wimbledon, wipers, windscreen wiper, light switches, air intake control, near fog light and air conditioning if fitted).</td>
<td></td>
</tr>
<tr>
<td>Not operating a Secondary Control as required during the practical test can also constitute a fault.</td>
<td></td>
</tr>
<tr>
<td>Technical checks - all categories</td>
<td>The systems, lights, indicators, indicators, engine oil, coolant, windscreen washer fluid, steering, brakes and horns. If necessary, the brake should be operated and closed safely. For motorcyclists, the checks also include the chain, and the emergency stop switch if fitted.</td>
</tr>
<tr>
<td>For categories C, D, E, DC, E7, ED1 and ED2 technical checks include the following as appropriate for the category:</td>
<td></td>
</tr>
<tr>
<td>The powered assisted steering and steering systems, the condition of the wheels, wheel nuts, mudguards, windscreen, window, wipers, air pressure, air, tension, suspension, engine oil, coolant, windscreen washer fluid, the steering mechanism (if fitted), the body, lights, cargo, loans, cabin locking, body of driving and securing the load, and checking and using the instrument panel and tachograph.</td>
<td></td>
</tr>
<tr>
<td>For categories D1, D, E7, ED1 and ED2 technical checks include controlling the body, service, dials, emergency exits, first aid equipment, fire extinguishers and other safety equipment.</td>
<td></td>
</tr>
<tr>
<td>Coupling/uncoupling instructions</td>
<td>(a) Checking the coupling mechanism and the brake and electrical connections.</td>
</tr>
<tr>
<td>(b) Uncoupling and receiving the trailer from the towing vehicle using the correct sequence. The towing vehicle must be parked alongside the trailer as part of the exercise. Parking in relation to categories E1, D, D1, E7, ED1 and ED2 includes parking safely at a ramp or platform for loading/unloading.</td>
<td></td>
</tr>
<tr>
<td>Parking in relation to categories E6, E7 and ED includes parking safely to let passengers on or off the bus.</td>
<td></td>
</tr>
<tr>
<td>Motorcyclists</td>
<td>Safety glance means looking around to check blind spots as necessary.</td>
</tr>
<tr>
<td>Preparing for your next Driving Test</td>
<td>In preparing for your next test, you should pay particular attention to the items which have been marked. Further information on these and other aspects of the test are contained in the booklet entitled &quot;The Rules of the Road&quot; which is available from book shops, and in the letter &quot;Preparing for your Driving Test&quot; which is issued with the acknowledgement of your application.</td>
</tr>
<tr>
<td>Note</td>
<td>Items on which faults occurred during your driving test are marked overleaf. The driver tester is not permitted to discuss the details of the test.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------------------------------</td>
<td>---------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Abreast</td>
<td>Side by side</td>
</tr>
<tr>
<td>Acceleration</td>
<td>Speeding up</td>
</tr>
<tr>
<td>Arrhythmia</td>
<td>Irregular or abnormal heart beat</td>
</tr>
<tr>
<td>Axle</td>
<td>A pin, pole, or bar that connects a pair of opposite wheels on a vehicle</td>
</tr>
<tr>
<td>Binocular vision</td>
<td>Vision with both eyes</td>
</tr>
<tr>
<td>Blind spot</td>
<td>An area that a driver or other road user cannot see directly or with their mirrors. Requires them to turn or look sideways to see other road users</td>
</tr>
<tr>
<td>Blow out</td>
<td>Sudden tyre failure</td>
</tr>
<tr>
<td>Build outs</td>
<td>Kerbing which extends from the side of the road to reduce traffic speed</td>
</tr>
<tr>
<td>Cardiovascular diseases</td>
<td>Diseases involving the heart and blood system</td>
</tr>
<tr>
<td>Central median island</td>
<td>An area in the centre of a road which separates approaching flows of traffic or a pedestrian crossing</td>
</tr>
<tr>
<td>Central nervous system</td>
<td>Brain and spinal cord</td>
</tr>
<tr>
<td>Cerebrovascular diseases</td>
<td>Diseases involving blood vessels in the brain</td>
</tr>
<tr>
<td>Certificate of Professional Competency (CPC)</td>
<td>A certificate drivers <strong>must</strong> have before they can drive a HGV or a bus for a living</td>
</tr>
<tr>
<td>Chicane</td>
<td>A traffic-calming measure to make vehicles slow down and weave between traffic lanes</td>
</tr>
<tr>
<td>Congenital myotonic disorders</td>
<td>Disorders from birth that make it difficult for a person to relax their muscles after contracting them</td>
</tr>
<tr>
<td>Chevron board</td>
<td>Traffic warning signs with hatch-markings indicating a sudden change in direction</td>
</tr>
<tr>
<td>Cross- ply tyres</td>
<td>Tyres with cords made of steel and other materials, which cross at various angles to strengthen the side of the tyre and its tread</td>
</tr>
<tr>
<td>Deceleration</td>
<td>Slowing down</td>
</tr>
</tbody>
</table>
Defects
Faults, such as broken mirrors, missing lighting

Design Gross Vehicle Weight (DGVW)
The manufacturers specifications of Gross Vehicle Weight (GVW see below)

Diplopia
Double vision

Diverging
Moving apart. For example, traffic taking a right turn when other traffic is moving straight ahead or traffic leaving a motorway

Fixed wheel bicycle
A bicycle you can back-pedal to brake. It has one wheel which cannot rotate independently of the pedals

Gantries
Overhead steel structures across carriageways to hold up signs

Garda Síochána
Ireland’s national police service

Ghost island
A marked area on the road that shows where a motorway and a slip road meet

Graduating
Moving from one stage to the next

Gross vehicle weight (GVW)
The weight of a vehicle together with the maximum load it is designed to carry

Hard shoulder
A part of the road that is divided by broken or continuous yellow lines from the rest of the road and should be used only by certain road users in certain situations

Hatched marking
Chevron markings on the road which help separate traffic lanes

Hazard
Anything that could be a source of danger on the road

Intoxicant
Something that can affect a person’s behaviour, perception, mood or alertness

Invalid-carriages
Vehicles specially designed or constructed for people with disabilities. This does not apply to conventional motor cars which are specially adapted for disabled persons and which are permitted to use a motorway

Maximum Authorised Mass (MAM)
The maximum weight of the vehicle including the weight of the vehicle, the load it was designed to carry and any fuel or passengers (including the driver)

</thead>
<tbody>
<tr>
<td>National road</td>
<td>A major road linking urban areas and consisting of motorway roads identified by ‘M’ route numbers, for example M1, and other routes identified by ‘N’ route numbers, for example N11</td>
</tr>
<tr>
<td>Land tractor</td>
<td>Commonly called ‘an agricultural tractor,’ these vehicles are designed to work on land in connection with agricultural, forestry or land drainage-type operations and are driven on a public road only when proceeding to or from the site of such work</td>
</tr>
<tr>
<td>Lighting-up hours</td>
<td>The period commencing one half-hour after sunset on any day and expiring one half-hour before sunrise on the next day.</td>
</tr>
<tr>
<td>Luas</td>
<td>The tram system operating in Dublin city and suburbs</td>
</tr>
<tr>
<td>Manoeuvre</td>
<td>Any action to steer or change the course of a vehicle, such as moving off, changing lanes, leaving a roundabout, turning left or right, taking U-turns or reversing</td>
</tr>
<tr>
<td>Median space</td>
<td>A gap provided in the centre of a dual carriageway to allow vehicles to cross through or turn onto another road</td>
</tr>
<tr>
<td>Merging</td>
<td>Coming together. For example, traffic entering a motorway from a slip road and joining other traffic</td>
</tr>
<tr>
<td>Moped</td>
<td>A light motorcycle of 50cc or less that has a maximum speed of 45km/h</td>
</tr>
<tr>
<td>Motorcycle engine capacity</td>
<td>Cubic capacity or CC of engine</td>
</tr>
<tr>
<td>Motorcycle power rating</td>
<td>Engine power output</td>
</tr>
<tr>
<td>Muscular atrophy</td>
<td>Wasting of muscles</td>
</tr>
<tr>

<td>Definition</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Outer lane</td>
<td>The lane nearest the centre of the road in a dual carriageway or two- or three-lane motorway</td>
</tr>
<tr>
<td>Paraplegia</td>
<td>Loss of movement in both legs</td>
</tr>
<tr>
<td>Peripheral nervous system</td>
<td>Nerves in the body outside the brain and spinal cord</td>
</tr>
<tr>
<td>Permit</td>
<td>A legal document giving permission to do something like park in a particular place or use certain roads</td>
</tr>
<tr>
<td>Pinch points</td>
<td>Traffic calming measure where sections of the road are narrowed to reduce speed</td>
</tr>
<tr>
<td>Pointsman</td>
<td>A Garda who controls the flow of traffic</td>
</tr>
<tr>
<td>Prescription</td>
<td>A written note from a doctor or hospital stating what medicines a person should take and when they should take them</td>
</tr>
<tr>
<td>Professional drivers</td>
<td>Drivers whose main income is from driving, such as bus, coach and haulage drivers</td>
</tr>
<tr>
<td>Psychotropic</td>
<td>Chemical substance that affects the mind, leading to changes in emotions, behaviour, alertness and perception</td>
</tr>
<tr>
<td>Radial tyres (radial ply tyres)</td>
<td>Tyres with cords made of steel and other materials, which run around under the treads to strengthen them and make them last longer</td>
</tr>
<tr>
<td>Retarder</td>
<td>A device that reduces the speed of the vehicle without using the brakes</td>
</tr>
<tr>
<td>Safe headway</td>
<td>A safe distance between two vehicles on the road</td>
</tr>
<tr>
<td>‘Sam Browne’</td>
<td>A wide strap, made of reflective material, worn around the waist with a strap diagonally over the right shoulder</td>
</tr>
<tr>
<td>Tabard</td>
<td>Sleeveless yellow fluorescent vest worn by motorcyclists with ‘L’ plates clearly displayed to front and rear.</td>
</tr>
<tr>
<td>Secondary controls</td>
<td>Devices in a vehicle that do not direct its movement or braking but control how the driver sees out of the vehicle and how the vehicle is seen; examples are de-misters, windscreen wipers, washers and hazard lights</td>
</tr>
<tr>
<td>Single lane (for shuttle working)</td>
<td>Control of traffic through road works one-way</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>----------------------</td>
<td>---------------------------------------------------------------------------</td>

<tr>
<td>Swan neck</td>
<td>The course followed by a vehicle when the driver passes the correct point for taking a right turn and needs to make a bigger effort to correct the position when completing the turn</td>
</tr>
<tr>
<td>Tachograph</td>
<td>A device that measures and records the speed, distance and time travelled by a vehicle</td>
</tr>
<tr>
<td>Tailgating</td>
<td>Driving too close to a vehicle in front</td>
</tr>
<tr>
<td>Tarpaulin</td>
<td>Waterproof canvas material used to cover cargo being transported</td>
</tr>
<tr>
<td>T-junction</td>
<td>A junction where the meeting of a minor road with a major road forms a “T” shape</td>
</tr>
<tr>
<td>Tread (tyres)</td>
<td>The grooves on a type which provide a grip on the road</td>
</tr>
<tr>
<td>Variable message sign</td>
<td>An upright electronic sign, whose content changes to inform on roads and road safety</td>
</tr>
<tr>
<td>Vigilant</td>
<td>Careful, watchful, looking out for possible danger</td>
</tr>
<tr>
<td>Work vehicles</td>
<td>Vehicles used at sites or road works that usually do not drive on the road</td>
</tr>
<tr>
<td>Yield</td>
<td>Give way to other road users</td>
</tr>

THE OFFICIAL IRISH RULEBOOK

Following the Rules of the Road saves lives and prevents injury. Written in straightforward language and aimed at all road users – drivers, pedestrians, cyclists, motorists and horseriders – the Rules of the Road sets out the laws, and details best driving practice.

INCLUDES: Vehicle Safety • Road Signs, Markings & Lights • Speed Limits • Motorways • Penalty Points • Rules & Advice Good Driving Practice & Safety.

Rules of the Road Official RSA Guidebook

Essential for anyone using Irish roads, cycle tracks or footpaths, including: those looking to take out their first learner permit, those who are learning to drive, those who are preparing for their practical driving test and those who are already licensed drivers. A valuable reference for every road user.

CLEAR . CONCISE . COMPLETE
