August is Children’s Vision Awareness Month

It is Back to School Time!

Along with school supply shopping and purchasing those back-to-school items, it’s time to make comprehensive eye exam appointments for the kids. Conveniently, August is designated as Children’s Eye Health and Safety Month!

A comprehensive eye exam is a great way to help ensure your child’s eyes are healthy. By having your children’s eyes examined during well-child visits, beginning around age three, your child’s eye doctor can help detect refractive errors such as nearsightedness, farsightedness and astigmatism.
Dr. Howard Freedman, a Volunteer Pediatric Ophthalmologist at the Florida Lions Eye Clinic emphasizes the importance of early eye care in children.

“It is important that children have their eyes tested and screened for problems in early childhood as lazy eye can be found and easily treated in young children. We celebrate August as Children’s Eye Health and Safety month as giving children the best possible vision is so important for schooling and life. The Florida Lions Eye Clinic is devoted to helping our children get the Gift of Sight,” says Dr. Freedman.
