

HANDICAPPING

WHY IT'S IMPORTANT AND WHAT YOU NEED TO KNOW

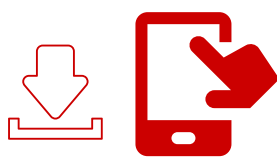

Your **handicap index** represents a portable indicator of your playing ability. With a calculated playing handicap, you can compete against anyone, anywhere - regardless of skill level. It's golf's equalizer.

When signing up to be a member of the WPGA Jr. Foundation, you have the option to add on a handicap membership for a \$10 fee. The service is sold by the Foundation, but the handicap software and administration is done by the Wisconsin State Golf Association (WSGA). *

Your World Handicap

When you sign up for handicap membership, you are assigned a unique World Handicap # that you'll keep as long as you renew your membership each year. even beyond junior golf.

Entering Scores

After each round, you should post your score through the WSGA mobile app. You can download the app for free! You'll need to login with your World Handicap #. Enter your score every time you play. *

Calculation

A minimum of 54 holes (made up of either 9 or 18 hole rounds) is needed to calculate your handicap index. When you enter a score, the index gets updated the next day.

To sign up for or renew your handicap for the season, visit
